APPENDIX A – CROSSWALK

This Appendix provides a copy of the FEMA Region III, Local Hazard Mitigation Plan Review Crosswalk. This crosswalk documents which sections of the Plan contain the FEMA hazard mitigation planning requirements.

LOCAL MITIGATION PLAN REVIEW TOOL +HHPD

The *Local Mitigation Plan Review Tool* demonstrates how the Local Mitigation Plan meets the regulation in 44 CFR §201.6 and offers States and FEMA Mitigation Planners an opportunity to provide feedback to the community.

- The Regulation Checklist provides a summary of FEMA's evaluation of whether the Plan has addressed all requirements.
- The Plan Assessment identifies the plan's strengths as well as documents areas for future improvement.
- The Multi-jurisdiction Summary Sheet is an optional worksheet that can be used to document how each jurisdiction met the requirements of the each Element of the Plan (Planning Process; Hazard Identification and Risk Assessment; Mitigation Strategy; Plan Review, Evaluation, and Implementation; and Plan Adoption).

The FEMA Mitigation Planner must reference this *Local Mitigation Plan Review Guide* when completing the *Local Mitigation Plan Review Tool*.

Jurisdiction: **RICHMOND-CRATER, VIRGINIA**	**Title of Plan:** **RICHMOND-CRATER MULTI-REGION HAZARD MITIGATION PLAN**	**Date of Plan:** **JUNE 2022 (EXPECTED)**
Local Point of Contact: **KATIE MOODY**	**Address:** **9211 FOREST HILL AVENUE, SUITE 200** **RICHMOND, VIRGINIA 23235**	
Title: REGIONAL EMERGENCY MANAGEMENT PROGRAM COORDINATOR		
Agency: **PLANRVA**		
Phone Number: (804) 323-2033	**E-Mail: kmoody@PlanRVA.org**	

State Reviewer:	**Title:**	**Date:**
Amanda Weaver	**All Hazards Planner – R1**	**6/2/2022**
Chris Bruce	**All Hazards Planner – R5**	**6/2/2022**

FEMA Reviewer:	**Title:**	**Date:**
Shannon Burke	Community Planner	June 16, 2002
Joshua Norris	MD FIT, Hazard Mitigation Planner	7/11/2022
Date Received in FEMA Region 3	June 16, 2002	
Plan Not Approved	July 14, 2022	
Plan Approvable Pending Adoption		
Plan Approved		

SECTION 1:
REGULATION CHECKLIST

INSTRUCTIONS: The Regulation Checklist must be completed by FEMA. The purpose of the Checklist is to identify the location of relevant or applicable content in the Plan by Element/sub-element and to determine if each requirement has been 'Met' or 'Not Met.' The 'Required Revisions' summary at the bottom of each Element must be completed by FEMA to provide a clear explanation of the revisions that are required for plan approval. Required revisions must be explained for each plan sub-element that is 'Not Met.' Sub-elements should be referenced in each summary by using the appropriate numbers (A1, B3, etc.), where applicable. Requirements for each Element and sub-element are described in detail in this *Plan Review Guide* in Section 4, Regulation Checklist.

1. REGULATION CHECKLIST **Regulation** (44 CFR § 201.6 Local Mitigation Plans)	**Location in Plan (section and/or page number)**	**Met**	**Not Met**
ELEMENT A. PLANNING PROCESS			
A1. Does the Plan document the planning process, including how it was prepared and who was involved in the process for each jurisdiction? (Requirement §201.6(c)(1))	Section 3	X	
A2. Does the Plan document an opportunity for neighboring communities, local and regional agencies involved in hazard mitigation activities, agencies that have the authority to regulate development as well as other interests to be involved in the planning process? (Requirement §201.6(b)(2))	Section 3, particularly 3.7 "Involving Stakeholders"	X	
A3. Does the Plan document how the public was involved in the planning process during the drafting stage? (Requirement §201.6(b)(1))	Section 3, particularly 3.6, "Involving the Public"	X	
A4. Does the Plan describe the review and incorporation of existing plans, studies, reports, and technical information? (Requirement §201.6(b)(3))	Section 3.5, "2021/2022 Committee Meetings and Workshops"; also Section 7.3	X	
A5. Is there discussion of how the community(ies) will continue public participation in the plan maintenance process? (Requirement §201.6(c)(4)(iii))	Section 8, particularly Section 8.5 "Continued Public Involvement"	X	
A6. Is there a description of the method and schedule for keeping the plan current (monitoring, evaluating and updating the mitigation plan within a 5-year cycle)? (Requirement §201.6(c)(4)(i))	Section 8	X	

1. REGULATION CHECKLIST **Regulation** (44 CFR § 201.6 Local Mitigation Plans)	**Location in Plan (section and/or page number)**	**Met**	**Not Met**
REQUIRED REVISIONS **A1**. The plan does not demonstrate that Greenville County and the Towns of Waverly and Surry participated in the planning process. Page 10 discusses that Working Groups met outside of the official planning process and that additional activities took place through emails and phone calls. If these activities included Greenville County and the Towns of Waverly and Surry, the plan must state this. Surry County (Melissa Rollins) participated in the Hampton Roads Hazard Mitigation Plan (HMP) but is listed as a participant in this plan in the list of participants in Section A-15 of this Local Plan Review Tool. The county represented the Towns of Claremont and Dendron in the Hampton Roads HMP and can only participate in one plan. The county should be removed as a participant from this plan. **RECOMMENDED REVISIONS** The plan does not include a table of contents and the formatting is off and doesn't match Section 2, "Organization of the Plan." For better readability, correct the subheadings in the Executive Summary to ensure they match the plan contents and include the Table of Contents in the final plan. Check the final plan to ensure consistency of formatting.			
ELEMENT B. HAZARD IDENTIFICATION AND RISK ASSESSMENT			
B1. Does the Plan include a description of the type, location, and extent of all natural hazards that can affect each jurisdiction(s)? (Requirement §201.6(c)(2)(i))	Section 5	X	
B2. Does the Plan include information on previous occurrences of hazard events and on the probability of future hazard events for each jurisdiction? (Requirement §201.6(c)(2)(i))	Section 5, within each hazard subsection	X	
B3. Is there a description of each identified hazard's impact on the community as well as an overall summary of the community's vulnerability for each jurisdiction? (Requirement §201.6(c)(2)(ii))	Section 5, within each hazard subsection	X	
B4. Does the Plan address NFIP insured structures within the jurisdiction that have been repetitively damaged by floods? (Requirement §201.6(c)(2)(ii))	Section 5.4, "Flooding"	X	
ELEMENT C. MITIGATION STRATEGY			
C1. Does the plan document each jurisdiction's existing authorities, policies, programs and resources and its ability to expand on and improve these existing policies and programs? (Requirement §201.6(c)(3))	Section 6	X	
C2. Does the Plan address each jurisdiction's participation in the NFIP and continued compliance with NFIP requirements, as appropriate? (Requirement §201.6(c)(3)(ii))	Section 5.4, Tables 5.5 and 5.6 Section 6.6.5 and Table 6.3	X	

1. REGULATION CHECKLIST **Regulation** (44 CFR § 201.6 Local Mitigation Plans)	Location in Plan (section and/or page number)	Met	Not Met
C3. Does the Plan include goals to reduce/avoid long-term vulnerabilities to the identified hazards? (Requirement §201.6(c)(3)(i))	Section 7.3, Mitigation Goals	X	
C4. Does the Plan identify and analyze a comprehensive range of specific mitigation actions and projects for each jurisdiction being considered to reduce the effects of hazards, with emphasis on new and existing buildings and infrastructure? (Requirement §201.6(c)(3)(ii))	Section 7.6, also Table 7.2	X	
C5. Does the Plan contain an action plan that describes how the actions identified will be prioritized (including cost benefit review), implemented, and administered by each jurisdiction? (Requirement §201.6(c)(3)(iv)); (Requirement §201.6(c)(3)(iii))	Section 7.6	X	
C6. Does the Plan describe a process by which local governments will integrate the requirements of the mitigation plan into other planning mechanisms, such as comprehensive or capital improvement plans, when appropriate? (Requirement §201.6(c)(4)(ii))	Section 8.3, "Implementation"	X	
ELEMENT D. PLAN REVIEW, EVALUATION, AND IMPLEMENTATION (applicable to plan updates only)			
D1. Was the plan revised to reflect changes in development? (Requirement §201.6(d)(3))	Revisions to Sections 4 p. 34, 5 and 6	X	
D2. Was the plan revised to reflect progress in local mitigation efforts? (Requirement §201.6(d)(3))	Section 6.6.2 and 6.6.3, Appendix G, column titled "2022 Status"	X	
D3. Was the plan revised to reflect changes in priorities? (Requirement §201.6(d)(3))	Section 7.6, (each action priority was reconsidered)	X	
ELEMENT E. PLAN ADOPTION			
E1. Does the Plan include documentation that the plan has been formally adopted by the governing body of the jurisdiction requesting approval? (Requirement §201.6(c)(5))			
E2. For multi-jurisdictional plans, has each jurisdiction requesting approval of the plan documented formal plan adoption? (Requirement §201.6(c)(5))			
ELEMENT E: REQUIRED REVISIONS			

1. REGULATION CHECKLIST **Regulation** (44 CFR § 201.6 Local Mitigation Plans)	Location in Plan (section and/or page number)	Met	Not Met
ALL DAM RISKS - ELIGIBLE HIGH HAZARD POTENTIAL DAMS			
HHPD1. Did Element A4 (planning process) describe the incorporation of existing plans, studies, reports, and technical information for high hazard potential dams?	Section 3.5 Section 5.5 and Table 5.12 Appendix F-3	X	
HHPD2. Did Element B3 (risk assessment) address high hazard potential dams in the risk assessment?	Section 5.5 and Table 5.12 Appendix F-3	X	
HHPD3. Did Element C3 (mitigation goals) include mitigation goals to reduce long-term vulnerabilities from high hazard potential dams that pose an unacceptable risk to the public?	Section 7.3, Goal 4, Objective 4.3	X	
HHPD4. Did Elements C4-C5 (mitigation actions) prioritize mitigation actions to reduce vulnerabilities from high hazard potential dams?	Section 7.6, Regional Action #7, Chesterfield Co #13 and #16, Colonial Heights #5 and #6, Goochland Co #10, Hanover Co #1 and #6, Henrico Co #3, #7, #12, New Kent Co #11	X	

REQUIRED REVISIONS (For HHPD Grant Eligibility)

RECOMMENDED REVISIONS

HHPD1: Consider incorporating additional dam-related data into the plan, such as the potential impacts to community lifelines, EAPs, HEC-RAS, DSS-WISEHCOM, DSS-WISE Lite, FLO-2D, or more detailed studies. The resource detailed below can be leveraged to help address this recommendation.

> *The US Army Corps of Engineers National Inventory of Dams (NID) has updated its database (of 90,000 dams nationwide) and associated website to include dam-specific risk information and inundation maps for USACE dams. The dam-related data is publicly available and went live in November 2021. Consider reviewing the USACE dam analyses that have been added to the NID, to inform the refinement of your Hazard Mitigation Plan's dam risk analyses. The new NID includes an advanced map viewer that allows local dam data layers (in GeoJSON or Zip Shapefile formats) to be imported and overlayed against USACE data (and additional layers included in the new NID map viewer tool such as FEMA's National Flood Hazard Layer). For more information, please refer to the recorded 10/26/2021 "National Inventory of Dams Update and Public Release of USACE Inundation Maps" Silver Jackets webinar which is available here: https://usace.contentdm.oclc.org/digital/collection/p16021coll2/id/7418.*

HHPD2: Add information (such as narrative, maps, and EAP excerpts) to the HMP describing the risks and vulnerabilities to and from eligible HHPDs including:

1. REGULATION CHECKLIST **Regulation** (44 CFR § 201.6 Local Mitigation Plans)	Location in Plan (section and/or page number)	Met	Not Met
• Potential cascading impacts of storms, seismic events, landslides, wildfires, etc. on dams that might affect up and downstream flooding potential. • Potential significant economic, environmental, or social impacts as well as multijurisdictional impacts from a dam incident. • Methodology and/or assumptions for risk data and inundation modeling. **HHPD2:** The definition of incremental, non-breach, and residual risk is posed on page 119 and repeated on page 121. Consider consolidating and/or removing redundant information. **HHPD2:** Well done including an inundation map for Falling Creek Dam in Chesterfield County (figure 5.11), but keep in mind that it is difficult to discern the currency of the map since the figure is marked 'undated." Consider conducting further engagement to obtain the data for the map in question and updating the plan to include the date associated with all sources of information used in the HMP. **Question:** Page 123 states that "Appendix I provides a list of all dams in the study area from the DCR database, as well as the EAPs for each of the high hazard dams. The high hazard dams that have latitude and longitude characteristics identified in the U.S. Army Corps of Engineers' National Inventory of Dams are shown in Figure 5.8." However, there does not appear to be an appendix I in the "RICHMOND CRATER__APPENDICES_2022" pdf file submitted to FEMA.			
ELEMENT F. ADDITIONAL STATE REQUIREMENTS (OPTIONAL FOR STATE REVIEWERS ONLY; NOT TO BE COMPLETED BY FEMA)			
F1.			
F2.			
ELEMENT F: REQUIRED REVISIONS			

SECTION 2:
PLAN ASSESSMENT

INSTRUCTIONS: The purpose of the Plan Assessment is to offer the local community more comprehensive feedback to the community on the quality and utility of the plan in a narrative format. The audience for the Plan Assessment is not only the plan developer/local community planner, but also elected officials, local departments and agencies, and others involved in implementing the Local Mitigation Plan. The Plan Assessment must be completed by FEMA. The Assessment is an opportunity for FEMA to provide feedback and information to the community on: 1) suggested improvements to the Plan; 2) specific sections in the Plan where the community has gone above and beyond minimum requirements; 3) recommendations for plan implementation; and 4) ongoing partnership(s) and information on other FEMA programs, specifically RiskMAP and Hazard Mitigation Assistance programs. The Plan Assessment is divided into two sections:

A. Plan Strengths and Opportunities for Improvement

This section provides a discussion of the strengths of the plan document and identifies areas where these could be improved beyond minimum requirements.

- Good representation from adjacent communities, including Rappahannock, Pamunkey, and Chickahominy, Tribal representatives in attendance
- The plan could give a more detailed description of the input of meeting participants. For example, describe how the tribal representatives participated. Did they just attend, or did they contribute? What impact did they have? How did their input add to the planning process? How did they contribute and what impact did they have? How did they add to the plan?
- Excellent that local data (Charles City County Planning Commission) was used to supplement federal data to assess development trends. Taking these discussions further and identifying the location of future developments by type (commercial, residential) might be located be it in-fill or on undeveloped land would be ideal.
- A wide variety of existing plans, studies, reports and technical information are used very well throughout the plan, particularly in the risk assessment.
- The "hybrid" approach methodology described in the plan is a good way to augment the data provided by the National Centers for Environmental Information (NCEI) Storm Events Database to ensure it accurately reflects "on the ground" risk.
- The dot voting exercise used at the June 21, 2021, workshop to garner participation by committee members to rank hazards seems to be an excellent way to engage them as well as communicate risk. Well-done.
- Excellent use of maps to in the Hazard Identification and Risk Assessment. The maps are at an appropriate scale for readers to get an idea of risk for various communities participating in the plan and to gain an understanding of social vulnerability and repetitive loss areas.
- Consider including a composite map of vulnerable critical facilities and lifelines for the study area in the plan per jurisdiction.
- All Dam Risk Element: The Plan introduces the reader to the all dam risk concepts of incremental, non-breach, and residual risk.

- All Dam Risk Element: Table 5.121, High Hazard Dams in the Richmond-Crater Region, includes columns and data regarding "jurisdiction," "dam name," "dam type," "Year Built," "Reservoir Purpose," "Top Height (Feet)," Top Capacity (Acre-Feet), EAP Status (last Approval), "Downstream Impacts." Most notably, the downstream impacts column lists the number of homes, parks, dams, roads, hospitals, or railroads located downstream of specific dams (when provided).
- All Dam Risk Element: Figures 5.8, High Hazard Dams in the Richmond-Crater Region, visually depicts the location of HHPDs, water bodies, and jurisdictional boundaries within the planning area
- In general, the Risk Assessment is excellent, and the discussion of climate change is particularly strong
- The plan would be greatly strengthened if it compared and contrasted with "Future Vulnerability, Land Use and Climate Change Impacts" in the Hazard Identification and Risk Assessment and Section 4.5, "Land Use and Development Trends" under the Community Profile. For example, the plan mentions that growth in Dinwiddie County will likely occur in the northeastern area. Maps in Dinwiddie County's comprehensive and subarea plans would likely show this area as such, but do these plans also include an assessment or overlay of its vulnerability to hazards identified described in this plan (s)? Hypothetically, if such a map were created during the hazard mitigation planning plan, the comprehensive plan could be amended during its normal cycle to identify how these risks might be addressed and those actions could be included in the Mitigation Strategy of this Mitigation Plan and scheduled accordingly.
- Excellent that that the objectives that touched on staff capability, outreach, mitigation successes and equity were added to echo what was in a revised goal and to better capture the social justice component of the updated plan.
- Consideration by the planning team of the goals and objectives of hazard mitigation plans of adjacent planning district commissions as they developed their own goals and objectives is a good brainstorming exercise and promotes regional alignment of mitigation outcomes
- It's good that a wide variety of sources to fund mitigation actions were considered
- All Dam Risk Element: Goal 4.3, "Identify and assist owners to maintain and upgrade high hazard potential dams, and protect the people and property downstream," explicitly addresses the long-term vulnerabilities of HHPDs.
- All Dam Risk Element (Best Practice): The Plan includes over 130 jurisdiction-specific and regional mitigation actions dedicated to addressing the "Flooding Due to Impoundment" hazard. Moreover, the plan includes a sound regional action to help mitigate all dam risk:
    - Regional Mitigation Action 7: Address high and significant hazard dam safety in the region. Assist Virginia DCR with investigating significant hazard dams region-wide for possible reclassification as high hazard. Inspect high hazard potential dams for necessary retrofits/repairs. Implement retrofits in partnership with dam owners. This action includes outreach to: 1) private dam owners to either provide or offer to collect data, and to provide additional guidance and resources; and 2) the public, to build awareness through signage installation and other media regarding the dangers associated with low-head dams.

B. Resources for Implementing Your Approved Plan

Consider utilizing the following resources to bolster future hazard mitigation plan updates and advance community mitigation goals.

- FEMA: Local Mitigation Planning Handbook Task 3: Create an Outreach Strategy
- FEMA: National Risk Index (NRI) for Natural Hazards
- FEMA: Resilience Analysis and Planning Tool (RAPT)
- FEMA: Region 3 Conducting Annual Hazard Mitigation Plan Reviews Resource
- FEMA: Region 3 High Hazard Potential Dams State and Local Mitigation Planning Tips Resource
- FEMA: Region 3 Checking In On The NFIP Resource
- FEMA: Guides to Expanding Mitigation
- Resilient Nation Partnership Network, NOAA, & FEMA: Building Alliances for Equitable Resilience Resource (April 2021)
- FEMA: Protect Your Home from Flooding, Low-Cost Project You Can Do Yourself Resource
- FEMA: "How Community Lifelines and Infrastructure Planning are Essential to Mitigation Plans" Blog Post (October 2019)
- DHS: PAS Memo, American Planning Association, Building Resilience Through Plan Integration, Jan/Feb 2021

SECTION 3:
MULTI-JURISDICTION SUMMARY SHEET (OPTIONAL)

INSTRUCTIONS: For multi-jurisdictional plans, a Multi-jurisdiction Summary Spreadsheet may be completed by listing each participating jurisdiction, which required Elements for each jurisdiction were 'Met' or 'Not Met,' and when the adoption resolutions were received. This Summary Sheet does not imply that a mini-plan be developed for each jurisdiction; it should be used as an optional worksheet to ensure that each jurisdiction participating in the Plan has been documented and has met the requirements for those Elements (A through E).

MULTI-JURISDICTION SUMMARY SHEET												
#	Jurisdiction Name	Jurisdiction Type (city/borough/ township/ village, etc.)	Plan POC	Mailing Address	Email	Phone	Requirements Met (Y/N) *=HHPD

APPENDIX B – RESOLUTIONS

This Appendix provides copies of the resolutions of adoption for this plan, as well as the final approval letter from FEMA Region III.

PLACEHOLDER FOR FINAL RESOLUTIONS OF ADOPTION BY COMMUNITIES

PLACEHOLDER FOR FINAL FEMA REGION III APPROVAL LETTER

APPENDIX C - PLANNING MEETINGS

This section of the Plan includes the Committee and Public Meeting advertisements, minutes, notes, and attendance sheets collected during the process of updating this Plan.

Richmond-Crater
Hazard Mitigation Plan Update

Kickoff Meeting Minutes

November 20, 2020 – Virtual Meeting via Zoom

AGENDA

- Sign-In
- Consultant's Role in Planning Process
- Project Schedule
- Activating the Committees
- Preliminary Examination of the List of Hazards
- Resolving Data Needs
- Homework

MEETING NOTES

- The PowerPoint presentation and timeline are available via PlanRVA's SharePoint for Committee members.
- Plan update and planning process will be geared toward community credit for the Community Rating System.
- HIRA will be revised to include pandemic/infectious disease, high hazard dams/levee failure, radon.
- Consultant will do additional research on mass evacuation, karst, cyber security and hazardous materials incidents to report to committee and make a further determination about inclusion of these hazards.
- Revisions will include acknowledgement of potential impacts of biological threats, radiological threats, and electro-magnetic pulse or sustained power disruption, but these are not considered critical and will not be included as evaluated hazards.

ATTENDEES

Curt Nellis - Powhatan County, cnellis@powhatanva.gov
Leigh Chapman - Salter's Creek Consulting, Inc.
Claudia Cheely - Hanover County, cdcheely@hanovercounty.gov
Robert Williams - City of Hopewell, Fire & Rescue, rowilliams@hopewellva.gov
John Woodburn - Goochland County, jwoodburn@goochlandva.us
Jess Robison - Chesterfield County, Fire & EMS - Emergency Management, robisonja@chesterfield.gov
Ben Ruppert - City of Hopewell, Fire & Rescue - Emergency Manager, bruppert@hopewellva.gov
Alyson Oliver - Powhatan County, Planning Department, aoliver@powhatanva.gov
Katie Moody - PlanRVA , kmoody@planrva.org
Alec Brebner - AICP - Executive Director, Crater Planning District Commission, abrebner@craterpdc.org,
Melanie Wilson - Town of Jarratt, mayor@jarrattva.com
Woodie Walker - Rappahannock Tribe , wwalker@rappahannocktribe.org
Amanda Weaver - VDEM Region 1, All Hazards Planner, manda.weaver@vdem.virginia.gov

Bill Lawson - City of Richmond, Emergency Management, william.lawson@richmondgov.com
Randy Hardman - Hanover County , Public Works, wrhardman@hanovercounty.gov
Sarah Stewart - PlanRVA, sstewart@planrva.org
Surani Olsen - City of Richmond, surani.olsen@richmondgov.com
Justin Stauder - New Kent County, jmstauder@newkent-va.us
Jamie Sherry - Goochland County, Community Development, jsherry@goochlandva.us
Jay Ruffa - Crater PDC, jruffa@craterpdc.org
Susan Pollard - Chesterfield County, Communications & Media Department, pollards@chesterfield.gov
Brianne Fisher - City of Richmond, Office of Sustainability, brianne.fisher@richmondgov.com
Chris Ward - City of Hopewell, Development Dept., cward@hopewellva.gov
Jimmy Johnson - Charles City County, jvjohnson@co.charles-city.va.us
Troy Aronhalt - City of Ashland, Police Department, taronhalt@ashlandpolice.us
Darryl E. Walker - City of Petersburg
Richard Douglas - Sussex County Administrator, rdouglas@sussexcountyva.gov
Bart Nuckols - Sussex County, Planning
Brandi Payne - City of Colonial Heights, Planning & Community Development, payneb@colonialheightsva.gov
Kristin Owen - Henrico County, Floodplain & Dam Safety Manager, owe042@henrico.us
Doug Gagnon - VDEM Region 1, DRRO, doug.gagnon@vdem.virginia.gov
David Thompson - City of Hopewell, Development Dept, GIS Mgr. dthompson@hopewellva.gov
Darryl E. Walker - City of Petersburg, dwalker@petersburg-va.org
Horace Wade - Prince George County
Reggie Tabor - City of Petersburg
Tevya Williams Griffin - City of Hopewell, Planning & Development Department

INVITEES
Email invitations were issued to each of the individuals shown on the following email invite. In addition, each primary contact for the communities forwarded the message and made additional phone calls to their staff and interested persons.

Subject: Richmond-Crater Regional Hazard Mitigation Update - Kickoff Meeting
When: Friday, November 20, 2020 9:00 AM-10:30 AM (UTC-05:00) Eastern Time (US & Canada).
Where: Zoom

Good afternoon all,

You all should have received an email earlier today regarding the date and purpose of the HMP kickoff meeting next Friday (November 20th).

We will be holding this meeting virtually The Zoom access information is below.

As stated in the email, please feel free to forward this invite to someone else in your department if you are unable to attend, or if you'd like to share it with someone in your organization who may be relevant to this project.

Please contact me if you have any questions. Have a nice day!

Katie

Richmond-Crater
Hazard Mitigation Plan Update

Public Meeting #1 Minutes

March 9, 2021 – Virtual Meeting via Zoom

AGENDA

- Introductions
- Plan Background Information
- Terminology
- Discussion of Natural Hazards in 2017 Plan
- Flood Risk Assessment
- Timeline
- Survey Questions for Participants
- General Discussion

MEETING NOTES

- Mr. Diesta discussed hospital system vulnerabilities in Goochland, especially with regard to high winds.
- Ms. Tippett mentioned flooding in South Richmond and Chesterfield, road damage/inaccessibility/ closure, and flooding in Cloverfield community. She recently saw roads flood that hadn't flooded before and was concerned. She indicated Prevention mitigation actions are most important, including buyouts in flood zones.
- Mr. Stewart indicated Education & Awareness actions are most important for resilience.
- Mr. King emphasized importance of making certain that materials are available for ESL citizens and that there is no misinformation therein, citing some COVID 19 info for Spanish-speaking Virginians that was incorrect.
- Additional discussion ensued regarding:
    - the compound effects of disasters;
    - educating out-of-towners (whether college students or tourists) on emergency protection measures;
    - microgrids for electrical power storage and reallocation, particularly with regard to health systems.
- Virginia National Guard is involved in ongoing multi-year study, supported by FEMA, of health care facilities and power grid(s).

Follow Up Flag: Follow up
Flag Status: Flagged

Hello everyone:

I've added a few folks to the email list so, I'll begin with an invitation for all of you to review the attached one-page handout on the region's Hazard Mitigation Plan, and how we're updating the plan for 2022. Distribution to other staff, elected officials, and the public are welcome, as we'll need input from all of these folks along the way. If it (or something similar) goes up on web sites or social media, please take a screenshot and send it to me for documentation to FEMA.

I've only heard from 3 of 22 communities after my Feb 1 email below. Please correspond with your team to gather info and provide me with inputs. Conducting this multi-jurisdictional plan will be difficult in a virtual environment, so I'll need all of you to act as partners in the process! If you'd like to set up a small teleconference with your team and me, please let me know.

NEW!!
COMMUNITY ACTIONS NEEDED

Hazard Mitigation Planning Web Site. https://planrva.org/emergency-management-home/the-alliance/hazard-mitigation/. This web site will be updated in the days to come with more information. Please add a link to it on your web and social media sites. Take a screenshot and send it to me!

Public Survey/Questionnaire. Click here for the questionnaire. Please post this survey link on social media and web sites to gather public input. Take screenshots & forward to me for recordkeeping.

Public Meeting, March 9, 5pm to 7pm. Click here for the Zoom link to participate.

1. **IMPORTANT:** Please distribute and post the attached public notice (or one of your own design) in accordance with the State's & your community's notification requirements for public meetings. Take screenshots or newspaper clippings and send to me for documentation.
2. CRS or CRS-interested communities need to post it conspicuously in at least 3 places; the PDCs will post it on their web site which will count as one. I will need screenshots of your postings to document for ISO.
3. The main purpose will be to gather information on what the public wants to see in the plan, to include their ideas about which hazards are critical, which capabilities are most important and what mitigation actions they would like to see included. I hope you will plan to attend, as well.

Project SharePoint. https://richmondregional.sharepoint.com/sites/HazardMitigation A SharePoint site is available for us to share these documents and for you to see the latest document drafts and other important project components. Please take a moment to check it out.

OLD
COMMUNITY ACTIONS NEEDED

1. **Mitigation Action Updates** – I previously distributed a spreadsheet that contains the hazard mitigation actions that each community had in the 2017 plan. I need to know the status of each action. We'll discuss changes to them later in the process. Go to the project SharePoint to see the spreadsheet.
2. **Hazard History, Reports and Pictures** – I'm updating the hazard history for each hazard over the past five years. I need your incident reports, pictures, damage writeups, news clippings, etc. Upload big files to SharePoint.
3. **Community Rating System** – There are 2 communities in the region participating in the National Flood Insurance Program's CRS – Ashland and Richmond. Henrico County is also working on applying. **Is your community interested?** If so, I need to know now. See the attached excerpts of CRS planning requirements from the CRS Coordinator's Manual for more info.

UPCOMING ACTIONS

After the Public Meeting on March 9, I will get to work on the HIRA and will be making phone calls to you all with specific requests. But nothing much happens again until May when we get together and review the hazards.

I look forward to hearing from you! Feel free to call if you have questions about why you received this email, or any other aspect of the plan. I stand ready to guide you all through the process, with your help.

Leigh

Subject: Public Notice - Richmond-Crater Hazard Mitigation Plan
Attachments: Richmond Crater Public Meeting #1 flyer.docx; Richmond Crater Public Meeting #1 flyer.pdf

Importance: High

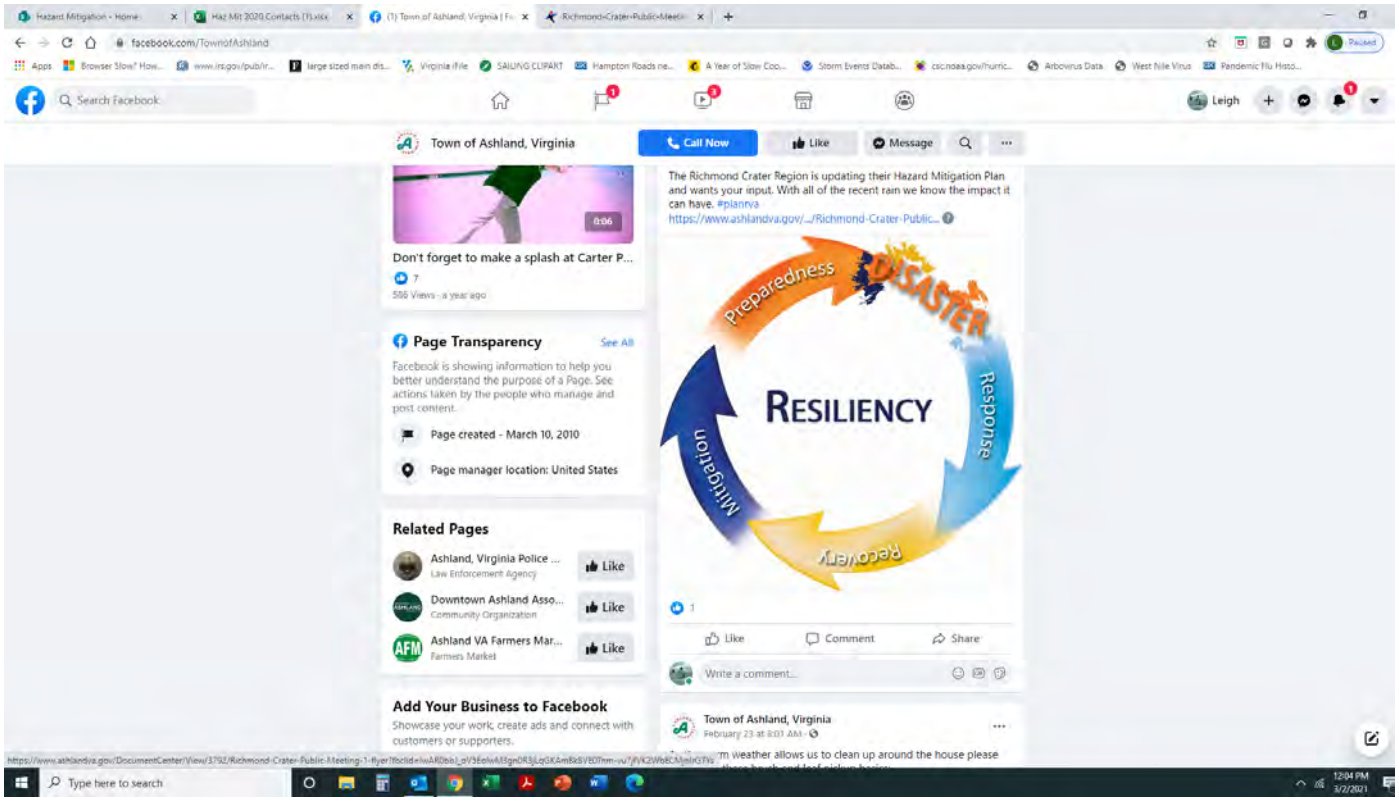

IMPORTANT REMINDER:
Please take a few moments today or tomorrow to coordinate with your team, and make sure that you have conspicuously posted the attached public notice for next Tuesday's Public Meeting. Treat it as you would any other public notice, to include posting on community calendar, sending to your public notice list-serv, and posting on social media. Please run a news item on your community web page and/or email news summary to interested persons. There is a Public Meeting and a Public Survey to point interested persons to.

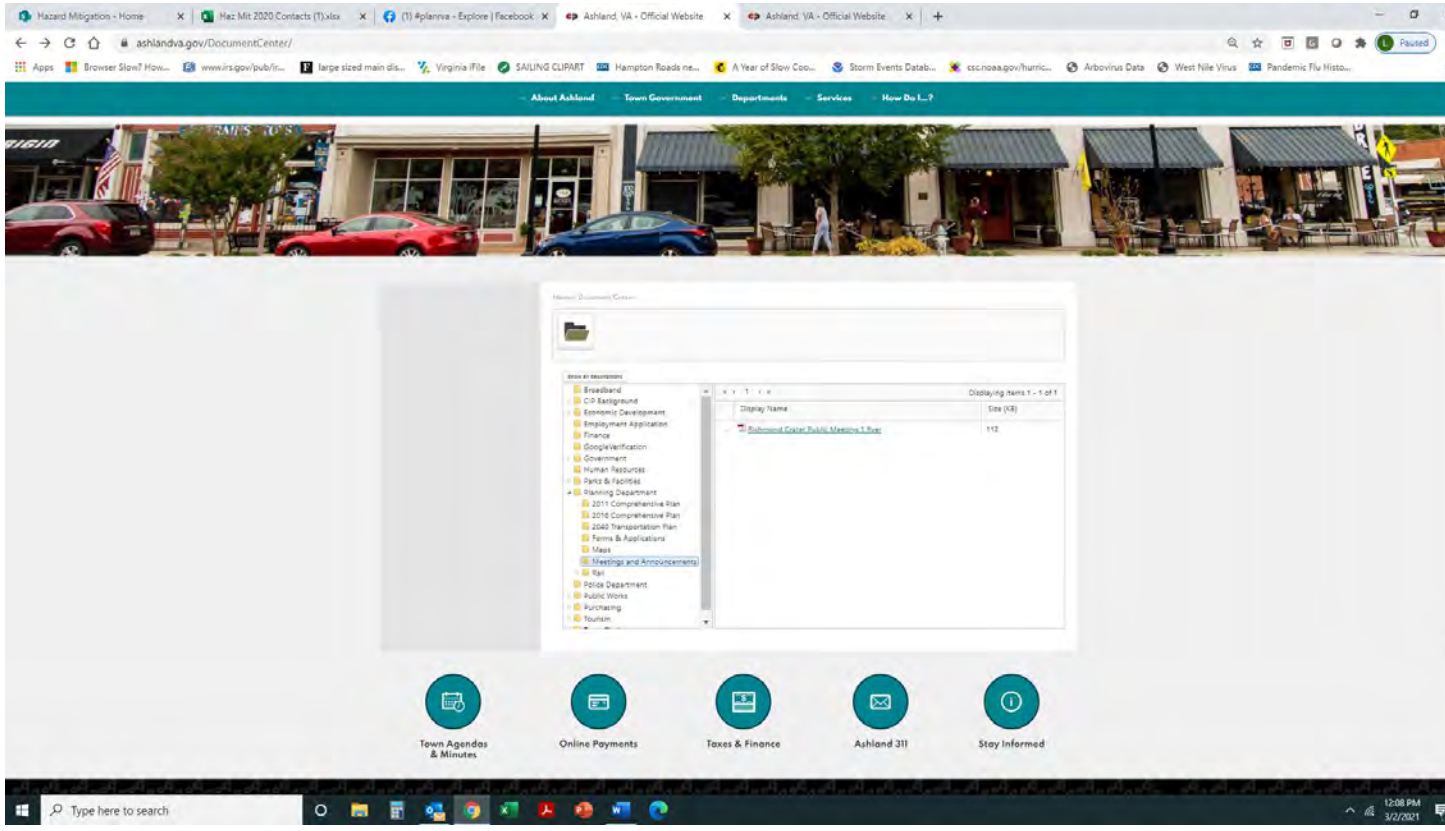

And please send me screenshots of your posts afterward. These are needed for FEMA to see that the public meeting was advertised.

Thanks everyone for getting the word out. Please call or email me if you have questions. Attendance at the meeting is optional, but recommended.

There is an upcoming virtual public meeting regarding the Hazard mitigation planning is a process undertaken to reduce loss of life and property by lessening the potential impact of future disasters. The 22 localities of the Richmond and Crater regions work together to update the Richmond-Crater Multi-Regional Hazard Mitigation Plan every five years.
The main purpose of this public meeting will be to gather information on what the public wants to see in the plan, to include their ideas about which hazards are critical, which capabilities are most important and what mitigation actions they would like to see included. I hope you will plan to attend, as well.

Hazard Mitigation Planning
Hazard mitigation planning is a process undertaken to reduce loss of life and property by lessening the potential impact of future disasters.
The 22 localities of the Richmond and Crater regions work together to update the Richmond-Crater Multi-Regional Hazard Mitigation Plan every five years. The Hazard Mitigation Plan identifies vulnerabilities associated with a variety of hazards and sets out long-term strategies to reduce or eliminate risks. While little can be done to prevent natural hazard events from occurring, the plan is in place to help ensure the region is poised to minimize the disruption which often accompanies disasters, thereby increasing resilience.
A Hazard Mitigation Plan is the result of a planning process to identify hazards and develop strategies to reduce loss of life and property.

PUBLIC SURVEY: CLICK HERE OR SCAN QR CODE

Section 322 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, as amended, requires local jurisdictions to develop and adopt hazard mitigation plans to be eligible to receive certain federal mitigation grant funds. These plans must be updated every five years.

Find out more about what hazards are covered in our regional plan and learn how we are modeling the impacts of those hazards where you live. Determine what actions your community has committed to in order to reduce the impacts of hazards on critical infrastructure. Provide feedback so that the final plan reflects your concerns.

A planning effort by the 22 local emergency local management offices in the Richmond and Crater Planning Districts is underway, and they are seeking your input on the 2022 Regional Hazard Mitigation Plan. This document assesses the community's vulnerability to natural hazards and attempts to reduce the impact of natural disasters, as well as offering a coordinated and collaborative effort to continue Federal Emergency Management Agency (FEMA) mitigation grant program eligibility.

Did you know that our region has a Regional Hazard Mitigation Plan that gets updated every five years? The goal of the Hazard Mitigation Plan is to minimize or eliminate the long-term risk to human life and property from known hazards by identifying and implementing cost-effective mitigation actions.

If you're interested in providing input on the plan update or hazards in your area, please fill out the public survey or attend our public meeting on March 9th, 2021!

Section 322 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, as amended, requires local jurisdictions to develop and adopt hazard mitigation plans to be eligible to receive certain federal mitigation grant funds. These plans must be updated every five years.

Good Afternoon! Goochland County is involved in an effort, with our regional partners, to make our community and region less vulnerable to natural disasters and manmade hazards. Our region is currently in the process of updating its multi-regional mitigation plan. This plan must be updated every five years.

As part of this effort, PlanRVA and the Crater Planning District Commission want input from our residents. They are hosting a virtual public meeting on Tuesday, March 9th, from 5 to 7 p.m. via Zoom. A flyer with information about the Virtual Public Meeting for the Richmond Crater Hazard Mitigation Plan Update is attached and also available here. Please share the message below with your constituents.

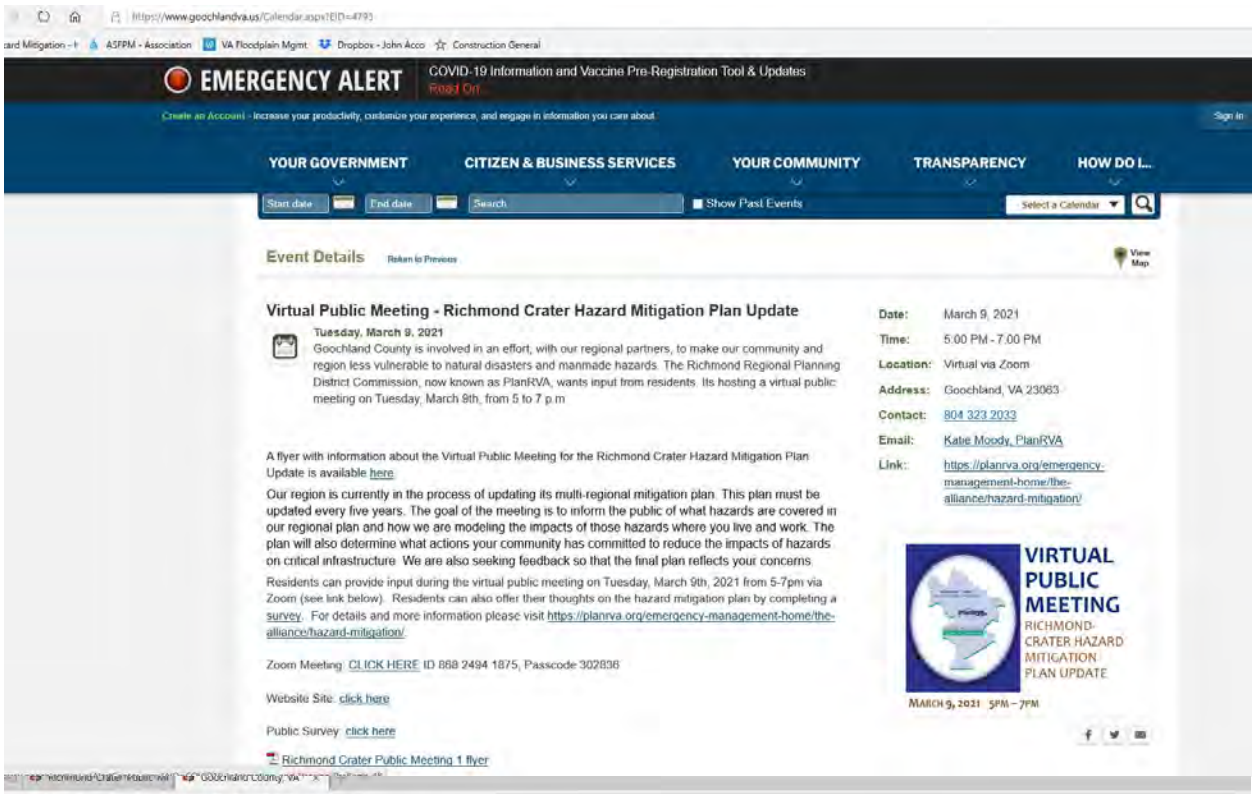

Virtual Public Meeting – March 9th – Richmond Crater Hazard Mitigation Plan Update

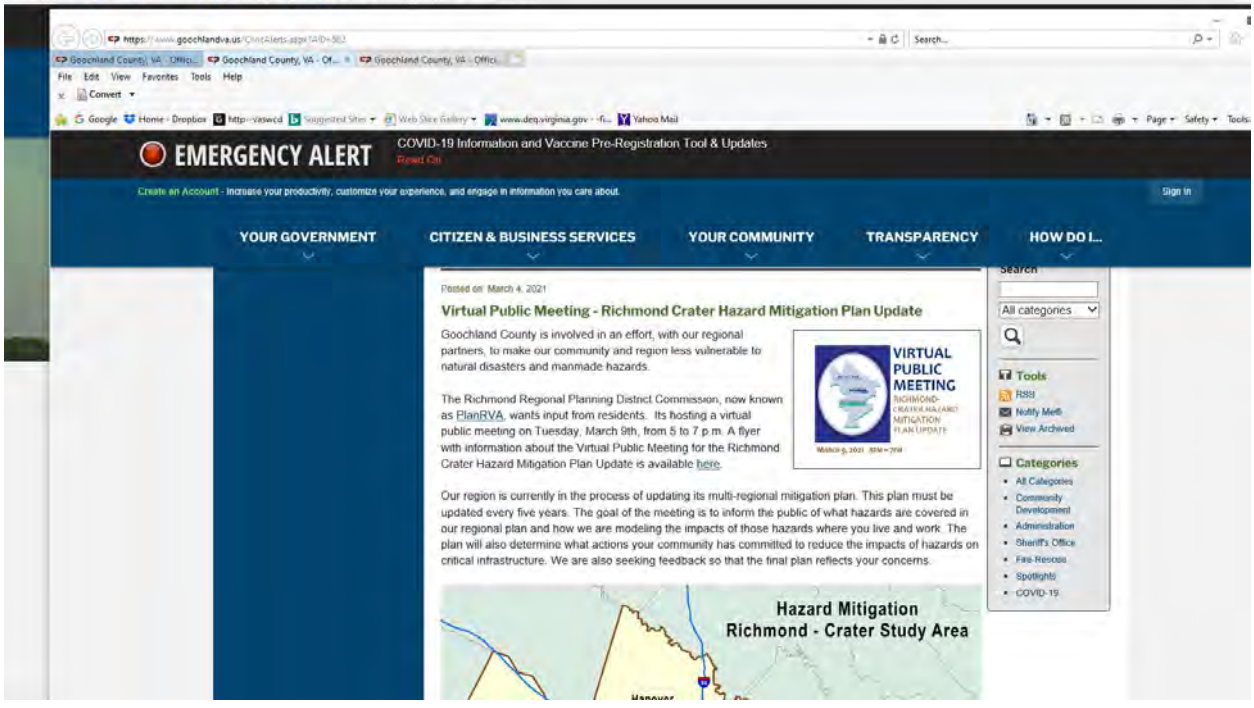

Goochland County is involved in an effort, with our regional partners, to make our community and region less vulnerable to natural disasters and manmade hazards. The Richmond Regional Planning District Commission, now known as PlanRVA, wants input from residents. Its hosting a virtual public meeting on Tuesday, March 9th, from 5 to 7 p.m. A flyer with information about the Virtual Public Meeting for the Richmond Crater Hazard Mitigation Plan Update is attached and also available here.

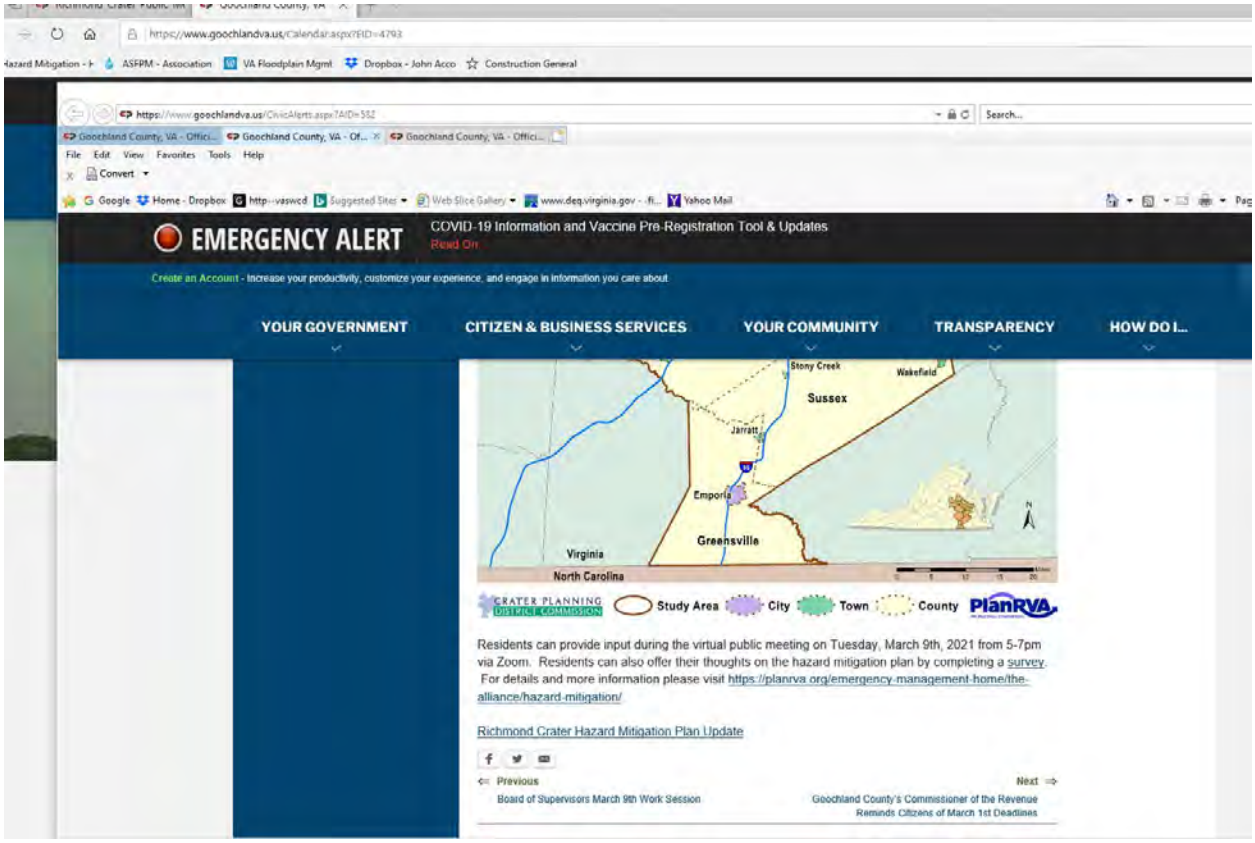

Our region is currently in the process of updating its multi-regional mitigation plan. This plan must be updated every five years. The goal of the meeting is to inform the public of what hazards are covered in our regional plan and how we are modeling the impacts of those hazards where you live and work. The plan will also determine what actions your community has committed to reduce the impacts of hazards on critical infrastructure. We are also seeking feedback so that the final plan reflects your concerns.

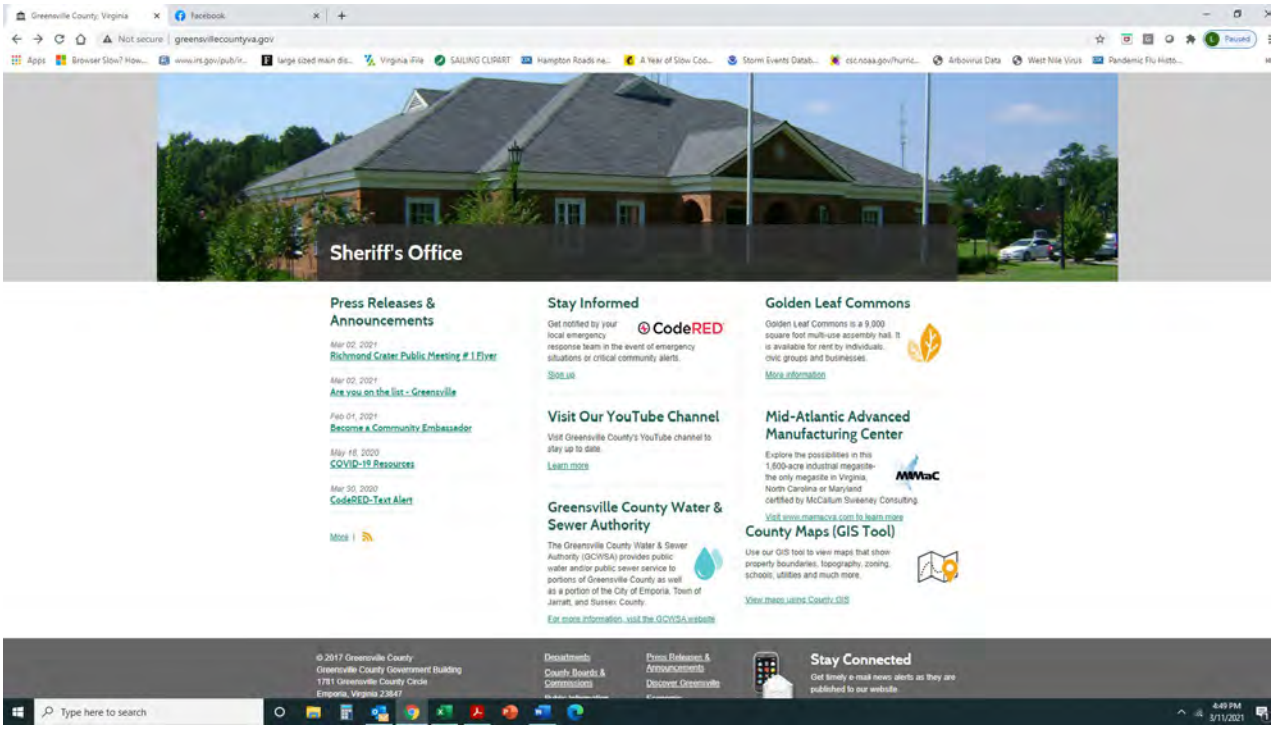

Residents can provide input during the virtual public meeting on Tuesday, March 9th, 2021 from 5-7 p.m. via Zoom. Residents can also offer their thoughts on the hazard mitigation plan by completing a survey. For details and more information please visit https://planrva.org/emergency-management-home/the-alliance/hazard-mitigation/.

Richmond-Crater
Hazard Mitigation Plan Update

Workshop #1 Minutes

June 21, 2021 – Virtual Meeting via Zoom

AGENDA

- Introductions
- Status Update
- Community Exposure
- Natural Hazards Summary
    - Tropical Storms
    - Tornadoes
    - Radon Exposure
    - Pandemic Flu
    - Winter Weather
    - Wildfire
    - Extreme heat
    - Coastal & Shoreline Erosion
    - Flooding and Impoundment Failure
- Ranking the Hazards (Exercise & Discussion)

MEETING NOTES

- Winter Storm of 1/31/21 – 2/3/21 not shown. Additional storm on Valentine's Day not mentioned; committee invited to submit additional data for any events not mentioned.
- Structures in 100-year floodplain (slide 86) looks high; later determined that HAZUS was run for all structures even if only parcel was in 100-year floodplain. Question about whether model was run with County's floodplain layer, as well. (Additional coordination with Wood and County is required.)
- After Radon briefing, one committee member raised questions about whether this hazard was appropriate for the hazard mitigation plan. Additional coordination with Steering Committee is ongoing.
- Anne Witt recommended keeping landslide as a separate hazard; she'll provide additional data
- Discussion regarding whether Thunderstorms/Lightning is a hazard that should remain in the plan.
- Committee discussed having a Wind Hazard that includes Tropical Storms, Derechos and Nor'easters. Plan will be revised accordingly.
- Poll taken regarding how community leaders and other stakeholders would choose to spend mitigation money:

1. On which hazard would you advise your community leaders to spend your $1,000,000? Flooding – 17; Coastal/Shoreline Erosion – 2; Pandemic Flu – 2; Drought/Extreme Heat – 1; Tropical Storms – 1
2. On which hazards would you advise your community leaders spend the next $500,000? (choose up to two)

Subject: ***Richmond-Crater Hazard Mitigation Plan Update - Workshop #1***

Importance: High

Good morning, everyone!

Workshop 1 - A Briefing on the Richmond-Crater Hazard Identification and Risk Assessment portion of the updated Hazard Mitigation Plan will be held **June 21 from 2:00 to 4:00PM** via ZOOM. A calendar appointment for the meeting will follow this email.

Who should attend workshops?

- If you haven't already**, each community must designate 2 committee staff participants, at least one of whom must attend each planning workshop**.
- We need a variety of staff disciplines represented from the region as a whole, including: building dept/code officials, engineering, land use planning/zoning, public works, emergency management/public safety, public information, environmental protection/public health, parks/recreation, elected official or CEO, housing/community development. Additional staff may wish to attend and be involved in the planning process; this is encouraged!
- Stakeholders: via this email, we are inviting a variety of stakeholders including several state and Federal agency reps, other PDCs, adjacent communities, Indian tribal leaders, non-profits and others to participate. Representatives of other stakeholders, such as developers and contractors, civic groups, environmental organizations, academia, major employers, professional organizations (ie, realtors, lenders, home builders) and staff from other governmental agencies, such as a housing authority, are welcome. Confer with your PDC to prevent duplicate invites. **CRS communities should give this careful consideration as points are available for increased numbers of stakeholder participation.**
- The meetings are open to the public, but please advise interested persons that **these are working meetings and not presentations**. We are not heavily advertising beyond the web site.

Please note that we will hold **Public Meeting #2 on June 28 at 5pm**, also via Zoom, and it will also be a shorter briefing on the same topic. I will send you the advertising materials, Zoom link and calendar invite in a separate email for your use.

Who should attend public meetings?

- Anyone can attend. Property owners, business owners, students, renters, etc.
- A community representative should always plan to attend in case questions or important topics come up from members of the public.

I hope you'll make plans to attend this very important workshop on June 21 – it's a critical step in the mitigation planning process.

Richmond-Crater
Hazard Mitigation Plan Update

Public Meeting #2 Minutes

June 28, 2021 – Virtual Meeting via Zoom

AGENDA

- Introductions
- Status Update
- Community Exposure & Social Vulnerability
- Natural Hazards Summary
    - Flooding and Impoundment Failure
    - Tropical Storms
    - Tornadoes
    - Radon Exposure
    - Pandemic Flu
    - Winter Weather
    - Wildfire
    - Mass Movement
- Ranking the Hazards (Discussion)
- Next Steps & Schedule

MEETING NOTES

- Spent some time discussing and answering questions about the National Risk Index
- Question about Wilcox Lake Dam not being on the Social Vulnerability overlay for dams; follow-up required
- Question about Falling Lake Dam
- Discussion about inclusion of Radon Exposure in the final hazard mitigation plan. Discussed [in]ability to include additional detail and mapping regarding vulnerability.

ATTENDEES

Katie Moody, PlanRVA
Scott Cary
Sarah Stewart, PlanRVA
Amanda Weaver, VDEM R1
Tim Blumenschine, City of Colonial Heights
Anne Witt, VA DMME
Joshua Airaghi, New Kent County Director of Environmental Programs
scott.cary@fujifilm.com Plant Manager
Nancy Williams:Citizen from Henrico
Kevin Kiddy, City of Colonial Heights
Surani Olsen, City of Richmond
Darryl E. Walker, City of Petersburg
Cathy Harrison, Chesterfield County
Rebekah Cazares, PlanRVA
Denise Nelson, Chesterfield County resident
Kajal Kapur, Principal, Kapur Energy Environment Economics, LLC
Jessica Phillips: Jessica Phillips, Environmental Director, Chickahominy Indian Tribe- Eastern Division

INVITEES
Email invitations were issued to each of the individuals shown on the following email invite dated 6/8/21, with followup on 6/11/21. In addition, each primary contact for the communities forwarded the message and made additional phone calls to their staff and interested persons.

The PDCs paid for the following advertisements as well:

Importance: High

Flag Status: Flagged

Hello again!

I mentioned last week that I would soon be in touch about the next Public Meeting as well.

Richmond-Crater Hazard Mitigation Plan Update
Public Meeting #2 (virtual via Zoom)
June 28, 2021, 5pm to 6pm

A flyer is attached that I recommend you use to publicize the meeting as much as possible. Once, again, I'll need each community to provide me with evidence of those postings, whether they be screenshots, photos, or other. The PDCs will post info on their web site, but I encourage you to work with your PIO or other communications guru to post info about this meeting widely. Use your community Facebook page, Twitter feed, or Instagram site to post the flyer and a picture. **Please, remember to advertise it in the same way you advertise Council or other Board meetings. Keep records!**

CRS communities need to publicize it in at least 2 methods in addition to the PDC publication.

I'll follow up this email with an Outlook Calendar item.

I recommend that at least 1 representative from each community attend the Public Meeting.

Thanks everyone, and please note my new email address below. I look forward to seeing you all in the weeks ahead and sharing what I've learned!

NOTICE FOR PUBLIC COMMENT
AND PARTICIPATION

PlanRVA and Crater PDC announce opportunity for public comment and participation regarding the Richmond- Crater Hazard Mitigation Plan Update. Participating communities include: Charles City County, Chesterfield County, Dinwiddie County, Goochland County, Greensville County, Hanover County, Henrico County, New Kent County, Powhatan County, Prince George County, Sussex County, the towns of Ashland, Claremont, Jarratt, McKenney, Stony Creek, Wakefield, Waverly, and Surry and the cities of Colonial Heights, Emporia, Hopewell, Petersburg, and Richmond.

A virtual public meeting will be held from 5PM – 6PM on Monday, June 28, 2021. The meeting will review preliminary results of the Hazard Identification and Risk Assessment conducted for the Richmond-Crater region. Find out which individual hazards pose the biggest threat to your neighborhood and provide feedback, so the final hazard mitigation plan actions reflect your concerns.

Comments may be sent in advance of the meeting to leigh.morgan. chapman@gmail.com

Pre-registration for the meeting is

Richmond-Crater
Hazard Mitigation Plan Update

Workshop #2 Minutes

October 15, 2021 – Virtual Meeting via Zoom

AGENDA

- Introductions
- Status Update
- Brainstorming Mitigation and Community Future Goals
- Goals and Objectives from Other Plans
- Examining the Plans Existing Goals and Objectives
- Examining Capabilities
- Next Steps and Schedule

MEETING NOTES

- The group reviewed each of the existing plan's mitigation goals, as well as contractor-proposed goals and objectives to simplify and refocus the goals on mitigation
- Existing Goal 1 was deleted
- Existing Goal 2 was drastically shortened and then modified (new Goal 1) to focus on protecting the whole community equitably. Objectives that touched on staff capability, outreach, mitigation successes and equity were added to echo what was in the previous goal and to better capture the social justice component of the updated plan.
- Existing Goal 3 became new Goal 2, and was shortened to focus specifically on partnerships. Objectives were created and modified to indicate how those partnerships might work.
- Elements of existing Goals 4 and 5 were combined into new Goal 3 that concentrates on government practices to support health, safety and welfare of citizens. Objectives were added to identify specific practices regarding maintaining community "fabric", long-term housing and continuity of services during hazard event recovery.
- Existing Goal 6 was deleted as it relates to new Goal 3.
- Goal 7 was modified into new Goal 4 regarding protecting critical infrastructure. Objectives focus on information and intelligence sharing, collaboration on utility management, and maintaining/upgrading high hazard dams.

Subject:	**Hazard Mitigation Workshop & HIRA Available for Review**

Good Afternoon All,

This is a friendly reminder that we will have a **Hazard Mitigation Workshop** on **Friday (10/15) starting at 10:00AM on Zoom**. We will discuss goals and objectives for the plan update. I've included the information to join the meeting below. You'll also find it in the calendar appointment for Friday. **CRS Localities** – It is important that your community have **at least 2 representatives attend the Workshop**!

The **DRAFT** **Hazard Identification and Risk Assessment (HIRA)** for the plan update is **available for review**! You can find it posted to SharePoint –> Documents -> Plan Drafts
Here is a link to the SharePoint: https://richmondregional.sharepoint.com/sites/HazardMitigation

To join Friday's meeting:

Join Zoom Meeting
https://planrva-org.zoom.us/j/85946576316?pwd=TUs2am9UK2phMGs3b0JlVTVQbm1sZz09

Meeting ID: 859 4657 6316
Passcode: 053779

Let us know if you have any questions or issues accessing SharePoint. We look forward to seeing you on Friday!

Richmond-Crater
Hazard Mitigation Plan Update

Workshop #3 Minutes

November 23, 2021 – Virtual Meeting via Zoom

AGENDA

- Introductions
- Status Update
- Types of Mitigation Strategies:
    - Prevention
    - Property Protection
    - Natural Resource Protection
    - Structural Projects
    - Emergency Services
    - Public Education & Awareness
- STAPLEE Evaluation
- Reconsideration of Existing Regional Mitigation Actions
- Discussion of Suggested New Regional Mitigation Actions
- Suggested Reading Materials
- In-Person Office Hours Scheduling
- Next Steps and Schedule

MEETING NOTES

- The group discussed existing mitigation actions and decided to delete 1, 4 and 5. Actions 2 and 5 were edited slightly. Many of the actions focus on data collections and cross purposing various plans at the regional level.
- Suggested new mitigation actions from the consultant were discussed and incorporated. Many of these actions center on ways in which the PDCs can assist communities with outreach, dam safety and CRS/NFIP repetitive flood loss information management.
- Format and scheduling for the In person Office Hours was discussed and each community was asked to sign up for an hour to meet with consultant to review community capabilities and mitigation actions in detail

ATTENDEES

Name	Agency
Kristin Owen	Henrico County
Heather Barrar	Friends of the Lower Appomattox River (FOLAR)
Danielle Curtis	Henrico County
Nicole Mueller	VDOT
Brandi Payne	City of Colonial Heights
Kathleen Hale	New Kent County
Rebekah Cazares	PlanRVA
Amanda Huskey	Greensville County
Brianne Fisher	City of Richmond
Troy Aronhalt	Ashland Police Department

Paul Drumwright	Paul Drumwright - Goochland County
Katie Moody	Katie Moody, PlanRVA
Joanne Williams	City of Petersburg
Tiffany Dubinsky	DRPT
Jeremey Falkenau	VDOF
Frank Hopkins	Powhatan
Heather Dowling	VDOF
Angela Davis	DCR
Michael Poarch	Sussex County
Rashaunda Lanier-Jackson	PlanRVA
Tony Williams	Mobility Program Mgr, Senior Connections, CAAA
Mark Kilgore	DCR Dam Safety
Michelle Hamor	U.S. Army Corps of Engineers
Amanda Weaver	VDEM R1
Christopher Workman	Chesterfield County
Mike Dieter	Hanover County
John Fitzgerald	Richmond Airport
Dana Adkins	Chickahominy Indian Tribe
Alex Mease	Hanover County
Jen Cobb	Henrico
Julie Walton	Prince George County
Brian Laine	Wakefield Va
Kevin Kiddy	City of Colonial Heights
Donald Hunter	EM Prince George
Darryl E. Walker	City of Petersburg
Kevin Kiddy	City of Colonial Heights
Reggie Tabor	City of Petersburg
Cynthia Boone	City of Petersburg
Ron Svejkovsky	TCAMPO
Lin Pope	Greensville County
Leigh Chapman	Salter's Creek Consulting
Sarah Stewart	PlanRVA

Please join us on **Tuesday November 23 from 10:00 to 11:00 AM for a Hazard Mitigation Plan Update Workshop** focused on **general mitigation action planning**.

CRS Localities – It is important that your community have **at least 2 representatives attend the Workshop**!

As Leigh Chapman mentioned during our last workshop, we are transitioning to a focus on mitigation action planning. We will start with this one hour Zoom meeting at which we will

discuss general advice for planning local mitigation actions. We can also discuss options for regional mitigation actions. **Following the general mitigation action workshop, localities will be invited to make an appointment during "office hours" with Leigh Chapman to discuss specific mitigation actions for their community** to be included in the plan update. Leigh will station herself at a few locations around the Richmond & Crater regions for in-person appointments with locality staff teams. More information about these Office Hour Appointments will be coming soon.

Richmond-Crater
Hazard Mitigation Plan Update

Public Meeting #3 Minutes

March 16, 2022 – Virtual Meeting via Zoom

AGENDA

- Introductions
- Status Update
- HIRA Highlights & Conclusions
- Review of Planning Goals
- Review of Mitigation Action Planning Process
- Review of Regional Mitigation Action Plan
- Open Forum to Discuss Mitigation Action Plan for Citizens at Meeting
- Next Steps & Schedule
- Opportunities for Input

MEETING NOTES

- Jim Kaste questioned the appropriateness of the subdividing non-critical hazards into Low and Negligible, especially with regard to dam failure and radon exposure. The language diminishes the Negligible hazards too much and perhaps negates their value in the mitigation action planning process. Scott Sleeman pointed out the FEMA definition of Negligible. The group discussed reconsidering the terminology and the plan consultant will look into the FEMA requirements and reassess.
- Pam Castelle asked about the ways in which the communities can ensure that the mitigation action plan is shared with private businesses, especially in more rural areas of the study region. Discussion ensued with the PDCs taking the lead on how the plan would be implemented and the opportunities for private businesses to become involved.0

Subject: *Public Review Draft & Public Meeting - Richmond-Crater Hazard Mitigation Plan

Hello All,
Don't forget about the **public meeting this afternoon at 4:00**. If you haven't already registered, here is a registration link: https://planrva-org.zoom.us/meeting/register/tZcldе6tpzwpH9K09i0RRdGPBkYhmQEEOS_h

A draft for public review has been posted to SharePoint and to the PlanRVA website.
On SharePoint (https://richmondregional.sharepoint.com/sites/HazardMitigation) look under Documents – Plan Drafts. Here is a link that should take you directly to it - PUBLIC COMMENT DRAFT 2022 Richmond Crater Hazard Mitigation Plan 031422.pdf

Here is the direct link to the PDF on the PlanRVA site. https://planrva.org/wp-content/uploads/PUBLIC-COMMENT-DRAFT-2022-Richmond-Crater-Hazard-Mitigation-Plan-031422.pdf You can also navigate to it from a link in the right sidebar of the Hazard Mitigation page.

Please take a look at the document and send any additional edits you have to Leigh Chapman at leigh.morgan.chapman@gmail.com .

Thank you,
Sarah

Subject: **Richmond-Crater Hazard Mitigation Public Meeting & Next Steps

Hello All,
This is a friendly reminder about the upcoming Hazard Mitigation Public Meeting on 3/16 at 4:00 on Zoom.

Locality Staff - It's very important that you post information about this public meeting! Spread the word! Facebook or other forms of social media are options as well as virtual newsletters and physical postings on community bulletin boards. Feel free to share a Facebook post PlanRVA made on 3/1. We plan to do one more post before the meeting.

We need copies of public notices or pictures (or screenshots) of the postings. You can add pictures to this folder on the SharePoint site: Public Meeting #3 March 16, 2022 . You can navigate to it by going to the Hazard Mitigation SharePoint site (https://richmondregional.sharepoint.com/sites/HazardMitigation) and then navigating to Documents -> Public Meeting #3 March 16, 2022.

As a reminder, **you will need to register for the meeting. Here is the link to register**: https://planrva-org.zoom.us/meeting/register/tZcldе6tpzwpH9K09i0RRdGPBkYhmQEEOS_h

Thank you!

-Sarah

Subject: *Richmond-Crater Hazard Mitigation Public Meeting & Next Steps

Good Afternoon All,

A few updates for you:

Public Meeting

We have scheduled a public meeting for the update of the Richmond-Crater Hazard Mitigation Plan for **March 16, from 4:00 – 6:00 pm**. The meeting will be via Zoom, registration is required. The meeting will focus on the mitigation actions Feel free to use the attached PDF to spread the word. We will be adding this information to the PlanRVA calendar soon and will also share to the PlanRVA Facebook page.

All Localities, especially CRS Loclaities – It is really important that you share/post information about this public meeting in at least one medium. The more the better. **CRS Localities need to do this to get credit.**
In a few minutes I will send out a calendar invitation to all of you as well as other stakeholders of the plan with a link to register.

Mitigation Action Edits

Thanks to those who have submitted mitigation action edits. Leigh is working to incorporate what she received into a full Plan draft that you will see early next week. If you haven't yet submitted edits, or have more comments to submit, you can still submit those to Leigh!! We welcome improvements!

Full Draft Plan

As mentioned above, we will post a full drat plan for you all to review on a tight timeline. You will get a link to it early next week and have until the end of the week (2/25) to respond with comments or edits. Leigh will incorporate what comes in so that we can post a DRAFT version of the plan by March 1 online for the public to review. We will share a link to it posted on line as soon as we have it.
YES, we can edit the document after it is posted!!

Let me know if you have any questions!

-Sarah

GOOCHLAND COUNTY

GOOCHLAND COUNTY
PLANNING COMMISSION
2021/2022 MEETING SCHEDULE

The Planning Commission's regularly scheduled meetings begin at 7:00 p.m. in Board Meeting Room 235, Goochland County Administration Building, 1800 Sandy Hook Road Goochland, VA 23063. A workshop is usually held immediately prior to regular meetings beginning at 6:30 p.m. or 6:45 p.m., as advertised on the agenda.

May 6, 2021
June 3, 2021
July 8, 2021*
August 5, 2021
September 2, 2021
October 7, 2021
November 4, 2021
December 2, 2021
January 6, 2022
February 3, 2022
March 3, 2022
April 7, 2022

The regular monthly meeting is the first Thursday of every month, except for the meeting noted above with *.

Special called meetings and workshops may be held on an as needed basis.

If the Chair of the Commission, or the Vice-Chair (if the Chair is unable to act), finds and declares that weather or other conditions are such that it is hazardous for Commission members to attend a regular meeting of the Commission, then such regular meeting shall be held on the following Thursday. Such finding shall be communicated to the Commission members, the public, and the press as promptly as possible. All hearings and other matters previously advertised shall be conducted at the continued meeting without further advertisement pursuant to Va. Code § 15.2-2214.

RE: Crater Hazard Mitigation Plan

Dear Mr. Ruffa

In regards to the recent review of the Crater Hazard Mitigation Plan Greensville County had completed its review and provided our feedback as of February 10, 2022. The response was emailed to Sarah Stewart at SStewart@planrva.org and Leigh Chapman at leigh.morgan2@verizon.net. All information pertaining to Greensville County in that first draft was accurate as presented and we had no further comments.

Sincerely,

E. Lynn Parker
Greensville County Emergency Services Coordinator

Mayor Contacts for Hazard Mitigation

Town of Jarratt
Town of McKenney – Mayor at PM #1 (Dennis Hale from County)
Town of Surry – Ray Phelps
Town of Wakefield
Town of Waverly

Email Communication with Mayor Meagan Haire Abby McKenny Working with Dennis hale Dinwiddie

County June 7, 2022, 8:23AM and June 8, 2022, 2:51PM.

Calling Town of Surry (757) 294-3021

@2:55 PM June 8, 2022 – Left a Message to call the PDC. They are closed on Wednesdays. Thursday 8:30- 4:30PM

@12:17Pm June 9, 2022 _ Left Message to call PDC

@ 2:03PM June 9, 2022, Spoke with Town clerk and Mitigation 2 is OK, and they worked with Ray Phelps on actions. Comments for action one: stated that they really have no flood prone property or structures for part 1 and 2 because they are not in the flood plain. But that the rest of the mitigation strategy sounded adequate.

Calling Town of Jarrett (434) 535-8865

@3:00 PM June 8, 2022 – Number not in service?? New number 434-535-8013

Office hours Thursday 11-5, left message with the VM to call back

@11:18 AM June 9, 2022_ Jarrett Clerk Returned call and will have Mayor contact me by COB today

Calling Town of Wakefield (757) 899-2361

@3:07 PM June 8, 2022- Spoke with Clerk the original message went into spam on e-mail.

They will try and get us a response by Friday Monday June 13 at the latest.

Calling Town of Waverly (804)834-2330

@3:15PM June 8, 2022 – Spoke with clerk we had the wrong email resending actions to clerk and Mayor they will have a response back to us by weeks end. amcphaul@town.waverly.va.us, kmayes@town.waverly.va.us

@3:24 on June 10, 2022 _ Spoke with Mayor and she said they are Ok with the strategies in oplace and would like me to come to the Aug 9th meeting for adoption.

Subject: *DRAFT Mitigation Actions for Review*
Importance: High

Good Afternoon,
Leigh Chapman has posted a draft of the local and regional mitigation actions, Section 7, of the Richmond-Crater Hazard Mitigation Plan Update on the Hazard Mitigation SharePoint. This is the first opportunity to review them. There will be 2 more opportunities: (1) review of the complete plan by localities and stakeholders and (2) public review of the final document. We have a quick turnaround on this review so that we can incorporate edits and compile a complete draft plan document in a timely manner to allow for VDEM and FEMA review later on. For this review window, **please provide any comments or edits to Leigh (CC'd on this message) by end of day Thursday February 10**.
You can also navigate to the draft on the Hazard Mitigation SharePoint site by going under Documents -> Plan Drafts.

The most important thing is that you **review the actions for your community**. Below are the starting page numbers for each community. You are also welcome to look at actions for other communities and borrow good ideas you see.

Charles City County – page 7-31
Chesterfield County – page 7-36
City of Colonial Heights – page 7-54
Dinwiddie County – page 7-62
Town of McKenney – page 7-75
City of Emporia – page 7-81
Goochland County – page 7-90
Greensville County – page 7-100

Town of Jarratt – page 7-111
Hanover County – page 7-113
Town of Ashland – page 7-121
Henrico County – page 7-132
City of Hopewell – page 7-146
New Kent County – page 7-162
City of Petersburg – page 7-174
Powhatan County – page 7-189
Prince George County – page 7-197
City of Richmond – page 7-209
Town of Surry – page 7-236
Sussex County – page 7-239
Town of Stony Creek – page 7-254
Town of Wakefield – page 7-256
Town of Waverly – page 7-258

Thank you,
Sarah

APPENDIX E - REVIEW COMMENTS

This section of the Plan includes each of the written comments received from public, committee and stakeholder reviewers during the final public review of the plan, as well as a response from the primary consultant addressing each comment in detail.

1. Comment: 3/16/22, John Woodburn, P.E., Environmental Manager, Goochland County: Mitigation Action #10, on page 6-98, regarding the inspection of all non regulated dams and low hazard potential dams, should be removed as it is far too expansive. Instead, I propose that it be changed to support Virginia DCR in its efforts to bring all regulated dams into compliance with the Dam Safety Regulations.

Response: Corrected as requested.

2. Comment: 3/16/22, Beverly Walkup, Director of Planning, Sussex County**:** Michael Poarch (County Planner) and I have reviewed the plan and have the following comments:

1. Pg 4-25 - Under Section 4.6, Sussex County experienced a 10.4% population loss, not 104%.
2. Pg. 5-17 – Typo, 1st paragraph, Virginia Diner 4and, remove the "4".
3. Pg. 6-6 – Table, Inadequate zoning staff?? We are only lacking a Certified Flood Manager. Michael will be taking the next class offered. Otherwise, Zoning staff is adequate.
4. Pg. 6-15 – Under the Sussex County heading, the Pocahontas neighborhood is referenced. Pocahontas is a separate grant and is not related to the Urgent Need Grant in response to the 2016 tornado.
5. Pg. 6-19 – Table, Sussex has adopted a Floodplain Ordinance.
6. Pg. 6-26 – Under Chesapeake Bay Preservation Act, Sussex is not in the Chesapeake Bay Watershed.
7. Pg. 6-260 – Under Mitigation Action 13, site and location states Surry and needs to be corrected to state "Sussex'.

Response: Edits have been made to the text to address each of these comments.

3. Comment: 3/16/22, Jim Kaste, Professor of Geology, College of William & Mary: My general comment on the Hazard Mitigation Plan Update for the Richmond-Crater district is on Table 1.1. Setting aside my bias for supporting radon in the plan, I question the value of subdividing the yellow coded (Non-Critical) hazards into "Low" and "Negligible" in Table 1. I understand that you may feel compelled to use FEMA language, but I feel as though "negligible" diminishes these hazards (Impoundment failure, radon, landslides) a bit too much. A common definition of "negligible" is 'not worth considering'.

> From a geologic perspective, radon and landslides are both very relevant for this planning district. For example, following Tropical Storm Gaston in 2004 there were damaging landslides in Richmond (https://commons.wikimedia.org/wiki/File:Hurricane_Gaston_landslide_damage.jpg). The Virginia Department of Health categorizes several counties in this planning district as "high risk" for radon (https://www.vdh.virginia.gov/radiological-health/indoor-radon-program/epa-radon-risk-map-for-virginia/). Moreover, there are hundreds of impoundments in the planning district that could potentially cause flooding if they failed. I do agree that "sinkholes" might meet the definition of 'negligible risk'. From my perspective (admittedly I don't know as much about FEMA language as you do) I would suggest not sub-dividing the yellow coded hazards or shift to different language like "non-critical moderately low risk" and "non-critical low risk").

Response: We moved Radon Exposure and Impoundment Failure to Noncritical-Low Risk. We retitled the Negligible row to "Negligible Consequences". This is consistent with FEMA terminology and explains the risk slightly better. Regarding sinkholes and landslides, the history doesn't point to major events that have caused notable damage to infrastructure, houses, or people. Are they possible? Yes, but we expect negligible consequences, or no long-term impacts. We edited Table 1.1 and Table 5.47 to reflect these changes, and we edited Table 7.5 to add Impoundment Failure and Radon Exposure and notations about mitigation actions related to those hazards.

4. Comment: 3/17/22, Dennis Hale, Chief of Fire & EMS, Dinwiddie County:

1. Page 4-11 It currently states 83% drains to the James River Basin that should read 83 % drains to Chowan River Basin I believe.

2. Page 4-33 Our largest employer is listed as Walmart I think it would be better if it said Walmart Distribution Center. Walmart does not have any other assets here other than the DC and that makes it match up to the Amazon Fulfillment Center further down the list.

3. Page 6-67 In the list of private water systems, we have Lou Jones and it is actually spelled Lew Jones Village.

Response: Edits have been made to the text to address each of these comments.

5. Comment: 3/28/22, Chris Bast, Henrico Resident: I am pleased to see the strong focus on climate change through addressing the impacts of climate change on each of the identified hazards. We must recognize that climate change will affect the scale and scope of many future threats and will increase both the long-term stressors and immediate shocks that we must prepare for. At Virginia DEQ, for example, this has meant shifting from historical rainfall models to predictive rainfall models. A simple change such as that can save lives and help our systems be better prepared for the future.

Response: Thank you.

6. Comment: 4/22/22, John Woodburn, PE, Environmental Manager, Goochland County: Table 4.1 on Page 4-26 shows a percent change in population for Goochland County of -13.86% from 2010 to 2020. This is clearly wrong – Goochland's population grew from 2010 to 2020. It probably is just an incorrect minus sign in front of the number (I.E – it should be 13.86%, not -13.86%).

Response: Data in table was reviewed and corrected.

7. Comment: 4/22/22, John Woodburn, PE, Environmental Manager, Goochland County: page 5-9 indicates there is a single essential facility in Goochland County located in the 100-year floodplain. Can you tell me what facility it is and where it is located?

Response: The James River Correction Center at State Route 645 shows up as being located in the 100-year floodplain.

8. Comment: 5/11/22, Kate Hale, Deputy Emergency Management Coordinator, New Kent County: County requested changes to mitigation action items 1, 2, 4, 5, 7, 8, 11 and 12.

Response: Suggested changes were reviewed, and after additional consultation with Ms. Hale, minor adjustments the action plan were made that are expected to satisfy FEMA requirements and county officials.

VDEM Review Comments, Amanda Weaver, All Hazards Planner – R1 and Chris Bruce, All Hazards Planner – R5, June 2, 2022

6. Comment: A1: Section 3.5 discusses Community-Specific meetings but there is no documentation of which localities participated, personnel that participated, and what was discussed.

Response: This section was substantially revised to add details of the meetings including location, dates, and attendees.

7. Comment: A1: How did the town of Surry participate in the update process? They are not listed in the attendees of any of the meetings. (This may apply to other towns as well)

Response: As a result of this question and similar issues with the 2022 Hampton Roads Hazard Mitigation Plan, planners reached out to the towns involved in this plan and attempted to garner additional input. The results of that effort in June 2022 are documented on in Section 3.5 under Community-Specific Working Group Meetings.

8. Comment: Criterion A.2.b: Some of the stakeholders' positions/titles in Table 3.2 are missing, please revise to reflect these. Additionally, some of the information in Section 3.7 that identifies the tribes chose not to participate in the planning process conflicts with the information in Tale 3.2 and Appendix C that indicates they did attend planning and public meetings.

Response: Tables 3.2a and 3.2b were revised to include positions/titles of all stakeholders.

9. Comment: HHPD1: Consider if there are High Hazard Dams outside of the study area that might need to be considered in the impoundment failure narrative, i.e. Lake Anna Dam

Response: Section 5.5 has been substantially revised to include recommended language from the Lead Dam Safety Engineer at DCR, and in response to this comment. A list of high hazard dams in adjacent/upstream counties is included in the plan and the reader is directed to DCR or the USACE NID for additional data and reports on those dams.

Note: All General Suggestions provided by these reviewers were reviewed and incorporated to the maximum extent possible.

FEMA Review Comments, Shannon Burke, Community Planner, July 14, 2022
10. Comment: The plan does not demonstrate that Greensville County and the Towns of Waverly and Surry participated in the planning process. Page 10 discusses that Working Groups met outside of the official planning process and that additional activities took place through emails and phone calls. If these activities included Greenville County and the Towns of Waverly and Surry, the plan must state this.

Surry County (Melissa Rollins) participated in the Hampton Roads Hazard Mitigation Plan (HMP) but is listed as a participant in this plan in the list of participants in Section A-15 of this Local Plan Review Tool. The county represented the Towns of Claremont and Dendron in the Hampton Roads HMP and can only participate in one plan. The county should be removed as a participant from this plan.

Recommended Revisions: The plan does not include a table of contents and the formatting is off and doesn't match Section 2, "Organization of the Plan." For better readability, correct the subheadings in the Executive Summary to ensure they match the plan contents and include the Table of Contents in the final plan. Check the final plan to ensure consistency of formatting.

Response: Beginning on page 20, the plan provides details on the extra meetings and other reviews by participating jurisdictions. Pages 21 and 22 provide additional paragraphs on Waverly's and Surry's inputs, and a new paragraph for Greensville County has been added to page 22. Surry County was inadvertently included in Section A-15 of the Local Plan Review Tool, but has now been removed. A Table of Contents has been added to the beginning of the document. Section 2.3 was edited to better reflect plan structure.

APPENDIX F – HAZARD HISTORIES

This section of the Plan includes tables with hazard histories prior to 2011.

TABLE F-2 NCEI FLOOD HISTORY

COUNTY OR CITY	LOCATION	DATE	FLOOD TYPE	DEATHS	INJURIES	PROPERTY DAMAGE	CROP DAMAGE	NARRATIVE
CHARLES CITY COUNTY	CHARLES CITY	8/4/2000	Flash Flood	0	0	$ -	$ -	Heavy rain caused flooding at Route 607 and Church Lane near Adkins Store.
CHARLES CITY COUNTY	EAST PORTION	9/1/2000	Flash Flood	0	0	$ -	$ -	Several flooded roads across eastern half of county.
CHARLES CITY COUNTY	WEST PORTION	8/30/2004	Flash Flood	0	0	$ -	$ -	Rainfall amounts between 4 and 8 inches resulted in numerous road closures due to flooding.
CHESTERFIELD COUNTY	MIDLOTHIAN	1/19/1996	Flood	0	0	$ -	$ -	Street flooding in Richmond/portions of Chesterfield county. Few roads closed temporarily.
CHESTERFIELD COUNTY	COUNTYWIDE	9/16/1999	Flash Flood	0	0	$ 3,000,000	$ 50,000	Very heavy rain from Hurricane Floyd produced widespread flooding and flash flooding across much of central and eastern Virginia, and northeast North Carolina. Rainfall amounts generally ranged from near 7 inches from eastern Caroline county to Richmond City to Brunswick, Lunenburg and Mecklenburg counties, to 12 to 18 inches in much of the Virginia Tidewater. Numerous roads were washed out due to flooding. Many areas normally prone only to flooding of poor drainage and low lying areas experienced significant flash flooding. Primary routes out of service included US 460 near Wakefield, US 58 near Emporia and Franklin, and Interstate 95 south of Petersburg to Emporia. River flooding was extensive and prolonged in the Chowan River Basin. The Blackwater, Meherrin and Nottoway Rivers exceeded flood stage. Water levels in the city of Franklin were estimated to be several feet above the flood of record which occurred in August 1940. The flooding was considered to be a 500 year flood of record. Also, there were enormous agricultural/crop losses due to the flooding.
CHESTERFIELD COUNTY	BEACH	7/19/2000	Flash Flood	0	0	$ -	$ -	Heavy rain caused flooding and road closure of Bellson Park Drive at Route 360 near Brandermill.
CHESTERFIELD COUNTY	CHESTERFIELD	8/4/2000	Flash Flood	0	0	$ -	$ -	Heavy rain caused high standing water and closure of Hull Street at Courthouse Road in Chesterfield.
CHESTERFIELD COUNTY	CHESTERFIELD	6/1/2001	Flash Flood	0	0	$ -	$ -	Several roads closed.
CHESTERFIELD COUNTY	COUNTYWIDE	5/26/2003	Flash Flood	0	0	$ -	$ -	20 road closures countywide.
CHESTERFIELD COUNTY	MIDLOTHIAN	7/27/2004	Flash Flood	0	0	$ -	$ -	Street flooding on Hull Street and Genito Road.
CHESTERFIELD COUNTY	CHESTERFIELD	8/1/2004	Flash Flood	0	0	$ -	$ -	Clover Leaf Lakes Apartments on Starview Court evacuated due to high water of 4 to 4.5 feet.
CHESTERFIELD COUNTY	COUNTYWIDE	8/30/2004	Flash Flood	1	0	$ 2,000,000	$ -	Rainfall amounts between 4 and 8 inches resulted in numerous road closures due to flooding.
CHESTERFIELD COUNTY	BELLWOOD	6/23/2006	Flash Flood	0	0	$ -	$ -	Flash flooding caused the closure of Hopkins Road in the Beulah District.
CHESTERFIELD COUNTY	MIDLOTHIAN	7/5/2006	Flash Flood	0	0	$ -	$ -	Flooding on Route 288.
CHESTERFIELD COUNTY	BELLBLUFF	10/7/2006	Flash Flood	0	0	$ 60,000	$ -	Numerous roads closures to high water including Beulah Road.
CHESTERFIELD COUNTY	BEACH	8/17/2007	Flash Flood	0	0	$ -	$ -	Numerous roads were closed county wide.
CHESTERFIELD COUNTY	BELLBLUFF	8/17/2007	Flash Flood	0	0	$ -	$ -	One person had to be rescued from a car on Hopkins Road due to high water.
CHESTERFIELD COUNTY	MIDLOTHIAN	8/28/2008	Flash Flood	0	0	$ -	$ -	Numerous roads were closed due to high water or debris in the road across much of north central Chesterfield county.

COLONIAL HEIGHTS	COLONIAL HGTS	9/16/1999	Flash Flood	0	0	$ 1,200,000	$ -	Very heavy rain from Hurricane Floyd produced widespread flooding and flash flooding across much of central and eastern Virginia, and northeast North Carolina. Rainfall amounts generally ranged from near 7 inches from eastern Caroline county to Richmond City to Brunswick, Lunenburg and Mecklenburg counties, to 12 to 18 inches in much of the Virginia Tidewater. Numerous roads were washed out due to flooding. Many areas normally prone only to flooding of poor drainage and low lying areas experienced significant flash flooding. Primary routes out of service included US 460 near Wakefield, US 58 near Emporia and Franklin, and Interstate 95 south of Petersburg to Emporia. River flooding was extensive and prolonged in the Chowan River Basin. The Blackwater, Meherrin and Nottoway Rivers exceeded flood stage. Water levels in the city of Franklin were estimated to be several feet above the flood of record which occurred in August 1940. The flooding was considered to be a 500 year flood of record. Also, there were enormous agricultural/crop losses due to the flooding.
COLONIAL HEIGHTS	COLONIAL HGTS	5/26/2003	Flash Flood	0	0	$ -	$ -	Flooding along Old Town Creek which closed New Castle Drive. Flooding at the Hampton Court Housing Complex.
DINWIDDIE COUNTY	SUTHERLAND	10/18/1996	Flash Flood	0	0	$ -	$ -	Four to five inches of rain occurred within 6 hours between Sutherland, Dinwiddie, and McKenney. Several roads were closed due to high water including parts of Route 460.
DINWIDDIE COUNTY	COUNTYWIDE	9/16/1999	Flash Flood	0	0	$ 870,000	$ 420,000	Very heavy rain from Hurricane Floyd produced widespread flooding and flash flooding across much of central and eastern Virginia, and northeast North Carolina. Rainfall amounts generally ranged from near 7 inches from eastern Caroline county to Richmond City to Brunswick, Lunenburg and Mecklenburg counties, to 12 to 18 inches in much of the Virginia Tidewater. Numerous roads were washed out due to flooding. Many areas normally prone only to flooding of poor drainage and low lying areas experienced significant flash flooding. Primary routes out of service included US 460 near Wakefield, US 58 near Emporia and Franklin, and Interstate 95 south of Petersburg to Emporia. River flooding was extensive and prolonged in the Chowan River Basin. The Blackwater, Meherrin and Nottoway Rivers exceeded flood stage. Water levels in the city of Franklin were estimated to be several feet above the flood of record which occurred in August 1940. The flooding was considered to be a 500 year flood of record. Also, there were enormous agricultural/crop losses due to the flooding.
DINWIDDIE COUNTY	COUNTYWIDE	4/17/2000	Flash Flood	0	0	$ 20,000	$ -	Walker Mill Road washed out near the county line. Highway U.S. 1 also impassible due to high water west of Petersburg. County road 651 caved in due to rapid runoff.
DINWIDDIE COUNTY	DINWIDDIE	5/26/2003	Flash Flood	0	0	$ -	$ -	White Oak Road collapsed due to flooding.
DINWIDDIE COUNTY	COUNTYWIDE	8/30/2004	Flash Flood	1	0	$ 2,000,000	$ -	Rainfall amounts between 4 and 8 inches resulted in numerous road closures due to flooding.
DINWIDDIE COUNTY	FORD	9/1/2006	Flash Flood	0	0	$ -	$ -	Route 624 from Route 460 to Route 613 flooded.
DINWIDDIE COUNTY	CARSON	10/7/2006	Flash Flood	0	0	$ 11,000	$ -	Numerous roads closed.

EMPORIA	EMPORIA	9/16/1999	Flash Flood	0	0	$ 195,000	$ 55,000	Very heavy rain from Hurricane Floyd produced widespread flooding and flash flooding across much of central and eastern Virginia, and northeast North Carolina. Rainfall amounts generally ranged from near 7 inches from eastern Caroline county to Richmond City to Brunswick, Lunenburg and Mecklenburg counties, to 12 to 18 inches in much of the Virginia Tidewater. Numerous roads were washed out due to flooding. Many areas normally prone only to flooding of poor drainage and low lying areas experienced significant flash flooding. Primary routes out of service included US 460 near Wakefield, US 58 near Emporia and Franklin, and Interstate 95 south of Petersburg to Emporia. River flooding was extensive and prolonged in the Chowan River Basin. The Blackwater, Meherrin and Nottoway Rivers exceeded flood stage. Water levels in the city of Franklin were estimated to be several feet above the flood of record which occurred in August 1940. The flooding was considered to be a 500 year flood of record. Also, there were enormous agricultural/crop losses due to the flooding.
EMPORIA	EMPORIA	7/24/2000	Flash Flood	0	0	$ 10,000	$ -	Very heavy rain fell in Emporia, where 5.70 inches of rain was measured. Several residents were evacuated on Reese Street at Metcalf Branch. Standing high water was common in Emporia, with water above car doors on Market and Brink Roads.
EMPORIA	EMPORIA	9/3/2000	Flash Flood	0	0	$ -	$ -	Slow-moving thunderstorms dumped heavy rain which resulted in flooding at the intersection of Route 58 and Highway 619 near Emporia.
EMPORIA	EMPORIA	7/5/2006	Flash Flood	0	0	$ -	$ -	Two feet of water on Highway 58.
EMPORIA	EMPORIA	7/6/2006	Flash Flood	0	0	$ -	$ -	Flooding reported on Route 58 (Chapmans Ford Road).
GOOCHLAND COUNTY		1/19/1996	Flood	0	0	$ -	$ -	
GOOCHLAND COUNTY		3/20/2003	Flood	0	0	$ -	$ -	
GOOCHLAND COUNTY	MANAKIN	9/17/2004	Flash Flood	0	0	$ -	$ -	High water at Manakin and Hermitage Streets, and on Broad Street Road in town of Goochland.
GREENSVILLE COUNTY	COUNTYWIDE	9/16/1999	Flash Flood	1	0	$ 1,200,000	$ 800,000	
GREENSVILLE COUNTY	DAHLIA	8/3/2000	Flash Flood	0	0	$ -	$ -	Heavy rain caused flooding on Dahlia Road near Claresville.
GREENSVILLE COUNTY	MOONLIGHT	7/5/2006	Flash Flood	0	0	$ -	$ -	Two feet of water on Highway 58. Also, high water on Highway 301.
GREENSVILLE COUNTY	PLEASANT SHADE	7/6/2006	Flash Flood	0	0	$ -	$ -	Flooding reported on Highway 611 (Drybread Road).
HANOVER COUNTY		3/20/2003	Flood	0	0	$ -	$ -	
HANOVER COUNTY	ASHLAND	7/10/1998	Flash Flood	0	0	$ -	$ -	Slow moving thunderstorms produced rainfall amounts between 3.0 and 3.5 inches within 2 hours. This resulted in flash flooding in eastern portions of Hanover county. Several roads were reported under as much as six inches of water. Several accidents were reported near the intersection of Route 643 and Route 301 about 6 miles southeast of Ashland.
HANOVER COUNTY	COUNTYWIDE	9/16/1999	Flash Flood	0	0	$ 67,000	$ -	
HANOVER COUNTY	MECHANICSVILLE	8/4/2000	Flash Flood	0	0	$ -	$ -	Heavy rain caused flooding of secondary roads in Mechanicsville.
HANOVER COUNTY	EAST PORTION	6/1/2001	Flash Flood	0	0	$ -	$ -	Several reports of high water in the eastern portion of the county.
HANOVER COUNTY	COUNTYWIDE	8/30/2004	Flash Flood	2	0	$ 2,000,000	$ -	Rainfall amounts between 5 and 11 inches resulted in numerous road closures due to flooding.
HANOVER COUNTY	ASHLAND	9/17/2004	Flash Flood	0	0	$ -	$ -	High water reported on Greenwood Church Road, Rosmarin Road, Mountain Road, Auburn Mill Road, and Stone Horse Road.
HANOVER COUNTY	ASHLAND	6/26/2006	Flash Flood	0	0	$ -	$ -	Heavy rain caused flash flooding and closure of Mount Hermon Road.
HANOVER COUNTY	ASHLAND	6/3/2009	Flash Flood	0	0	$ -	$ -	Several businesses were flooded.
HENRICO COUNTY	EAST HIGHLAND PAR	9/8/1996	Flood	1	1	$ 5,000	$ -	
HENRICO COUNTY	RICHMOND HGTS	9/9/1999	Flash Flood	0	0	$ -	$ -	
HENRICO COUNTY	COUNTYWIDE	9/16/1999	Flash Flood	0	0	$ 600,000	$ -	
HENRICO COUNTY	EAST PORTION	6/1/2001	Flash Flood	0	0	$ -	$ -	High water eastern portion of the county. Several roads closed.

HENRICO COUNTY	SANDSTON	6/10/2004	Flash Flood	0	0	$ -	$ -	High water on Bikerstaff Road and 7400 block of Strath Road. Road washed out at Ocano Drive.
HENRICO COUNTY	COUNTYWIDE	8/30/2004	Flash Flood	1	0	$ 2,000,000	$ -	Rainfall amounts between 5 and 10 inches resulted in numerous road closures due to flooding.
HENRICO COUNTY	WHITE OAK SWAMP	10/7/2006	Flash Flood	0	0	$ -	$ -	Route 156 at Route 5 closed due to high water.
HENRICO COUNTY	WHITE OAK SWAMP	8/17/2007	Flash Flood	0	0	$ -	$ -	Several roads were closed due to high water.
HENRICO COUNTY	LEWIS GARDENS	6/3/2009	Flash Flood	0	0	$ -	$ -	There was up to one foot of water covering parts of Darbytown, Monichan and Charles City Roads.
HOPEWELL	HOPEWELL	8/16/2000	Flash Flood	0	0	$ -	$ -	Heavy rain caused flooding on City Point Road near South 25th Avenue in Hopewell.
NEW KENT COUNTY	QUINTON	9/8/1996	Flood	0	0	$ -	$ -	
NEW KENT COUNTY	COUNTYWIDE	9/16/1999	Flash Flood	0	0	$ 650,000	$ -	
NEW KENT COUNTY	LANEXA	8/4/2000	Flash Flood	0	0	$ -	$ -	Heavy rain caused flooding on Carter Road in Lanexa.
NEW KENT COUNTY	QUINTON	6/1/2001	Flash Flood	0	0	$ -	$ -	Five inches of rainfall and high water reported by spotter.
NEW KENT COUNTY	WEST PORTION	8/30/2004	Flash Flood	0	0	$ -	$ -	Rainfall amounts between 4 and 8 inches resulted in numerous road closures due to flooding.
NEW KENT COUNTY	NEW KENT	10/7/2006	Flash Flood	0	0	$ 3,000	$ -	Route 1002 at Route 60 closed due to high water.
PETERSBURG	PETERSBURG	9/16/1999	Flash Flood	0	0	$ 650,000	$ 200,000	
PETERSBURG	PETERSBURG	7/7/2005	Flash Flood	0	0	$ -	$ -	Numerous roads closed city-wide. Roads barricaded due to flooding.
POWHATAN COUNTY		1/19/1996	Flood	0	0	$ -	$ -	
POWHATAN COUNTY		3/20/2003	Flood	0	0	$ -	$ -	
POWHATAN COUNTY	POWHATAN	9/3/2000	Flash Flood	0	0	$ -	$ -	Slow-moving thunderstorms dumped heavy rain over portions of the eastern Virginia piedmont causing flooding of the intersection of Routes 522 and 60 near Powhatan.
POWHATAN COUNTY	POWHATAN	6/16/2004	Flash Flood	0	0	$ -	$ -	Numerous road closures in western half of county.
POWHATAN COUNTY	POWHATAN	6/16/2004	Flash Flood	0	0	$ -	$ -	Rainfall amounts between 4 and 5 inches continued to result in numerous road closures in the western half of county.
POWHATAN COUNTY	POWHATAN	9/17/2004	Flash Flood	0	0	$ -	$ -	Portions of Highway 60 flooded. Route 711 closed due to high water.
POWHATAN COUNTY	SUBLETTS	6/23/2006	Flash Flood	0	0	$ -	$ -	Flash flooding caused high water on Route 711 and Manakin Ferry Road and at Judes Ferry Road.
POWHATAN COUNTY	POWHATAN	6/26/2006	Flash Flood	0	0	$ -	$ -	Heavy rain caused flooding at Three Bridge Road between Red Lane and Academy Roads.
POWHATAN COUNTY	POWHATAN	8/16/2007	Flash Flood	0	0	$ -	$ -	Many roads were flooded across the county.
POWHATAN COUNTY	POWHATAN	9/26/2008	Flash Flood	0	0	$ -	$ -	Water was covering the roadway at the intersection of US 60 and VA-13 near Powhatan.
PRINCE GEORGE COUNTY	COUNTYWIDE	9/16/1999	Flash Flood	0	0	$ 1,400,000	$ 900,000	
PRINCE GEORGE COUNTY	TEMPLETON	9/15/2004	Flash Flood	0	0	$ -	$ -	Over a foot of water was observed on Fairwood Road.
PRINCE GEORGE COUNTY	PRINCE GEORGE	9/15/2004	Flash Flood	0	0	$ -	$ -	Considerable water over Route 460 was reported near Disputanta, with one of the lanes blocked due to the high water.
PRINCE GEORGE COUNTY	TEMPLETON	9/1/2006	Flash Flood	0	0	$ -	$ -	Route 607 at Route 622 flooded.
PRINCE GEORGE COUNTY	DISPUTANTA	10/7/2006	Flash Flood	0	0	$ 225,000	$ 200,000	Numerous roads closed including a section of HWY 460. High water caused significant crop damage.
PRINCE GEORGE COUNTY	TEMPLETON	10/7/2006	Flash Flood	0	0	$ -	$ -	Road closed at intersection of Templeton and Lansing Roads.
PRINCE GEORGE COUNTY	BURROWSVILLE	9/26/2008	Flash Flood	0	0	$ -	$ -	Water was covering portions of Brandon Road in far eastern Prince George county north of Route 10. Road in process of closure.
RICHMOND	RICHMOND	9/9/1999	Flash Flood	0	0	$ -	$ -	Slow-moving thunderstorms caused flooded roads. This flooding forced people to abandon vehicles.
RICHMOND	RICHMOND	9/16/1999	Flash Flood	0	0	$ 176,000	$ -	

RICHMOND	SOUTH PORTION	7/19/2000	Flash Flood	0	0	$ 5,000	$ -	Heavy rain overwhelmed storm drains on Maury Street in South Richmond and sent water cascading in the basement of the Richmond Department of Public Utilities' Field Operations and Maintenance Facility. As much as five feet of water filled the 10,000 square foot basement and damaged several computers and internal department records. Ten inches of water was reported across Belt Boulevard between Hull Street and Midlothian Turnpike.
RICHMOND	RICHMOND	8/4/2000	Flash Flood	0	0	$ -	$ -	Heavy rain led to high standing water in the Shockoe Bottom section of downtown Richmond.
RICHMOND	RICHMOND	8/11/2000	Flash Flood	0	0	$ -	$ -	Very heavy rain caused flooding and the closure of the intersection of West Canal and South Adams Streets in downtown Richmond. High water also closed Bainbridge Street at 20th Street.
RICHMOND	RICHMOND	6/6/2001	Flash Flood	0	0	$ -	$ -	I-95 north bound closed at Broad Street underpass where 2 feet of water covered the roadway.
RICHMOND	RICHMOND	6/10/2004	Flash Flood	0	0	$ -	$ -	In the Shockoe Bottom area, several restaurants were flooded along with street flooding.
RICHMOND	RICHMOND	7/27/2004	Flash Flood	0	0	$ -	$ -	Street flooding near the Boulevard and I-95.
RICHMOND	RICHMOND	8/30/2004	Flash Flood	3	0	$ 20,000,000	$ -	Rainfall amounts between 5 and 12 inches resulted in numerous road closures due to flooding. In addition, about 20 blocks of downtown Richmond were condemned due to the floodwaters. A brick building collapsed in the city's historic and low-lying Shockoe Bottom area, and several dozen buildings had extensive water damage after floodwaters reached depths of up to 10 feet.
RICHMOND	RICHMOND	9/17/2004	Flash Flood	0	0	$ -	$ -	Flooding reported on New Kent Road, Jennie Scher and Stoney Run Roads, Fairmount Road, and Mechanicsville Turnpike.
RICHMOND	RICHMOND	7/22/2005	Flash Flood	0	0	$ -	$ -	High water signs posted on numerous roads, mainly due to flooding of underpasses and low lying areas. Gilles Creek overflowing its banks in Richmond's east end.
RICHMOND	RICHMOND	8/15/2006	Flood	0	0	$ 20,000	$ -	Heavy rain caused urban street flooding in the Shockoe Bottom section of the city. Several residents and businesses received damage due to high water.

EMERGENCY ACTION PLAN FOR HIGH HAZARD POTENTIAL IMPOUNDING STRUCTURES

Reference: Impounding Structure Regulations, Part III, Section 175, Virginia Soil and Water Conservation Board

I. CERTIFICATIONS

A. Certification by Owner

I certify that procedures for implementation of this Emergency Action Plan have been coordinated with and a copy given to each local Emergency Services Coordinator serving the areas potentially impacted by the dam. Also, that a copy of this Emergency Action Plan has been filed with the Virginia Department of Emergency Management in Richmond and a copy of the Dam Break Inundation Map has been provided to the local government office with plat and plan approval authority or zoning responsibilities as designated by the locality for each locality in which the dam break inundation zone resides; that this plan shall be adhered to during the life of the project; and that the information contained herein is current and correct to the best of my knowledge.

Signed: _____

Print Name: SCOTT DEWHIRST

This 18th day of AUGUST, 2016.

B. Certification by Preparer

I certify that the information provided in this report has been examined by me and found to be true and correct in my professional judgment.

Signed: Susan McGhee Preparer's Signature

This 2nd day of March, 2016

Printed Name Susan McGhee, PE

Title Project Manager

Address 5029 Corporate Woods Drive, Suite 301, Virginia Beach, VA 23462

Phone 757-493-2319 ext. 8537

C. Acknowledgement by Emergency Services Coordinator

See the forms on the following pages.

This EAP provides a format that would provide the minimal amount of information necessary to initiate an emergency evacuation; local officials may require additional information.

Dam failure is imminent or in progress</td></tr>
<tr><td>Step 3: Notification & Communication</td><td>Stage 1
See Notification Flow Chart A</td><td>Stage 2
See Notification Flow Chart B</td><td>Stage 3
See Notification Flow Chart C</td></tr>
<tr><td>Step 4: Expected Action</td><td>Remote Reservoir Monitoring; Monitor Weather Forecast; Daily Visit for Unusual Condition</td><td>Remote Reservoir Monitoring; Monitor Unusual Condition every 2 hrs; Continuous Fuse-Plug Dike Observation; Notify Emergency Services</td><td>Continuous observation & contact with Emergency Services; Downstream Evacuated</td></tr>
<tr><td>Step 5: Termination and Follow Up</td><td colspan="3">Termination of Monitoring Conditions; Proceed to evaluate damages and plan for repairs</td></tr>
</table>

Surveillance and instrumentation readings at the site will be the normal methods of detecting potential emergency situations. For conditions beyond the normal range of operations contact Facilities Manager (Section II) for assistance with evaluation of the conditions.

NOTIFICATION FLOW CHARTS

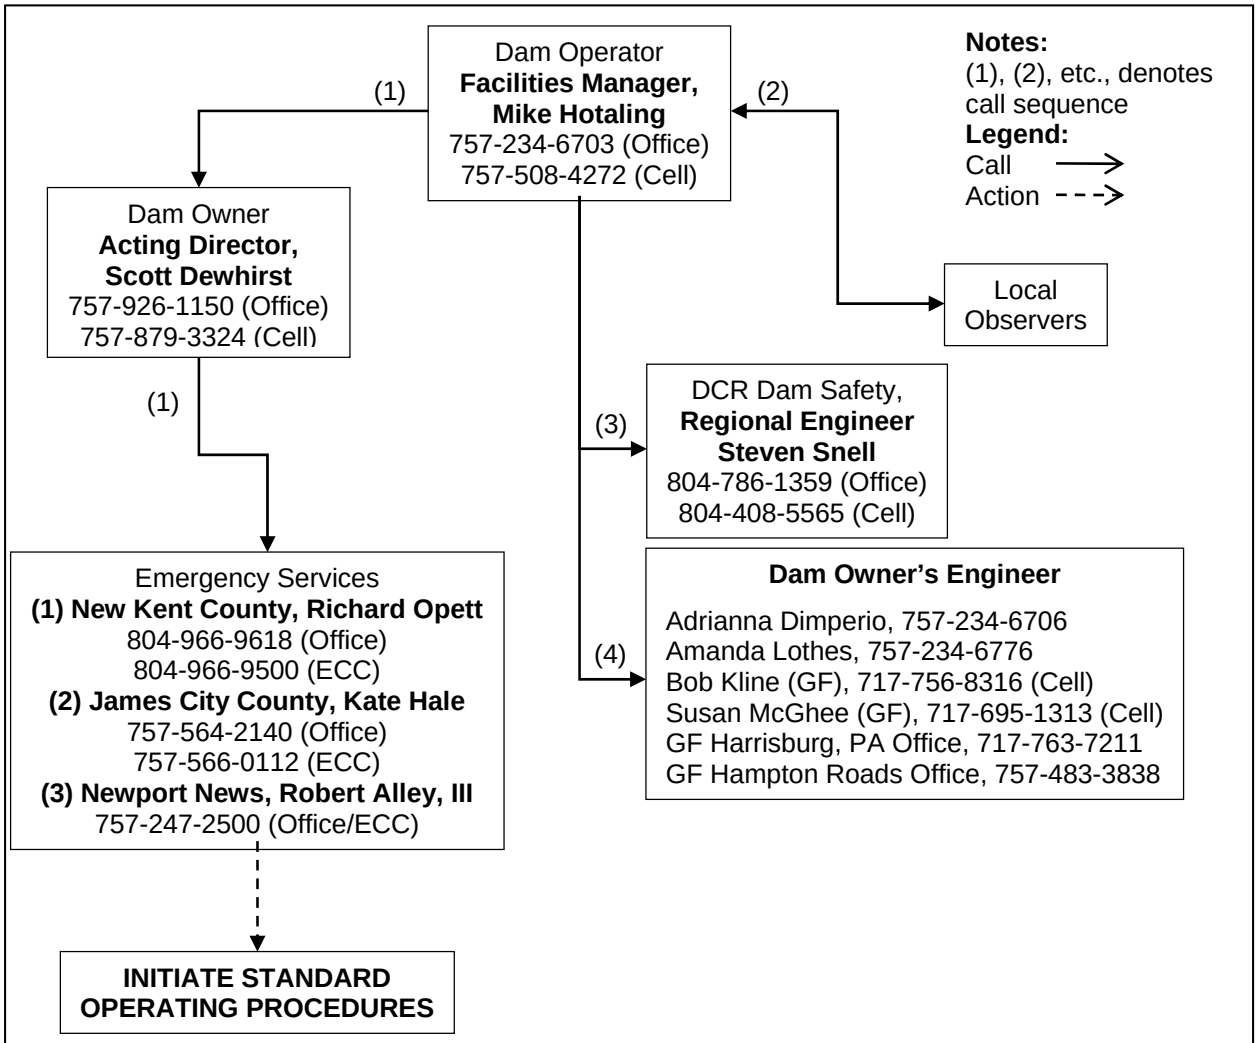

A. STAGE 1 NOTIFICATION

Optional Message from Dam Owner to Emergency Services:

[FOR PRECIPITATION EVENT] *This is the Diascund Dam owner. A Stage 1 emergency has been identified for Diascund Dam. Please initiate your standard operating procedures and prepare your personnel in case an evacuation within the 100-year inundation zone is necessary. The dam will be observed, and updates will be provided to you.*

B. STAGE 2 NOTIFICATION

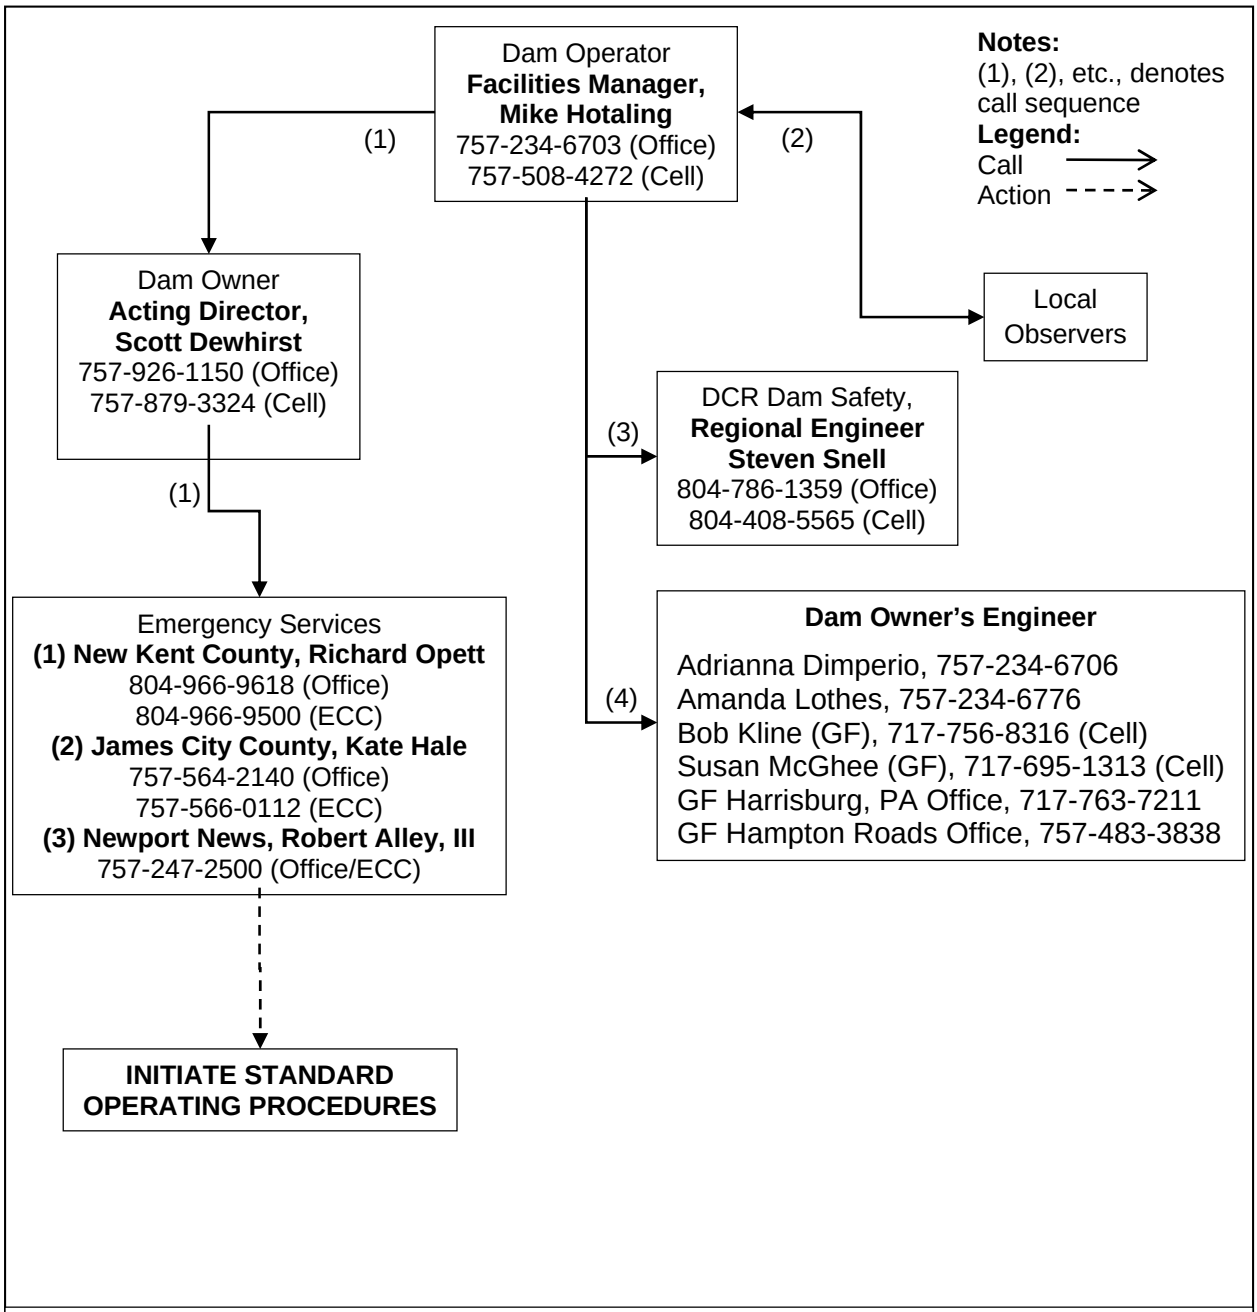

Message from Dam Owner to Emergency Services:

This is the Diascund Dam owner. A Stage 2 emergency has been identified for Diascund Dam.

[FOR SUNNY DAY EVENT] *Please initiate your standard operating procedures and prepare your personnel in case Stage 3 full evacuation is necessary. The dam will be observed and updates will be provided.*

[FOR PRECIPITATION EVENT] *Please initiate your standard operating procedures and evacuate people within the 100-year inundation zone. Prepare your personnel in case Stage 3 full evacuation is necessary. The dam will be observed and updates provided.*

C. STAGE 3 NOTIFICATION

Message from Dam Owner to Emergency Services:

This is the Diascund Dam owner. A Stage 3 emergency has been identified for Diascund Dam. Please initiate your standard operating procedures and evacuate residences in the inundation zone. We will remain at the dam and provide updates on its condition.

IV. STATEMENT OF PURPOSE

The purpose of this Emergency Action Plan (EAP) is to:

(1) safeguard the lives and reduce damage to the property of citizens of James City and New Kent Counties living and/or working along Diascund Reservoir and Diascund Creek in the event of failure of Diascund Dam (12703);

(2) provide for effective dam surveillance, prompt notification to local emergency management agencies, citizen warning and evacuation response, when required; and,

(3) identify emergency actions to be taken by the dam owner/operator, public officials, emergency personnel, and to outline response actions in the event of a potential or imminent failure of the dam.

Impounded water upstream of a dam when released uncontrollably may threaten lives in the flow area downstream or cause damage to homes, roads, bridges and any other infrastructure in its way. This uncontrolled release occurs when the dam or a part of the dam breaks and water in the impoundment rushes out.

Heavy precipitation events may cause severe flooding upstream and downstream of the dam without dam failure. Severe flooding may threaten lives or cause damage to homes, roads, bridges and any other infrastructure in the vicinity of the reservoir.

The Diascund Dam discharge structures include a fuse-plug dike in the emergency spillway, which is an uncommon hydraulic feature in this region of Virginia. Fuse-plug dikes are designed to overtop and rapidly erode down to an armored spillway apron. Design details for the Diascund Dam fuse-plug dike are provided in Section 5 and Appendix C. **Activation of the fuse-plug dike at Diascund Dam may rapidly release a wave of water, 6 to 7 feet tall and as much as 600 feet wide. Inundation studies demonstrate the fuse-plug dike activation during the 100-year event would impact downstream residential and other occupied structures as well as US Route 60. Therefore, this EAP must also serve to protect the citizens living and/or working within that 100-year inundation zone.**

V. PROJECT DESCRIPTION

Diascund Dam is located in James City and New Kent Counties. The dam impounds Diascund Creek Reservoir, which is a regional drinking water supply owned by the City of Newport News. The dam is approximately 2,000 feet upstream of US Route 60, a four lane divided highway.

The dam is approximately 5,000 feet long and 35 feet tall, and features a principal spillway and emergency spillway with fuse-plug dike. The principal spillway elevation is 23.94 feet, and the top of dam elevation is 33.94 feet. All elevations refer to North American Vertical Datum 1988 (NAVD 88) unless otherwise noted. Virginia Route 603 (Diascund Reservoir Road) passes along the top of the dam from the left abutment (facing downstream) to the principal spillway, approximately 2,300 feet in length, before turning upstream of the dam and across the reservoir.

The emergency spillway with fuse-plug dike consists of a soil-cement spillway apron (elevation 22.94 feet) beneath the earthen fuse-plug dike (top elevation 30.04 feet) with three pilot channels (top elevation 29.04). The fuse-plug dike was designed such that the pilot channels would begin eroding when the reservoir elevation exceeded 29.04 feet, which corresponds to a 100-year storm event (24-hour duration). When the pool elevation overtops the pilot channels, the entire fuse-plug dike would be eroded away to prevent overtopping of the dam (also see Appendix C, Site Specific Concerns). Water passing over the fuse-plug dike and emergency spillway is conveyed by the downstream channel to forested wetlands that drain to Diascund Creek.

Water passing through the principal spillway is conveyed to Diascund Creek. Diascund Creek extends south from the dam to the Chickahominy River, through the village of Lanexa. Diascund Creek is the boundary between James City County, to the east, and New Kent County, to the west. Environmental/conservation buffers are in place on either side of the creek. The rest of the land within the downstream dam break inundation zone is a combination of rural lands, suburban housing and the village of Lanexa.

Wooden flashboards, with a height of one foot, are typically in place on the Diascund Dam principal spillway and maintain the reservoir at elevation 24.94 feet. The flashboards are intended to fail (wash-out) when the reservoir water surface reaches elevation 26.94 feet (+2 feet over the flashboards).

VI. EMERGENCY DETECTION, EVALUATION, and CLASSIFICATION

The dam owner is responsible for operation and maintenance of this dam as well as emergency detection and evaluation. The dam owner's designated personnel, as shown in Sections II and III, are responsible for monitoring conditions at the dam and initiating notifications when emergency stage conditions are activated.

Timely and reliable detection of emergency conditions or potential emergency conditions at the dam is essential to the successful implementation of this EAP. Detection of emergency conditions could occur through routine visual surveillance and attention to weather conditions.

The dam, spillways and appurtenant structures should be inspected routinely in accordance with the Operations & Maintenance Plan and Schedule. Additional inspection should be conducted after periods of heavy or prolonged rainfall, after the occurrence of an earthquake, or after rapid drawdown of the reservoir. Any abnormal or questionable conditions should be noted.

If the severity of the problem is uncertain, maintain continuous observations and notify the responsible parties as shown in the Section III, Notification Flow Charts.

In this section the specific milestones that trigger the progression from Stage 1 (slowly developing condition), to Stage 2 (rapidly developing condition), and Stage 3 (impending failure) are discussed. The emergency conditions are classified based on their severity and urgency and are summarized as follows:

Stage 1 – Non-emergency, failure unlikely, storm development or operational malfunctions are slow in escalation to a potential emergency. This stage indicates a situation is developing such that the dam is not in danger of failing, but if it continues failure may be possible. An unusual condition, such as settlement or changes in seepage, has been detected at the dam that is not likely to result in dam failure (Refer to Table 6.4, page 19 for classification of unusual conditions), or a flood watch has been issued for the area.

Under Stage 1 conditions, the Waterworks Facilities Manager (dam operator) notifies the Waterworks' Director (dam owner) who then at his discretion may notify Virginia DCR. For a non-precipitation event, Waterworks staff will visit the dam and assess the situation. Investigation of an unusual condition, such as settlement, may warrant inspection by a qualified engineer, so the Facilities Manager may contact the consulting engineer, if necessary. For a precipitation event, the Facilities Manager will monitor the reservoir elevation via Waterworks supervisory control and data acquisition (SCADA) and weather forecasts.

If surveillance or further investigation reveals that a potential failure situation is developing or severe flooding is likely, then a Stage 2 or Stage 3 emergency is declared.

Stage 2 – Potential Failure, storm development or operational malfunction are quickly accelerating that could result in failure of the dam. This Stage indicates that a situation is developing that could result in a dam failure. A potential failure situation is developing or the reservoir elevation is approaching the top of the fuse-plug dike (see Subsection A below).

Upon reaching the Stage 2 conditions, the Facilities Manager updates the Waterworks' Director who then notifies the ESCs. When a precipitation event causes the reservoir elevation to reach the Stage 2 trigger level, the Waterworks' Director will direct the ESCs to evacuate areas impacted by the activation of the emergency spillway, as shown in Section IX and X. The ESCs should also prepare for full evacuation in case conditions progress to a Stage 3 emergency.

Waterworks will inform the DCR Regional Engineer of the condition of the dam. Waterworks will contact their consulting engineer to assess the condition of the dam and recommend immediate remedial action to save the dam. If surveillance or further investigation reveals that failure is expected, then a Stage 3 emergency is declared.

Stage 3 – Imminent Failure, storm or operational malfunction has reached a point that the failure of the dam is imminent. This Stage indicates dam failure is expected and may result in flooding that will threaten life and/or property downstream of the dam. Failure of the dam is imminent due to an unusual condition or event at the dam, or the reservoir has reached the trigger elevation for Stage 3.

The Facilities Manager directs continuous observation of the dam. The Facilities Manager updates the Waterworks' Director on the conditions who then notifies the ESCs immediately. ESCs order the evacuation of structures and closure of roads within the inundation zone. ESCs notify VDOT if major roadways, such as US Route 60, must be closed. Waterworks will notify their consulting engineer and the DCR Regional Engineer of the condition of the dam.

The emergency conditions can be a result of a variety of conditions, and these conditions generally fall into two categories, precipitation induced or non-precipitation induced emergencies. Some of the more common mechanisms leading to emergency conditions will be discussed in this section. Generally speaking, the dam operator and dam owner will initiate this EAP based on prevailing conditions seen or felt near the dam.

A. Precipitation Induced Emergencies

Heavy rainfall over an extended period of time is the most common cause of dam failure in the United States.

The issuance of a flood watch or flash flood watch for the area by the National Weather Service (NWS) or other local authority will automatically initiate a Stage 1 Emergency Condition for the dam and initiate the procedures detailed in this EAP. The Stage 2 and 3 triggers for the dam are detailed below.

Since public safety is the primary focus of the EAP, it is incumbent on all parties associated with this document to work together as a team. While it is the dam owner's responsibility to initiate this process through the dam operator and local observers, the dam owner, Waterworks' personnel or ESCs may contact each other to notify the team that a flood watch has been initiated locally by the National Weather Service and everyone should begin their duties as required in this EAP.

The forecasted rainfall expected in the watershed will be the first predictor of a potential precipitation induced emergency. The forecasted rainfall depth that would be the first warning of a potential Stage 2 or 3 condition for the dam are included in Table 6.1 below. These rainfall depth predictors are given for information purposes only to assist the owner in forecasting conditions. The rainfall depth predictors do not initiate Stage 2 and 3 conditions. Reservoir elevation triggers provided in Table 6.2 are the governing triggers for initiating stages.

Table 6.1. Rainfall Depth Predictors

Stage	Inches per 6 hrs	Inches per 12 hrs	Inches per 24 hrs
2	5	7	8
3	7	9	12

Rainfall depth will be monitored using the SCADA system that is equipped with alarms to notify Waterworks that the rainfall depth predictor levels have been exceeded. The reservoir elevation will be used to initiate Stage 2 and 3 conditions. Reservoir elevation will be checked using the SCADA system and/or staff gages checked by local observers. The frequency of observations during a precipitation event will be as follows. Table 6.2 provides a summary of observation frequencies.

- Stage 1 – Observe reservoir water surface elevation (WSEL) and rainfall depth using SCADA or by local observers.

- Stage 2
    - If fuse-plug dike is forecasted to overtop and breach, provide continuous observation of emergency spillway. Notify emergency officials when fuse-plug dike overtopping begins and notify again when breached.
    - Continue reservoir elevation monitoring using SCADA system.
    - Perform visual observation of accessible portions of the dam to check for unusual conditions.
- Stage 3
    - Continue reservoir elevation observation monitoring and rainfall depth using SCADA system.
    - If site is accessible, perform at least one visual observation of accessible portions of the dam to check for unusual conditions.
    - If safe to do so, station observer on site to provide continuous updates on dam condition.

Table 6.2. Precipitation Event Observation Frequencies

Stage	Frequency
1	Remote observation of WSEL and rainfall depth using SCADA.
2	Emergency spillway observation. Remote observation of WSEL and rainfall depth using SCADA.
3	Continuous(1)

(1) Observations at the dam should only continue as long as the observers are not in danger.

The pool level conditions that triggers Stage 2 and 3 conditions are summarized in Table 6.3.

Table 6.3. Reservoir Elevation Triggers & Dam Feature Elevations

	ELEVATION[1]	
	NGVD 29 (SCADA Datum)	NAVD 88
Stage 2 Pool	**28.56 and rising**	**27.5 and rising**
Stage 3 Pool	**31.06 and rising**	**30.0 and rising**
Principal Spillway	**25.0**	**23.94**
Emergency Spillway (Fuse-Plug Pilot Channels)	**30.1**	**29.04**
Dam Crest	**35.0**	**33.94**

(1) Conversion factor reported by others used to adjust elevations (NGVD29 – 1.06 ft = NAVD88). None of the elevations shown in this table are based on recent field survey.

An observer mobilized to the dam should observe the condition of the embankment and spillways, record depth of flow over the principal spillway, check the emergency spillway and note any unusual or questionable conditions. Unusual or questionable conditions combined with heavy rainfall may initiate Stage 2 or 3 conditions prior to the reservoir elevation reaching the level indicated in Table 6.3. Table 6.4 should be referenced to assess the unusual condition and subsequently initiate the appropriate notifications.

The local observer(s) shall use preplanned access routes to the dam bearing in mind that roads may be flooded.

These roads and other roads shown in Appendix D must be closed when the Stage 3 condition is met. The ESCs/VDOT may choose to close the roads under Stage 2 conditions if necessary. ESCs shall coordinate road closures with the Virginia Department of Transportation District Administrator, as shown in Sections II and III.

B. Other Emergency Events

An isolated condition of the dam embankment and spillway could lead to emergency conditions at the dam. Table 6.4 lists conditions that may lead to an emergency, the procedure to evaluate the severity of each condition, and the recommended action based on the severity.

Conditions in Table 6.4 would be detected during routine inspections by Waterworks. In addition, special inspections of the dams should be made after major events, including but not limited to:

- Earthquakes,
- Tornadoes,
- Reports of sabotage
- Rapid drawdown of the reservoir, and
- Heavy rainfall events.

See Figure 6.1 for a depiction of the procedure for problem detection and the appropriate response to a problem. Definitions of the terms, including terms used in Table 6.4, are included in Section VI.C.

The frequency of observations during a non-precipitation event will be as follows:

- Stage 1 – Daily
- Stage 2 – Every 2 hours unless conditions dictate a higher frequency
- Stage 3 – Continuous, as long as observers are not in danger

Table 6.4 - Unusual Condition Classifications

No.	Condition	Location	Basic Questions for Evaluation	Evaluation and Possible Assessments	Stage or Action
1	Slumping, Sloughing, Sinkholes	Earth Embankment	Is it isolated, small and pre-existing? Are there indications that it is enlarging? Are there signs of distress in adjacent areas?	Small, isolated, apparently stable, slowly developing	1
				Non-isolated, recent enlargement and embankment failure possible	2
				Progressively increasing in size or extent, foundation distress, failure likely	3
2	Concrete Surface Deterioration	Spillway, Stilling Basin, Culvert, Headwalls	How large is the area? Is reinforcing steel exposed? Are there indications of recent changes? Is there displacement or flowing water emerging?	Recent section loss, condition apparently stable	1
				Enlarging, visible flow of water, collapse possible	2
				Rapidly enlarging to the extent that failure of the spillway is possible	3
3	Misalignment	Embankment or Principle Spillway	How large is the movement? How quickly is it changing? Is it accompanied by an increase in seepage?	Minor displacement of unknown time period, no seepage	1
				Observed displacement and/or increase in seepage, worsening condition possible	2
				Rapidly worsening conditions, failure likely	3
4	Erosion	Earth Embankment, Abutments	How extensive and deep is the eroded area? Is it susceptible to continued erosion? Have prior repairs been successful?	Deep or extensive erosion, dam is vulnerable	1
				Substantial material loss, worsening condition likely	2
				Rapidly eroding embankment material	3
5	Changes in Seepage	Downstream Embankment, Toe of Dam, Abutments, Adjacent to Culvert	Has it increased? Is it clear, cloudy or muddy? Is it in a new location?	Increased seepage and/or new locations detected, seepage is clear	1
				Cloudy/muddy flow, increased flowrate, embankment failure possible	2
				Cloudy/muddy uncontrolled flow, conditions worsening, failure likely	3
6	Boils	Downstream Embankment, Adjacent to Toe of Dam	How many and how large? Is material being transported?	Single boil of limited size and flowrate	1
				Multiple boils with appreciable flow, condition stable, if worsens see No. 5	2
7	Whirlpools	Reservoir	Is increased flow emerging downstream? (See also No. 1, No. 5)	Other conditions occurring, dam failure is possible	2
				Failure is imminent	3
8	Noticeable Settlement (See also No. 4 and No. 5)	Embankment Crest and Roadway	Was it previously detected? Is it increasing in size or extent? How quickly is it changing? Are other signs of distress present?	Settlement observed, condition not changing	Repair
				Appreciable and/or change in degree or extent of settlement, other conditions present. Condition has potential to worsen and impact integrity of dam.	2
9	Cracks	Embankment, Roadway, Spillway, Stilling Basin	Where is the crack located? Is Water flowing from crack? Is it enlarging? Is there evidence of impending failure?	Embankment crack observed without seepage	1
				Embankment crack observed with flow of water, condition stable but could worsen (see also No. 5)	2
				Embankment cracked with muddy flow of water, failure likely (see also No. 5)	3
10	Sabotage	Dam Embankment, Roadway, Appurtenant Structures	Could threat lead to failure?	Sabotage or demonstration that is not likely to lead to dam failure	1
				Satbotage, bomb threat or deomstration that may result in dam failure	2
				Sabotage that has caused immenent dam failure	3
11	Audible Indications of Distress	Dam Embankment, Abutments or Spillway	Are sounds indicative of flow of water or structural displacement?	Failure of critical components is ongoing or imminent	3

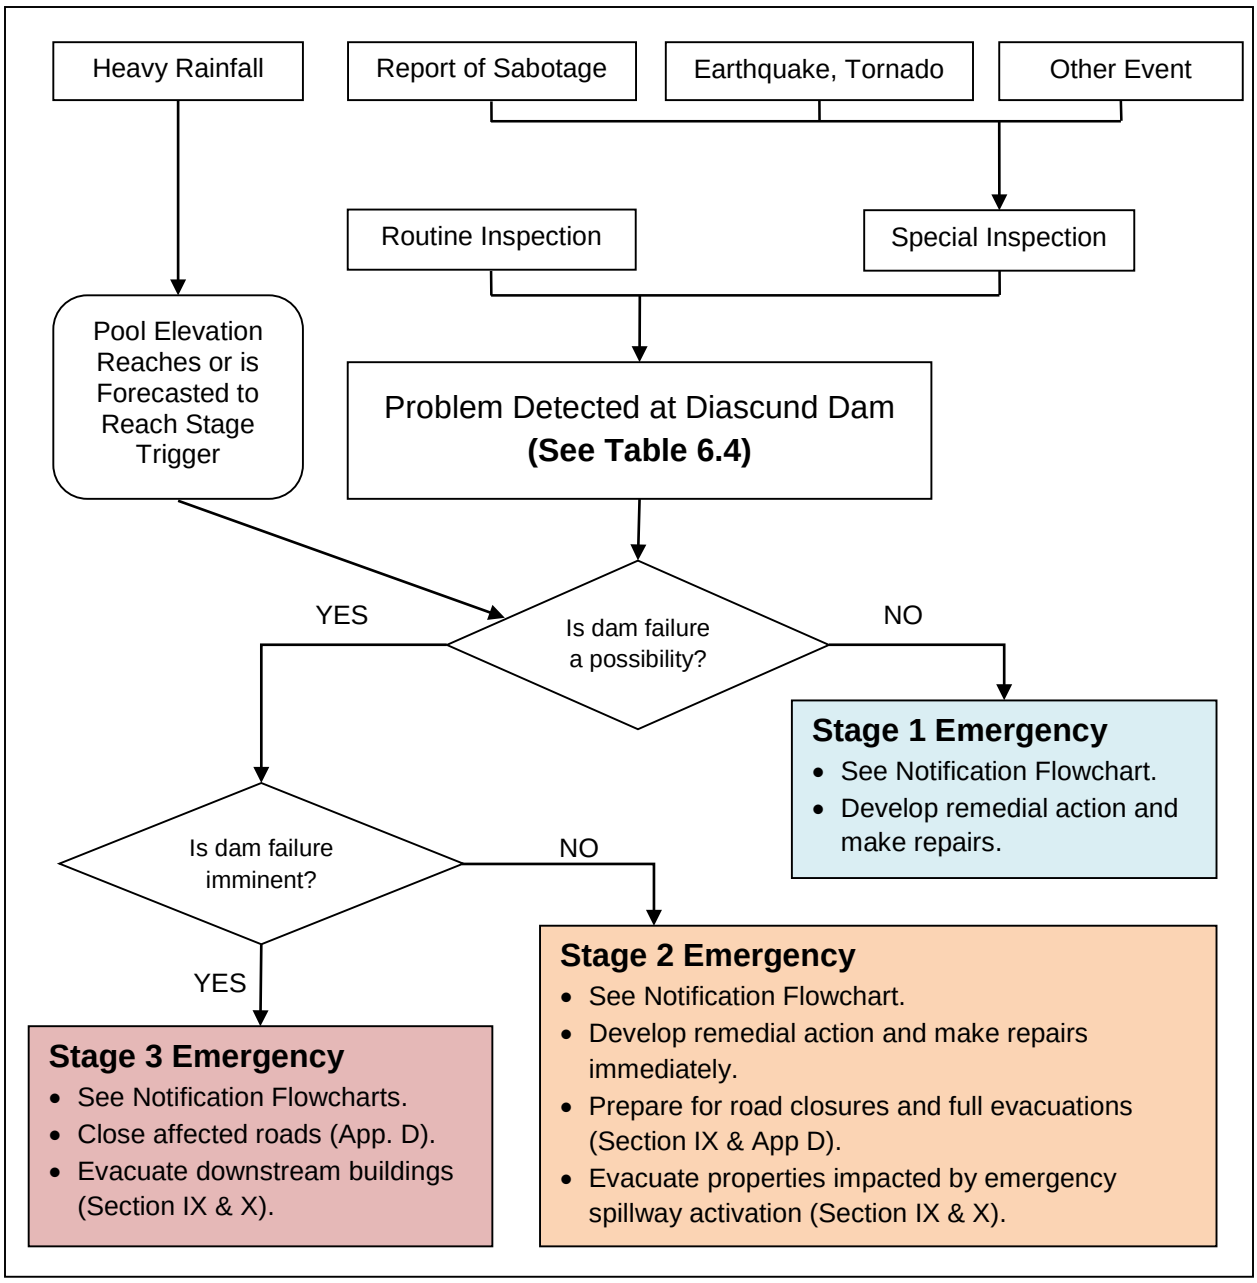

Figure 6.1. Problem Detection and Response

C. Definitions

ABUTMENT – The part of the land against which the dam abuts. Right and left abutments are those on respective sides of the dam as an observer looks downstream.

BOIL – A disturbance in the surface layer of soil caused by water escaping under pressure from behind a water-retaining structure, such as a dam. The boil may

be accompanied by deposition of soil particles (usually sand or silt) in the form of a ring (miniature volcano) around the area where the water escapes.

CRACK – Sharp break or fissure in the surface, generally caused by strain and environmental conditions such as earthquakes, excessive water pressure, deterioration of the dam structure, settlement, foundation movement, uplift pressure and defective construction materials.

CONCRETE SURFACE DETERIORATION – Spalling, cracking, micro-cracking, efflorescence (deposits of soluble salts, usually white) or pitting of concrete surfaces. Indicative of leakage through dam, weathering of concrete, poor material quality or movement.

DAM FAILURE – The uncontrolled release of a dam's impounded water. It is recognized that there are degrees of failure. Any malfunction or abnormality, outside the design assumptions and parameters, which adversely affect a dam's primary function of impounding water, is properly considered a failure. Minor malfunctions or abnormalities can result in a sudden failure of a dam.

EMBANKMENT – Fill material, usually earth or rock, placed with sloping sides.

DOWNSTREAM – In the direction of flow over the spillway.

EROSION – Progressive wearing away or earthen material caused by rainfall runoff, snow melt, wave action, lack of vegetation, foot-traffic, overtopping, or increased seepage through the dam or its foundation. Gullies formed by erosion may threaten the structural integrity of the embankment. Erosion along the base of the dam indicates potential deterioration of the foundation that could result in landslides or misalignment of the embankment.

LEFT – On the left side as an observer looks downstream.

LANDSLIDE – The movement of a mass of earth down a slope. In embankments and abutments, this may involve the separation of a portion of the slope from the surrounding materials.

MISALIGNMENT – Movement from the originally constructed precise surveyed alignment indicating that either (1) the foundations for the dam have moved; (2) the abutments have moved; (3) excessive force has been applied to the embankment; or (4) an earthquake has occurred.

RIGHT – On the right side as an observer looks downstream.

RIPRAP DISPLACEMENT – Movement of riprap is indicative of a slump, landslide or washout of the fine material behind the riprap.

SEEPAGE – The movement of water that might occur through the dam, its foundation or its abutments. Small amounts of clear water seepage is normal. Increase in the amount of water flow or change in color is a concern for a dam's safety.

SETTLEMENT – Downward movement of a structure or part of a structure. All dams settle to a small degree after construction; however, a noticeable slump in the earth embankment is a cause for concern.

SINKHOLE – Hole formed by material being washed away by excessive seepage under the dam, in the abutments or under the adjacent ground surface.

SLUMP – Downward slipping of a coherent body of earthen material along the surface or rupture. See also Landslide.

SLOUGH – Sliding of overlying material such as overburden upon rock. See also Landslide.

TOE OF DAM – The junction of the downstream face of a dam with the ground surface. Also referred to as downstream toe. For an embankment dam, the junction of the upstream face with ground surface is called the upstream toe.

UPSTREAM – In the direction opposite to the flow over the spillway.

WHIRLPOOL – Vortex in reservoir indicating that excessive leakage through or under the dam is occurring.

VII. GENERAL RESPONSIBILITIES UNDER THE EAP

A. Dam Owner Responsibilities

1. The dam owner/operator **IS RESPONSIBLE** for routine visual surveillance and monitoring of instrumentation for the dam and non-routine surveillance as described in Section VI.

2. The dam owner/operator **IS RESPONSIBLE** for identification of an emergency condition through the surveillance and monitoring process.

3. The dam owner/operator **IS RESPONSIBLE** for notifying local ESCs of any problem or potential problem at the dam sites.

4. The dam owner/operator **IS RESPONSIBLE** for implementation and direction of emergency repairs.

5. The dam owner/operator **WILL INITIATE** dam surveillance under Stage 1 conditions**.**

6. The dam owner/operator **WILL DETERMINE** when Stage 2 and 3 conditions are met at the dam and provide information to ESCs.

7. The dam owner/operator **WILL BE RESPONSIBLE** for operating such devices as spillway gates and low level outlets such as to cause the dam to function effectively.

B. Responsibility for Notification

The Waterworks' personnel authorized to notify local officials are shown in Section III.

1. The dam owner/operator **WILL NOTIFY** the 24-hour dispatch centers and/or ESCs while the local observer begins dam surveillance under Stage 1 conditions.

2. The dam owner/operator **WILL NOTIFY** the 24-hour dispatch centers and the local ESCs when Stage 2 conditions are met in order to alert them to review actions that may be required for the safety and protection of people and property and to mobilize their evacuation team for Stage 2 evacuations or a possible Stage 3 evacuation. Evacuations will be required if the emergency spillway may be activated for those people immediately below the dam or whose evacuation route may be blocked by inundation.

3. The dam owner/operator **WILL NOTIFY** the 24-hour dispatch centers and/or the local ESCs to initiate warning/evacuation of residents for Stage 2 evacuations or Stage 3 conditions requiring full evacuation.

4. The ESCs **WILL NOTIFY** the local media and VDOT of road closures and evacuation orders.

5. The dam owner/operator **WILL REPORT** when the emergency situation at the dam(s) is terminated.

C. Responsibility for Evacuation

1. ESCs **WILL NOTIFY** the people, business owners and land owners as shown in Section IX and X of the potential emergency or evacuation prior to or in the event Stage 2 evacuations or Stage 3 conditions are met.

2. The ESCs and 24-hour dispatch centers **WILL PREPARE OR FOLLOW EXISTING** Standard Operating Procedures (SOP's) to implement in the event that dam failure is possible or occurring and the event of heavy and prolonged rainfall events may cause severe flooding. These SOP's shall include evacuation plans.

3. ESCs **WILL CONTACT** the VDOT District Administrators or other authorized personnel to set up barricades to close roads where flood waters will cross roads shown in Appendix D.

D. Responsibility for Termination & Follow-Up

1. For Sunny Day events, once the Stage 3 condition has been met, a local observer will remain at the dam to provide the ESCs with information concerning the status of the dam. A local observer will remain at the dam until the dam breaks or the dam is stabilized or repaired.

2. For heavy and prolonged rainfall events: Stage 3 conditions will be downgraded by the dam owner/operator as the reservoir water levels recede. Stage 2 conditions will be terminated by the dam owner/operator based on reservoir levels and after inspection of the dam at the discretion of the dam owner.

3. Regional flooding may occur prior to an incident at this dam and could continue for long periods of time. The local observer needs to have plans for staying or returning to the dam as conditions worsen.

4. The ESCs will be responsible for termination of the evacuation orders and road closures, based on coordination with dam owner/operator.

5. Follow-Up exercises to determine strengths and weaknesses in the EAP should be conducted as soon after the emergency has passed as possible while the experience is fresh in the minds of those living through it. Waterworks will take the lead in coordinating this exercise in an effort to improve the overall EAP.

6. The dam owner/operator is responsible for annual review, updating and distribution of the EAP.

E. EAP Coordinator Responsibility

The EAP Coordinator is indicated in Section II. In the event that EAP Coordinator is unavailable, the Facilities Manager shall serve as the EAP Coordinator.

The EAP Coordinator will be responsible for EAP-related activities, including (but not limited to) preparing revisions to the EAP, establishing training seminars, and coordinating EAP exercises. The EAP Coordinator will act as the representative for Waterworks in all issues related to the coordination of the EAP prior to an event between the municipal governments, ESCs and Waterworks. The Coordinator may, at their option, appoint others to provide specific information or complete activities and tasks as necessary.

The EAP Coordinator will be assisted by the Department of Conservation & Recreation (DCR), Division of Dam Safety, Regional Engineer in matters related to this EAP.

VIII. PREPAREDNESS

A. Surveillance

The Diascund Pump Station is staffed for parts of the day during normal working hours and is located on the Diascund Dam.

Routine physical inspection of the earth embankment, principal spillway, and emergency spillway is essential to the identification of any emergent conditions at the dam. The dam should be inspected no less frequently than quarterly and after periods of heavy precipitation and sustained high lake levels. Waterworks staff will conduct the quarterly inspections and respond to reports of problems with the dam. A qualified engineer should be contacted if unusual conditions are observed.

Diascund Dam has a water level transducer at the Pump Station that allows remote monitoring of the reservoir level. Other monitoring is undertaken through manual reading of the staff gages as needed.

Waterworks staff should monitor the status of weather fronts through the National Weather Service (NWS). The NWS maintains a hurricane center that reports on hurricanes, tropical storms & tropical depressions as they travel and affect coastal and inland areas. The web site address is: http://www.nhc.noaa.gov/

The expected response time to the dam from the local observer's home should be less than one (1) hour from the time they receive the information that a flood watch has been declared. The local observers should never put themselves in harm's way, however. In the event a hurricane or tropical depression occurs with high winds the local observer shall only venture out when weather conditions permit safe dam access.

Preplanned access routes should be chosen given that roads may flood preventing safe access. The local observers and Waterworks' personnel should never attempt to cross a road that has flood water crossing it at a depth greater than one (1) foot unless the vehicle is specially designed for that purpose.

Alternative routes should be chosen for access by foot in the event that a car is unsafe for use. Other alternative means of transportation may be considered.

B. Response during Periods of Darkness

During periods of darkness, there are no lights existing at the dam. Waterworks should have access to portable lighting powered by a portable generator in order to monitor conditions at the dam overnight.

The local observer should carry a flashlight to check the staff gages, the emergency spillway, and the embankment for severe erosion. The local observer should conduct

the specified frequency of visits to the dam and monitor the water levels. The local observer should continue to observe the dam and monitor the water level during Stage 3 conditions until the water level rises to within one (1) foot of the top of dam. The local observer should then continue monitoring of the dam from the abutment as long as the observer is out of harm's way.

C. Access to the Site

From US Route 60, the Diascund Dam can be accessed by Route 603 (Diascund Reservoir Road) and Route 627 (North Waterside Drive). Route 603 provides access to the Diascund Pump Station, the Diascund Dam embankment and principal spillway. The emergency spillway can be accessed from a dirt road off of Route 627.

During an extreme precipitation event, such as the PMF, flooding and downed trees may impact access routes to the dam. Alternative modes of access, such as boat or helicopter, should only be attempted if weather conditions permit. Vehicles should not attempt to ford flowing water. Helicopters and boats should not be used during high winds. Wait until flood waters recede or conditions are safe to access and inspect the dam.

D. Response during Weekends & Holidays

Local observers live locally and will respond as needed on a 24 hours per day and a 7 days per week basis. When local observers leave the area they should contact each other so coverage may continue if a dam safety issue was to occur. Emergency numbers or cell phone numbers have been provided for other responsible parties in Section II.

E. Response during Adverse Weather

The local observers and Waterworks' personnel should never put themselves in harm's way. In the event a hurricane or tropical depression occurs with high winds the local observer shall only venture out when weather conditions permit, as discussed in Section VIII-C.

Each local observer and/or Waterworks' personnel should have protective clothing adequate to ensure their safety at all times during any response at the dam.

F. Alternative Systems of Communications

Communications during a major rainfall event may be problematic. Telephone land lines and cell phones should be used as the first means of communication. Radio communication may be used to supplement the land lines and cell phones. Radios should be obtained and a channel designated for use by Waterworks and the ES personnel during a dam emergency.

G. Emergency Supplies

Waterworks should maintain a stockpile of the following materials at a location within reasonable travel time to the Diascund Dam. Appendix E includes additional supplies and resources with contact and access information.

- Sandbags
- Floodlights with generator power

Waterworks may stockpile the following emergency supplies at the Diascund Pump Station or in local observer/operator vehicles.

- Flashlights
- Rope
- Personal Flotation Devices
- Fire extinguisher (especially if using a generator)
- Safety vests

ESC and/or VDOT should maintain a stockpile of barricades at a location within reasonable travel time to the Diascund Dam and downstream area for closing roadways.

H. Recommended Actions for Failure Prevention

As previously described, Table 6.4 can be used to identify potential emergency conditions by visual surveillance. Monitoring of instrumentation and weather conditions can be used to identify potential flooding due to heavy and prolonged rain events.

After a potential emergency condition has been identified and classified, Figure 6.1 directs the immediate response related to emergency notifications and evacuations. As recommended in Section VI, after any condition is identified, surveillance should be increased and the structural condition of the dam evaluated by a qualified engineer.

I. Methods for Notification and Warning to Evacuate

Methods for notification and warning to evacuate include:

(1) Reverse 911 automated phone system
(2) Subscription based automated paging alert system
(3) Police/fire/sheriff radio dispatch vehicles with loudspeakers, bullhorns, etc.
(4) Personal runners for door-to-door alerting

J. Evacuation Procedures

Once local ESCs have been notified of any problem at a dam site, they should take appropriate protective measures in accordance with their local Emergency Operations Plan, and accompanying EAP and SOPs.

1. Monitor the situation and, if time permits, review of evacuation plans.
2. Begin Alert, Notification, and Warning.
3. Immediately evacuate the inundation areas, if conditions warrant.
4. Expand Direction and Control as well as begin Emergency Public Information and operating shelters.
5. Provide Situation Reports to the Regional Coordinator for Local Support Services Division of the Virginia Emergency Operations Center. See Section II for contact information.

IX. INUNDATION MAPS

Inundation maps have been prepared for Diascund Dam and show the approximate boundaries of inundation for a sunny day dam failure event, the 100-year flood event with emergency spillway activation, the PMF event, and the PMF with dam failure event. The methodology used to develop the inundation maps has been provided in Appendix A.

The failure of a dam is a complex hydraulic occurrence which can result in unexpectedly high depths of flow. Debris and the effect of encroachments can raise the water surface significantly. These local effects were not modeled in detail when computing the flooded areas shown on the inundation maps. Because of the limitations of the methods and procedures used to develop the flooded areas, the user of the flood inundation maps is advised that the limits of flooding shown are approximate and should be used solely as guidelines for the establishment of evacuation zones.

The information contained in this map is prepared for use in notification of downstream property owners by emergency management personnel.

Diascund Creek Dam Inundation Map

September 2011

Sheet 3 of 3

X. LISTS OF PARCELS IMPACTED

A table of residences and businesses that are impacted during precipitation and other emergencies has been prepared for Diascund Dam. The tables were developed from the inundation maps provided in Section IX and include the estimated time to the flood-wave arrival and estimated maximum inundation.

As indicated in the Section IX, the failure of a dam is a complex hydraulic occurrence which can result in unexpectedly high depths of flow. The estimated time to the flood-wave arrival and the maximum inundation do not reflect local effects from debris accumulation and encroachments. The user of the tables is advised that the estimates of flooding depth are approximate and should be used solely as guidelines for the evacuations.

In addition, the tables should not be interpreted as limiting the evacuations to these properties. Emergency Services may expand evacuations to adjacent areas as deemed necessary for the prevailing conditions.

The residences and businesses impacted are separated by jurisdiction, James City County and New Kent County. Separate tables are provided for sunny day dam break, emergency spillway activation, and PMF with dam break events.

XI. APPENDICES

Appendix A – Diascund Creek Dam, Hazard Classification Opinion, URS Corporation

Appendix B – Plans for Training, Exercising, Updating, and Posting the EAP

Appendix C – Site Specific Concerns

Appendix D – Public Roads Downstream of Dam

Appendix E – Additional Resources

APPENDIX A

Diascund Creek Dam
Hazard Classification Opinion
By URS Corporation
September 2011

APPENDIX B

Plans for Training Exercising, Updating, and Posting the EAP

1. **Training**

   EAP training, generally, will be offered to Waterworks' staff once a year.

   a. Included in this training will be a generic version of a table top exercise that requires the decision to evacuate homes and businesses in harm's way downstream.

   b. Time permitting, a second scenario will be presented that does not lead to an evacuation order being given.

2. **Exercises**

   a. **Table Top Exercises** – Table top exercises will be held, at a minimum, once every 6 years.

   b. **Drills** – A drill will be conducted each year by the owner except when a table top exercise is required.

3. **Updating**

   This EAP will be checked yearly during the drill exercise by Waterworks to determine if names, addresses and telephone numbers of the people shown in Section II are accurate. The document will be updated at any time when a major change is determined to have occurred.

4. **Posting**

   This document will be on file with Waterworks, the James City County and New Kent County Emergency Services, the DCR Division of Dam Safety Regional Engineer, and at the Virginia Department of Emergency Management.

APPENDIX C

Site Specific Concerns

The emergency spillway consists of a soil-cement spillway apron with top elevation of 22.94 (NAVD 88) beneath an earthen fuse-plug dike with top elevation 29.04 (NAVD 88). The fuse-plug dike is designed to be overtopped and wash-out during a 100-year storm event, 24 hours in duration and with reservoir levels starting at normal pool elevation of 24.94 (NAVD88). The fuse-plug dike was designed to wash out approximately 30 minutes after being overtopped; however, the actual erosion rate will vary, and the time to complete wash out could be significantly shorter. During cold weather, the erosion rate may decrease and the time to complete wash out could be significantly longer, or complete wash out may not occur.

During a rain event, people immediately below the dam or those whose evacuation route would be blocked need to be evacuated prior to erosion of the fuse-plug dike. Therefore, it is imperative that the local observer continue observation of the emergency spillway as the reservoir level reaches the Stage 2 emergency trigger elevation of 27.5 (NAVD 88, 3.5 feet over concrete crest of principal spillway) and continues to rise. The local observer must also maintain contact with the ES personnel as there may be very little time to evacuate residences and personnel between the dam and US Route 60. Based on the dam break inundation mapping, US Route 60 would also be inundated following the wash-out of the fuse-plug dike.

Certification by Dam Owner/Operator

I certify that procedures for implementation of this Emergency Action Plan have been coordinated with and a copy given to each local Emergency Management Coordinator and/or Sheriff serving the areas potentially impacted by the dam. Also, that a copy of this Emergency Action Plan has been filed with the Virginia Department of Emergency Management in Richmond and a copy of the Dam Break Inundation Map has been provided to the local government office with plat and plan approval authority or zoning responsibilities as designated by the locality for each locality in which the dam break inundation zone resides; that this plan shall be adhered to during the life of the project; and that the information contained herein is current and correct to the best of my knowledge.

(Signature of Dam Operator)

II. EMERGENCY ACTION PLAN OVERVIEW

The following Table shall be used to assess emergency conditions and determine the emergency stage that will direct subsequent notification and response actions.

Step 1: Emergency Condition Detection	Event Detection - See Section VI		
Step 2: Emergency Level	Assess Situation: Determine Emergency Level Using Section VI		
	Emergency Stage 1 Non-Emergency Incident; Slowly developing situation See Definition Below	**Emergency Stage 2** Potential dam failure situation; Rapidly developing situation See Definition Below	**Emergency Stage 3** Urgent; Dam failure is imminent or in progress See Definition Below
Step 3: Notification & Communication	**Stage 1** Notification See Flow Chart Section III A	**Stage 2** Notification See Flow Chart Section III B	**Stage 3** Notification See Flow Chart Section III C
Step 4: Expected Action	Inspect Dam Every 6 hrs: Monitor & Listen to Weather Forecasts	Inspect Dam Every 2 hrs: Notify Emergency Responders	Constant Inspection of Dam: Notify Emergency Responders, Close Road, and Notify Property Owners
Step 5: Termination and Follow Up	Termination of Monitoring Conditions at the Dam and Proceed to Evaluate Damages and Plan for Repairs as Required		

Surveillance monitoring and observing instrument readings at the dam will be the normal methods of detecting potential emergency situations. For conditions beyond the normal range of operations contact the Dam Operator for assistance with evaluation of the conditions: Each event or situation will fall into one of the following Stages.

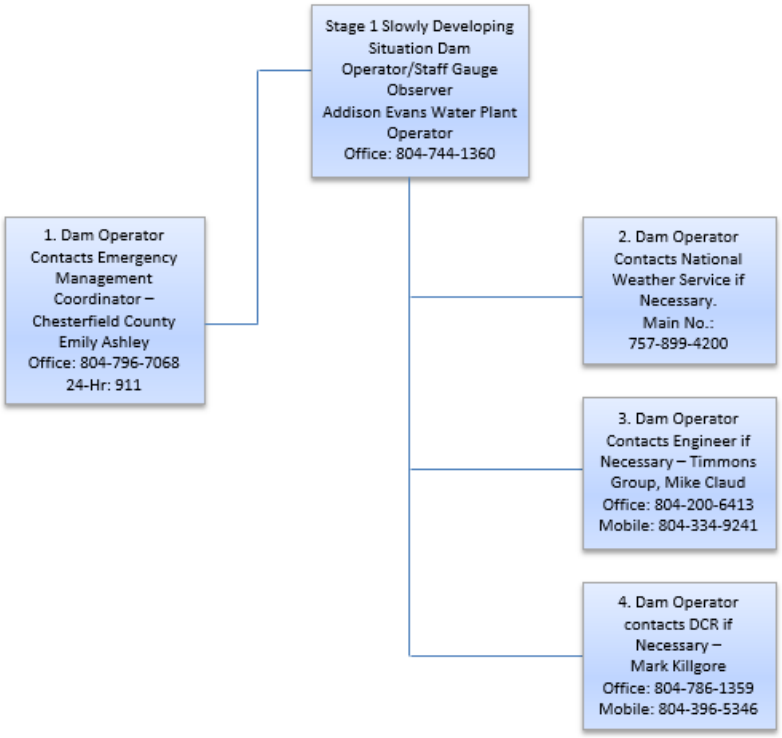

Emergency Definitions:

A. Stage 1 – Non-emergency, failure unlikely, storm development or operational malfunctions are slow in escalation to a potential emergency. This Stage indicates a situation is developing such that the dam is not in danger of failing, but if it continues failure may be possible.

B. Stage 2 – Potential Failure, storm development or operational malfunction are quickly accelerating that could result in failure of the dam. This Stage indicates that a situation is developing that could result in a dam failure.
C. Stage 3 – Imminent Failure, storm or operational malfunction has reached a point that the failure of the dam has started or is imminent. This Stage indicates dam failure is expected or occurring and may result in flooding that will threaten life and/or property.

III. NOTIFICATION FLOW CHARTS

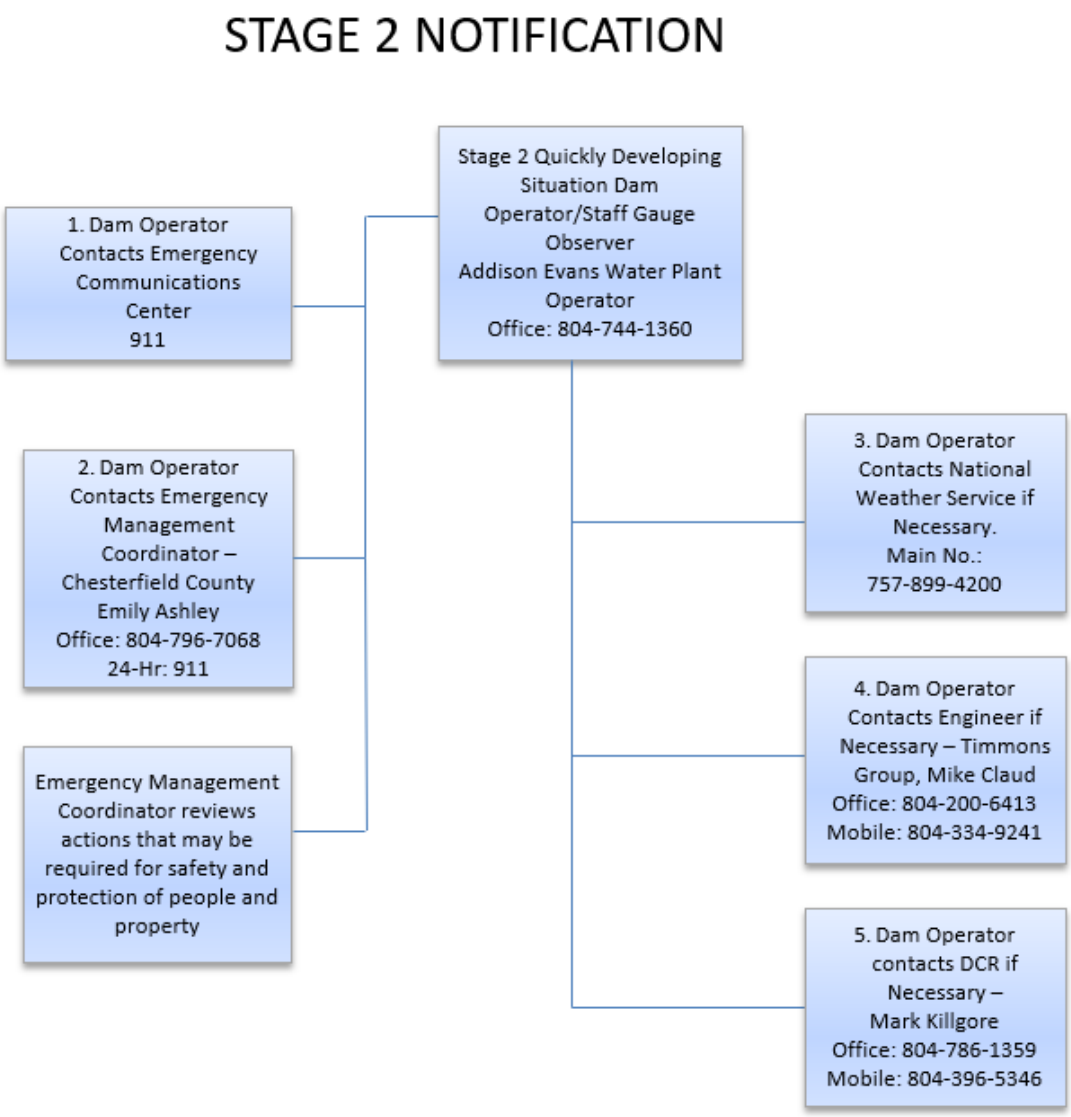

A. STAGE 1 NOTIFICATION

*1, 2, 3, etc. denotes order of calls
Message from Dam Operator to Emergency Communications and Emergency Management Coordinator:
(Note: County staff must fully open one of the discharge gates at this stage)

*"This is **(Insert Dam Operator's Name)**, Dam Operator for the Swift Creek Dam located on Hull Street Road. I am calling to notify you that a Stage 1 non-failure emergency situation has been declared at the dam, as required in the Emergency Action Plan. We will continue to monitor the situation and will notify you as conditions warrant."*

B. STAGE 2 NOTIFICATION

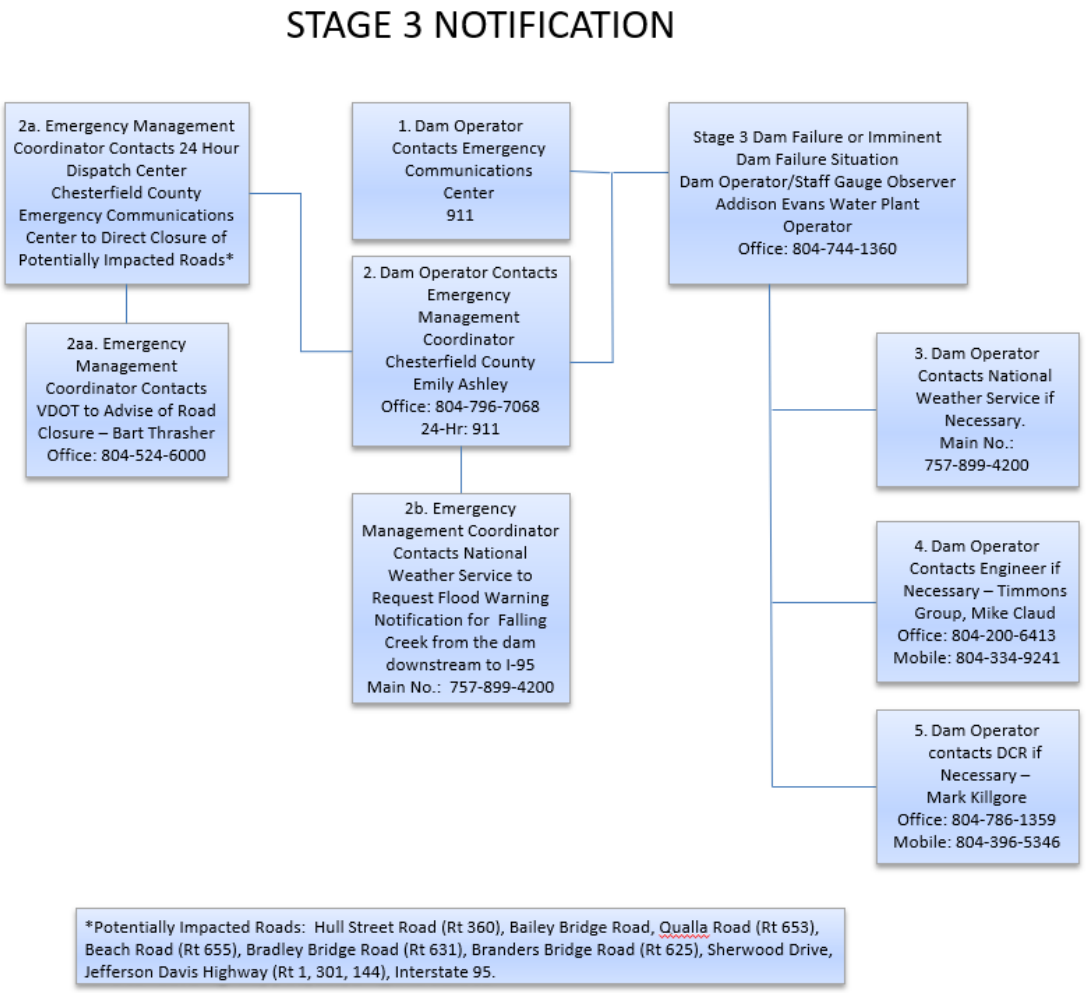

Note: 1, 2, 3, etc. denotes order of calls

Message from Dam Operator to Emergency Communications and Emergency Management Coordinator:

*"This is **(Insert Dam Operator's Name)**, Dam Operator for the Swift Creek Dam located on Hull Street Road. I am calling to notify you that a Stage 2 quickly developing emergency situation has been declared at the dam, as required in the Emergency Action Plan. We will continue to monitor the situation and will notify you as conditions warrant."*

STAGE 3 NOTIFICATION

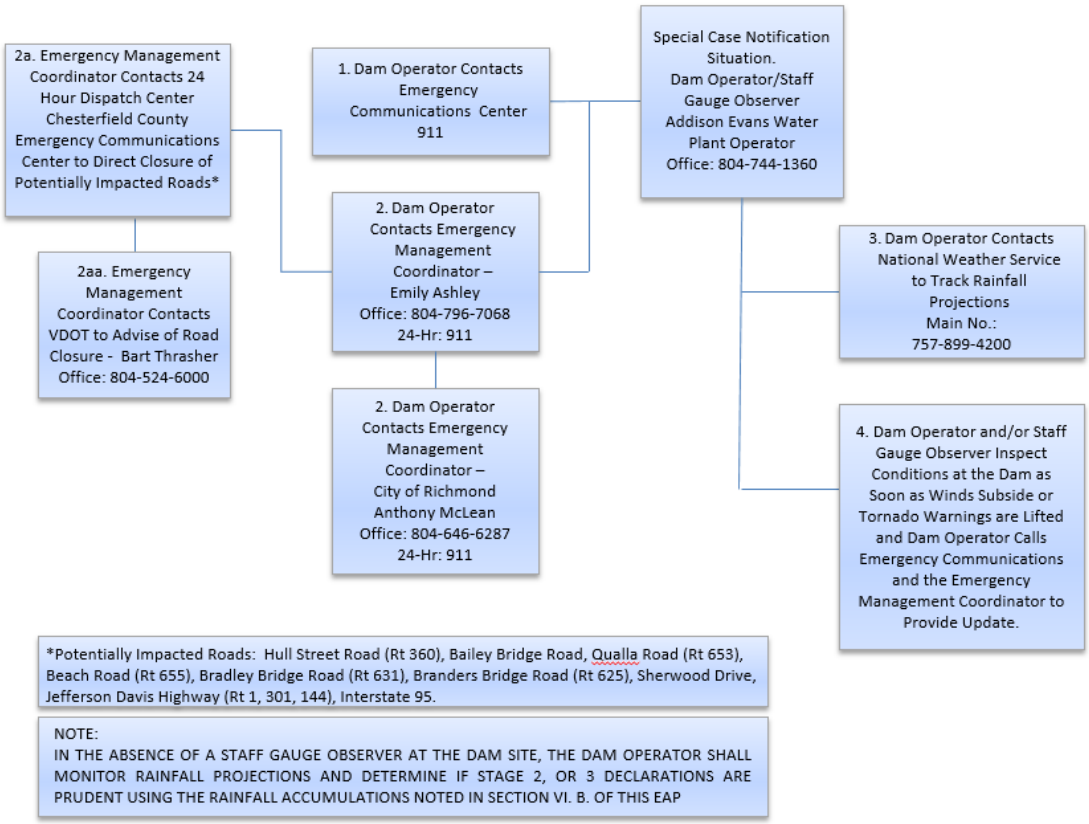

Note: 1, 2, 3, etc. denotes order of calls

Message from Dam Operator to Emergency Communications and Emergency Management Coordinator:

*"This is **(Insert Dam Operator's Name)**, Dam Operator for the Swift Creek Dam located on Hull Street Road. I am calling to notify you that a Stage 3 Imminent Dam Failure or Dam Failure emergency situation has been declared at the dam, as required in the Emergency Action Plan. Please proceed with closing all potentially impacted roads. Dam overtopping is imminent and a downstream evacuation should be initiated. We will continue to monitor the situation and will notify you as conditions warrant.*

C. SPECIAL CASE NOTIFICATION

This Special Case Notification shall be implemented when sustained winds reach 50 miles per hour or greater, or tornado warnings are issued and the Staff gauge Observer is called in from the field and is unable to continue to monitor conditions/water levels at the dam.

Note: 1, 2, 3, etc. denotes order of calls

Message from Dam Operator to Emergency Communications and Emergency Management Coordinator:

*"This is **(Insert Dam Operator's Name)**, Dam Operator for the Swift Creek Dam located on Hull Street Road. I am calling to notify you that due to dangerous conditions the Staff Gauge Observer is being called in from the site requiring a "Special Case Notification", as required in the Emergency Action Plan. Please proceed with closing all potentially impacted roads. We will inspect the dam as soon as winds subside or tornado warnings are lifted and will update you concerning conditions at the dam.*

IV. STATEMENT OF PURPOSE

The purpose of this Emergency Action Plan is to safeguard the lives and reduce damage to the property of citizens of Chesterfield County living and/or working in the vicinity of Swift Creek Reservoir from the dam to Interstate 95 in the event of failure of Swift Creek Dam.

Impounded water upstream of Swift Creek Dam when released uncontrollably may threaten lives in the flow path downstream or cause damage to property and roads in its way. This uncontrolled release occurs when the dam or a part of the dam breaks and stored water is released.

V. PROJECT DESCRIPTION

Swift Creek Reservoir Dam is located along Swift Creek approximately 0.35 miles upstream of Hull Street Road in Chesterfield County, Virginia. The Chesterfield County Utilities Department owns the dam and the approximate 1,635-acre lake that it impounds. The lake serves as a water supply and recreational facility. The **High Hazard** dam is approximately 37.5 feet in height and has a maximum storage capacity of approximately 56,015 acre feet. Failure of the dam would cause downstream property damage, adverse impacts to stream channels and riparian areas, extensive flooding and possible damage to roads which are located in the inundation zone area downstream of the dam.

Swift Creek Dam is an earthen dam with a contributing drainage area of about 65 square miles. The normal pool elevation is 177.0 feet and the top of the dam is approximately 193.5 feet. The principal/emergency spillway consists of overflow at the 177.0 elevation.

VI. EMERGENCY DETECTION, EVALUATION AND CLASSIFICATION

A. Detection

The Staff Gauge Observer and the Dam Operator will generally be responsible for detecting emergency conditions at the dam, particularly during significant rain events. However, unusual or emergency events may be prompted by the following:

- Observations at or near the dam by the dam owner or his representative (including the Professional Engineer), government personnel (local, state, or federal) visitors to the dam, or the public.
- Earthquakes felt or reported in the vicinity of the dam.
- Threats or actual sabotage and/or vandalism at the dam.
- Forewarning of conditions which may cause an unusual event or emergency such as a severe weather or flash flood forecast.

The staff gauge observer is responsible for inspecting the dam annually and completing the appropriate inspection form. The staff gauge observer also makes cursory inspections at least once per month to check on the condition of the principal spillway, observe the dam embankment, and confirm that mowing has been completed. A professional engineer inspects the dam every two years, completes the appropriate inspection form and seals it. Any deficiencies noted during these inspections are evaluated by the dam operator to determine if an emergency condition exists.

B. **Evaluation and Classification**

The specific milestones that trigger the progression from Stage 1 (slowly developing condition, dam not in danger of failure but downstream flooding is possible), to Stage 2 (quickly developing conditions that could cause the dam to fail if conditions continue to escalate), to Stage 3 (impending or actual failure) are provided in this section of the EAP. The height of the water surface level within the spillway is used as an indicator of the potential impacts downstream or in the absence of actual water surface level data, rainfall (in inches) measured near the watershed may be used to help classify emergency conditions.

1. **The following will initiate a Stage 1 Emergency:**
    a. **Stage 1 Emergency 5.0 feet or elevation 182.0 feet**
    b. **A flood watch is issued by the National Weather Service for Chesterfield County.**

2. **The water surface height above normal pool that will initiate a:**
    a. **Stage 2 Emergency 7.5 feet or elevation 184.5 feet**
    b. **Stage 3 Emergency 10.0 feet or elevation 187.0 feet**

3. **Frequency of observations by rainfall/staff gauge observers during:**
    a. **Stage 1: 6 hours; Stage 2: Hourly; Stage 3: Continuous**

*The Staff Gauge Observer should use access routes to the dam bearing in mind that road crossings at small streams may be flooded.

4. **Public Roads at the toe of, and downstream from, Swift Creek Dam:**

    a. Hull Street Road (Route 360) is located roughly 0.35 miles downstream of Swift Creek Dam and must be closed during a Stage 2 or 3 Emergency or if special conditions warrant (i.e., the staff gauge observer is called in from the field due to dangerous weather conditions).

    b. Bailey Bridge Road, Qualla Road (Rt 653), Beach Road (Rt 655), Bradley Bridge Road (Rt 631), Branders Bridge Road (Rt 625), Sherwood Drive, Jefferson Davis Highway (Rt , 301, 144), and Interstate 95 are all located downstream from Swift Creek Dam and may need to be closed during a Stage 3 Emergency or if special conditions warrant (i.e., the staff gauge observer is called in from the field due to dangerous weather conditions).

*The Chesterfield Police Department is responsible for closing roads in Chesterfield County. When the Police Department closes a road, they contact VDOT's Richmond District Administrator, Bart Thrasher (Office) 804-524-6000.

Table VI.1. Emergency Condition and Classification can be used for guidance in determining the proper emergency stage for various situations. This table has been provided for general guidance and may not address all potential situations. A situation listed in the

table could potentially be categorized as an emergency condition other than what is listed, given all contributing factors.

Table VI.1. Emergency Condition and Classification

	Situation	Emergency Level
Spillway Flow	Spillway flowing with active gully erosion	2
	Spillway flowing with advancing head cut that is threatening the control section	3
Embankment Overtopping	Any overtopping flow within 0.5 feet of the top of the dam, water level rising	3
Seepage	New seepage areas on or near the dam	1
	New seepage areas with cloudy discharge or increasing flow rate	2
	Rapid flow rate increase with cloudy discharge from seepage area(s)	3
Sinkholes	Observation of new sinkhole on embankment	1
	Rapidly enlarging sinkhole	3
Embankment Cracking	New cracks in the embankment greater than 1/4 inch wide without seepage	1
	Cracks in embankment with seepage	1
	Cracks in embankment with rapidly increasing seepage	3
Embankment Movement	Visual movement of the embankment slope	1
	Sudden or rapidly progressing slides of the embankment slopes	3
Vortex in Pond	Whirl pool with discharge downstream	3
Earthquake Security Threat, Sabotage & Vandalism	Measurable earthquake felt or reported on or within 50 miles of the dam	1
	Earthquake resulting in visible damage to the dam	2
	Earthquake resulting in potential uncontrolled release of water from the dam	3
Security Threat, Sabotage & Vandalism	Verified bomb threat that, if carried out, could result in damage to the dam	1
	Detonated bomb that has resulted in damage to the dam or its appurtenances	2
	Damage to the dam or appurtenances with no impacts to the functioning of the dam	1
	Damage to the dam or appurtenances that has resulted in seepage flow	1
		3

	Damage to the dam or appurtenances that has resulted in a potential uncontrolled water release	

VII. GENERAL RESPONSIBILITIES UNDER THE EAP

A. Impounding Structure Owner Responsibilities

1. The dam operator **is responsible** for notifying the local Emergency Management Coordinator of any problem or potential problem at the dam site.
2. The dam operator **will determine** when Stage 1, Stage 2, or Stage 3 conditions are met at the dam.
3. The dam operator **will initiate** dam surveillance under the Stage 1 conditions, when a flood watch is issued by the National Weather Service.
4. The dam operator **will activate** the low level outlet, if possible, when a Stage 2 condition is met at the dam.

B. Responsibility for Notification

1. The dam operator **will notify** the 24-hour Emergency Communications Center and the local Emergency Management Coordinator when Stage 1 conditions are met.
2. The dam operator **will notify** the 24-hour Emergency Communications Center and the local Emergency Management Coordinator when Stage 2 conditions are met in order to alert them to review actions that may be required for the safety and protection of people and property.
3. The dam operator **will notify** the 24-hour Emergency Communications Center and the local Emergency Management Coordinator when special conditions are met requiring the staff gauge observer to be called in and alert them to close all downstream, potentially impacted roads.
4. The dam operator **will notify** the 24-hour Emergency Communications Center and the local Emergency Management Coordinator when Stage 3 conditions are met in order to alert them to close all downstream, potentially impacted roads.
5. The Chesterfield County Emergency Management Coordinator **will notify** the Police and Fire Departments to close all downstream, potentially impacted roads when Stage 3 conditions, or special conditions requiring the staff gauge observer to be called in, are met.
6. The Chesterfield County Emergency Management Coordinator **will notify** the VDEM when Stage 2 or Stage 3 conditions are met.
7. The Chesterfield County Emergency Management Coordinator **will notify** the National Weather Service to request a flood warning notification if Stage 3 conditions are met.
8. The National Weather Service **will issue** a warning notification alerting that flooding is likely to occur, or is occurring, along Swift Creek downstream of the dam if Stage 3 conditions are met.
9. The Chesterfield County Police Department **will notify** VDOT if potentially impacted roads are closed.

10. The dam operator **will notify** the engineer if necessary when Stage 1, Stage 2, or Stage 3 conditions are met.
11. The dam operator **will notify** DCR if necessary when Stage 1 conditions are met.
12. The dam operator **will notify** DCR when Stage 2 or Stage 3 conditions are met.

C. Responsibility for Evacuation

1. The dam operator(s) shall be responsible for notifying the County Emergency Services coordinator(s) should conditions requiring immediate evacuation of the downstream affected property owners occur. The County Emergency Services coordinator(s) shall be responsible for ensuring the Police department, Fire department and other local agencies are informed of the downstream property owner notification and evacuation requirements. Warning and evacuation planning are the responsibilities of local authorities who have the statutory obligation. Under the EAP, the dam owner is responsible for notifying the appropriate emergency management officials when flooding is anticipated, or a failure is imminent or has occurred. This procedure should be coordinated with the appropriate public officials before an emergency situation develops.

D. Responsibility for Termination and Follow-Up

1. Whenever the EAP has been activated, and an emergency level has been declared by the dam operator, conditions must be monitored until the event is terminated by the Emergency Management Coordinator. The dam operator will advise the Emergency Management Coordinator as conditions change and emergency levels increase or decrease between Stages 1, 2 or 3, or when downstream flooding subsides following a Stage 3 emergency. Under a Stage 3 emergency the staff gauge observer will remain at the dam until released by the dam operator upon termination of the event by the Emergency Management Coordinator.
2. Should overtopping at the dam occur or flows cause damage to the spillway, an inspection shall be conducted by a licensed professional engineer. A copy of the findings of each inspection with the engineer's recommendations shall be filed with the DCR within a reasonable period of time not to exceed 30 days subsequent to completion of inspection.
3. Post flood event discussions should be used to determine strengths and weaknesses in the Emergency Action Plan while the experience is fresh in the minds of those involved in the emergency situation.

E. EAP Coordinator Responsibility

1. Provide leadership to assure the EAP is reviewed and updated annually and copies of the revised EAP are distributed to all plan holders.
2. Facilitate tabletop exercises to test the EAP, to be held at a minimum of once every six years, although more frequent exercises are encouraged.

3. Conduct annual drills which should include, to the extent practicable, face-to-face meetings with local emergency management agencies responsible for road closure and issuance of warnings.
4. Certify to the DCR annually that exercises and/or drills have been completed. Provide DCR with any revisions or updates to the EAP or a statement that no revisions are needed.
5. Maintain accurate record of plan holders. At a minimum EAP holders should include:
    a. The Chesterfield County Utilities Department, the Dam Owner
    b. The Addison Evans Water Plant Dam Operator(s)
    c. The Addison Evans Water Plant Staff Gauge Observer(s)
    d. DCR Division of Dam Safety
    e. The Chesterfield County Emergency Management Coordinator
    f. The Chesterfield County Emergency Communications Center
    g. The Chesterfield County Police Department
    h. The Chesterfield County Department of Fire and EMS
    i. Virginia Department of Emergency Management
    j. VDOT Richmond Residency Administrator
    k. Dam Owner's Engineer – Timmons Group

F. Methods of Notification and Warning

1. In the event of a Stage 3 level emergency the Emergency Management Coordinator will activate the Chesterfield County Emergency Alert System using a pre-scripted message similar to the following:

    "This is an urgent message from the Chesterfield County Department of Fire and EMS. The Swift Creek Dam located on Hull Street Road. I am calling to notify you that a Stage 3 Imminent Dam Failure or Dam Failure emergency situation has been declared at the dam, as required in the Emergency Action Plan. Please proceed with closing all potentially impacted roads. We will continue to monitor the situation and will notify you as conditions warrant. Be advised to stay away from the lake, dam and potentially flooded area as dangerous conditions are expected"

2. The message will be sent to area residents and property owners to include owners whose property is located within the projected inundation zone. A list of downstream affected properties within the *inundation zone* is provided in Appendix A.

G. Evacuation Procedures

1. The dam owner/operator should notify the County 24-hour Dispatch Center identified on page 5 of this EAP.
2. The Chesterfield County Office of Emergency Management should take the following protective measures in accordance with the local Emergency Operations Plan and accompanying EAP:

a. Notify the individuals who are directly downstream and in immediate danger. A list of the names and addresses of these individuals is provided in Appendix A of this EAP.
b. Monitor the situation and, if time permits, review the evacuation plans.
c. Begin alert, notification and warning of all Chesterfield residents through the use of the Emergency Alert System.
d. Aid in the evacuation of the projected inundation areas, if conditions warrant.
e. Provide situation reports to the Virginia Department of Emergency Management (434-971-1765).

VIII. PREPAREDNESS

A. Surveillance

Swift Creek Dam is attended under normal operating conditions. Addison Evans Water Plant is located at the dam and has staff onsite.

County staff should monitor the status of the weather fronts through the National Weather Service (NWS). The NWS maintains a hurricane center that reports on hurricanes, tropical storms and tropical depressions as they travel and affect coastal and inland areas. The web site address is: http://www.nhc.noaa.gov/

The expected response time to the dam from the staff gauge observer's home is be less than one (1) hour from the time they receive the information that a flood watch has been declared. The staff gauge observer should never put themselves in harm's way. In the event a hurricane or tropical depression occurs with high winds the staff gauge observer shall use extreme caution while monitoring conditions. See Section III. D., Special Case Notification on page 11 when the staff gauge observer must be called-in from the field due to weather conditions.

Preplanned access routes should be utilized given that small streams crossing under state roads may flood preventing safe access. The gauge observers and County staff should never attempt to cross a road that has flood water crossing it at a depth greater than one (1) foot unless the vehicle is specifically designed for that purpose.

Alternative routes should be chosen for access by foot in the event that a car is unsafe for use. Other alternative means of transportation may be considered.

As previously stated, routine inspections will be completed by the staff gauge observer. Indicators of the onset of problems that might cause failure of the dam include:

- Slumping, sloughing, or slides on the abutment
- Cloudy or dirty seepage with an increase in flow, boils, piping, or bogs
- Seepage around conduits
- Cracks, settlement, misalignment, or sinkholes
- Erosion or riprap displacement
- Animal burrows, especially those associated with beavers or nutria

- Growth of trees and brush
- Failure of operating equipment
- Abnormal instrument readings
- Excessive leakage of water from the joints
- Undermining of the dam
- Sabotage

If any of these indicators are observed the staff gauge observer will notify the dam operator immediately. The dam operator will visit the site, assess the condition and determine if an emergency exists. If Stage 1, 2, or 3 emergencies are declared the dam operator will make the appropriate notifications. The dam operator will call the engineer if necessary to develop a plan for action. These actions shall be conducted expeditiously as conditions warrant.

B. Response During Periods of Darkness

The staff gauge should be easily read from the location chosen by the staff gauge observer with a flashlight in the dark.

The staff gauge observer should monitor the water level and go to higher ground when the level rises within one (1) foot of overtopping the dam. The staff gauge observer should check the spillway outfall area for erosion once the spillway starts to flow.

C. Access to the Site

Access to the site in all weather conditions has been preplanned by the staff gauge observer and alternate observer to avoid areas of flooding. See Appendix B for proposed access routes from the nearest Chesterfield County Fire and EMS facility.

D. Response During Weekends and Holidays

Staff gauge observers live locally and will respond as needed on a 24 hours per day and a 7 days a week basis.

E. Response During Adverse Weather

Staff gauge observers live locally and will respond as needed on a 24 hours per day and a 7 days a week basis.

The staff gauge observer should never put themselves in harm's way. In the event a hurricane or tropical depression occurs with high winds, the staff gauge observer (and the observer on-site at the dam) should use extreme caution monitoring flood conditions at the dam. See Section III. D., Special Case Notification on page 11 when the staff gauge observer must be called-in from the field due to weather conditions.

Each staff gauge observer should have protective clothing adequate to ensure their safety at all times during any on-site response to the dam.

F. Alternative Systems of Communications

Communications during a major rainfall event may be problematic. Cellular telephones will likely be used as the first means of communication since there are no land lines at the dam for the staff gauge observer to use. When cellular calls are not transmitted due to heavy usage such as in a hurricane, texting may be a viable communication substitute. The dam operator(s), staff gauge observers and Emergency Response teams can also use two-way radios to send and receive messages as back-up communication. The staff gauge observer should take a two-way radio to the dam site when deployed, unless deployed straight there from home. A two-way radio may be delivered to the staff gauge observer if he/she is deployed from home.

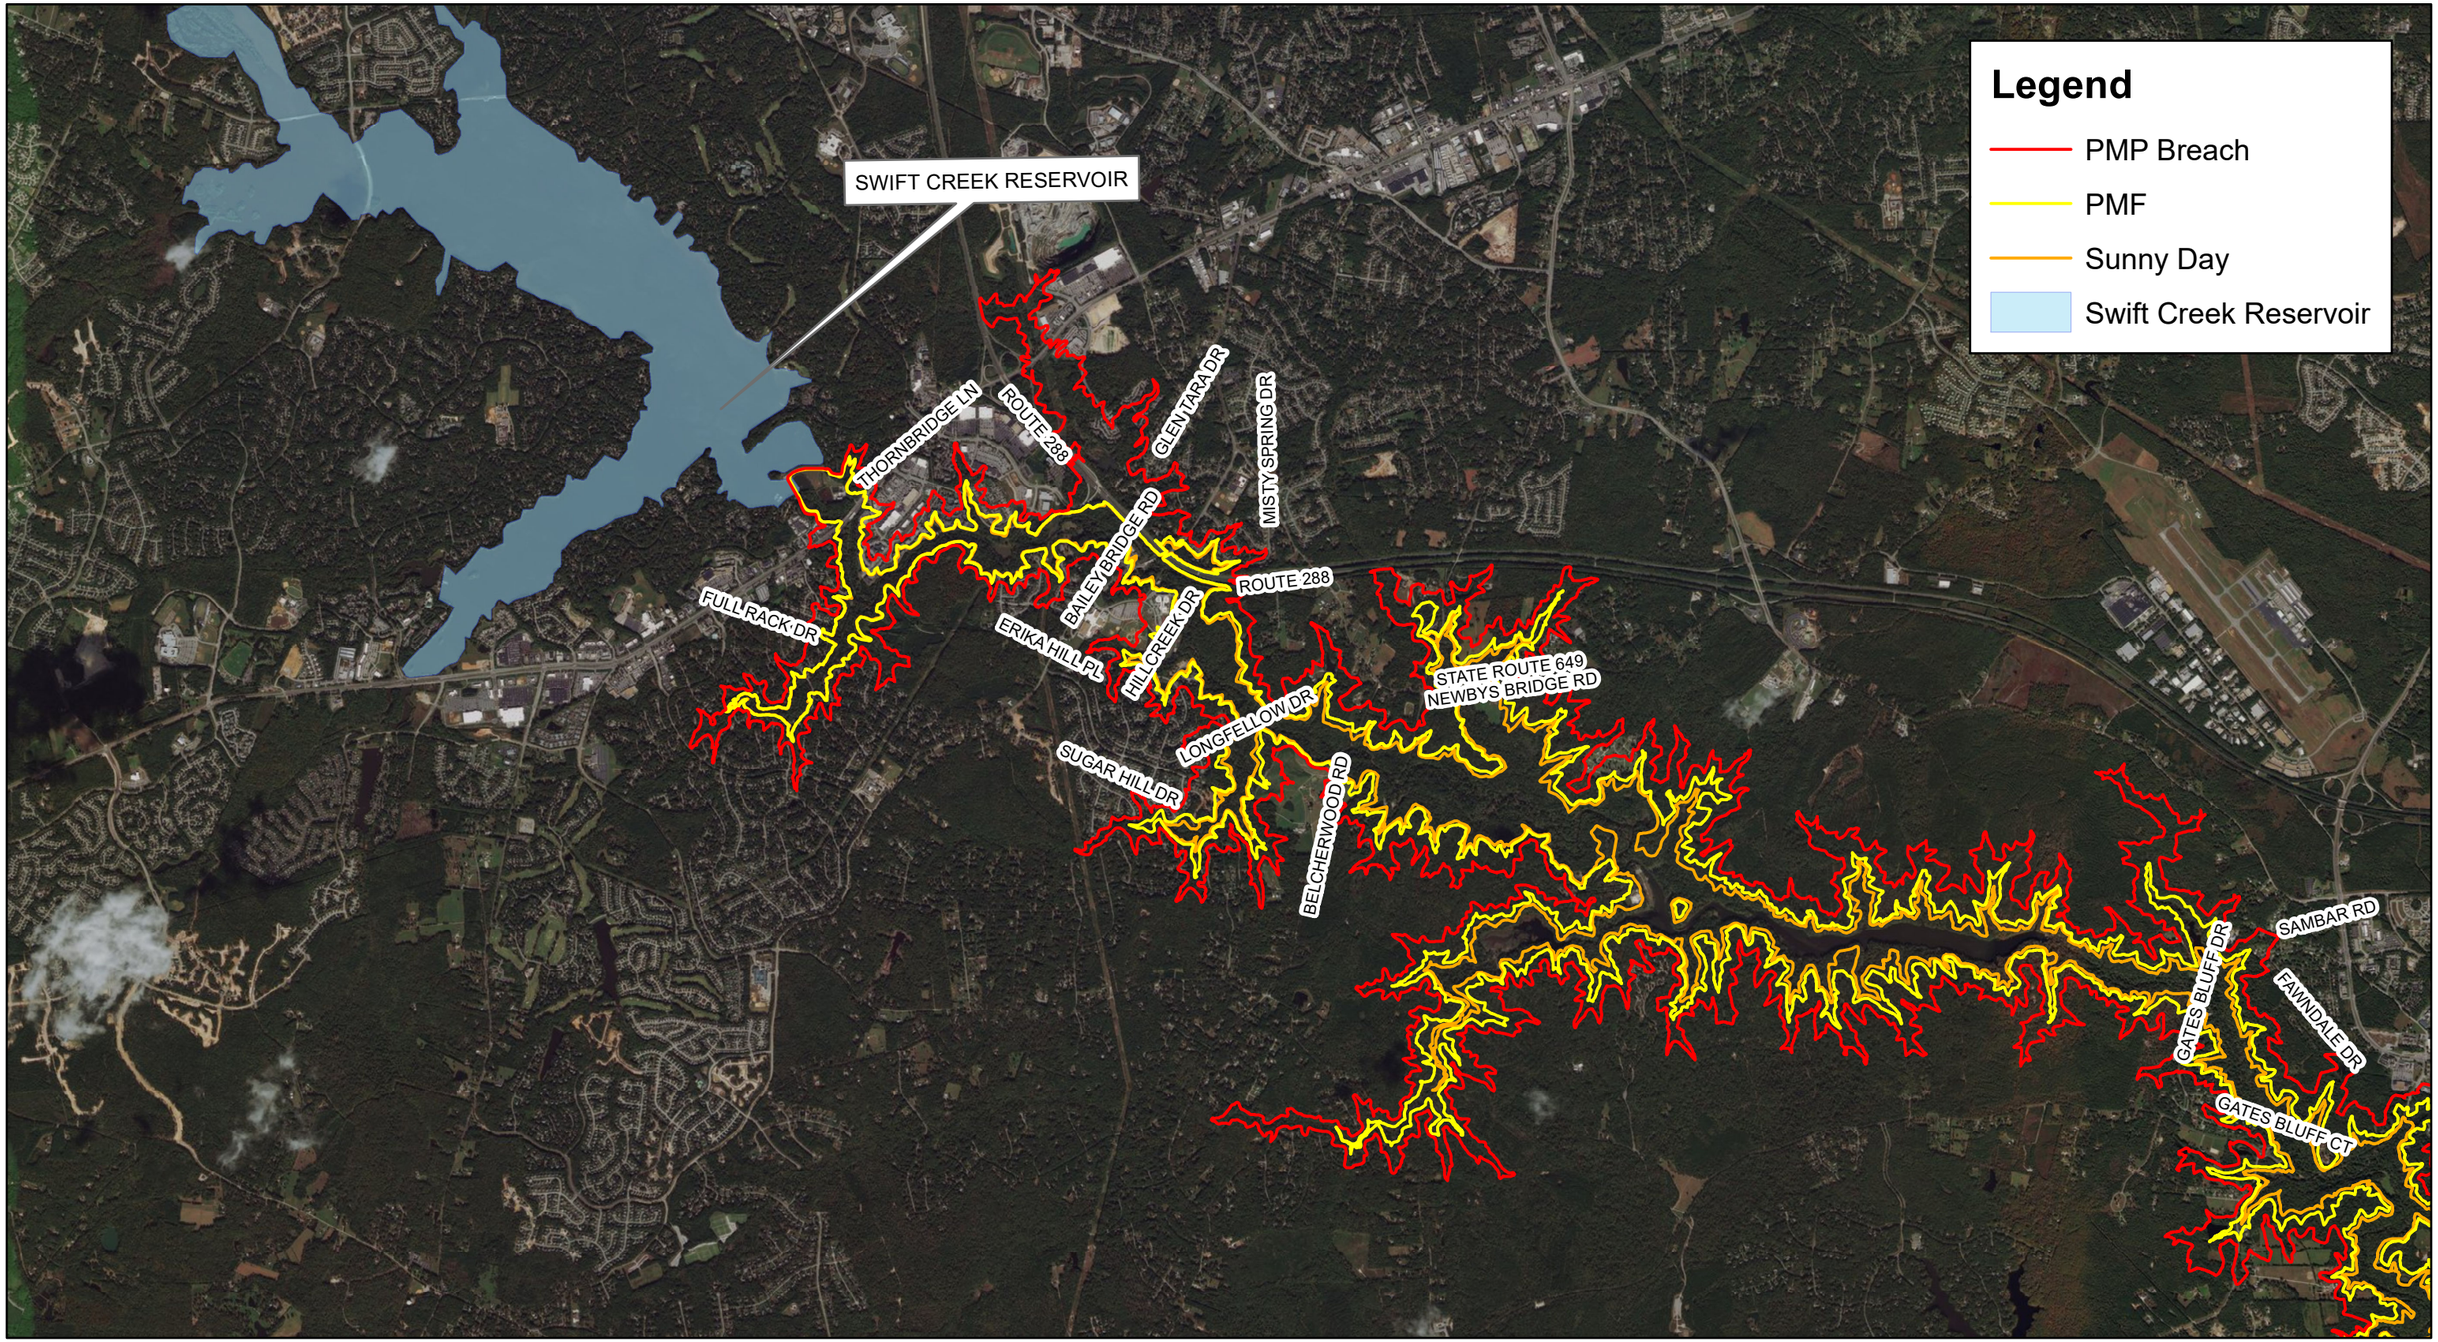

G. Emergency Supplies

Stone and gravel can be purchased locally from:

Martin Marietta
Midlothian Quarry
3636 Warbro Road
Midlothian, Virginia 23113
(804) 744-1130

Dam Safety Data Sheet

Department of Conservation and Recreation
Division of Dam Safety and Flood Plain Management
600 E Main St, Richmond, VA 23219

General

Name of Dam: Swift Creek Reservoir Dam

Inventory Number: 041012

Hazard Classification: High

City/County: Chesterfield County

Designed By:

Constructed By:

Regional Engineer: Mark Killgore

Year Constructed: 01/01/1965

Dam Owner:
George Hayes
(primary)(804) 318-8140(Office); (804) 513-3411(Mobile)
P.O. Box 40
Chesterfield VA, 23832

Size Classification: Large (>=50,000 ac. ft., >=100')

Certificate Type: Regular Operation and Maintenance Certificate

Certificate Expiration: 08/31/2025

Days Since Last Inspection: 484

Inundation Report: 07/17/2013

Type of Dam
Earth (Primary)

Reservoir Purpose
Water Supply (Primary)
Recreation (Primary)

Type of Spillway

Type	Width	Outlet Gates

Watershed

Nearest City:

Nearest City Distance: 0.04 Miles

River or Stream: SWIFT CREEK

Technical Basics

Normal Pool Area: 1660.00 Acres

Top Surface Area: 3325.00 Acres

Normal Pool Capacity: 12173.00 Acre-Feet

Top Capacity: 50590.00 Acre-Feet

Normal Pool Elevation: 177.00 Feet

Top Elevation: 194.00 Feet

Normal Pool Height: 27.00 Feet

Top Height: 44.00 Feet

Technical Hydrology/Hydraulics

Controlling PMP:

Drainage Area: 64.32 Sq. Mi.

6 Hour PMP:

Time of Concentration:

12 Hour PMP:

Weighted Curve Number:

24 Hour PMP:

IDA Spillway Reduction:

Available Spillway Design Flow: .90 PMP **Required Spillway Design Flow**: .90 PMP

Inspections (Last 3 Max)

Date	Type	Condition
12/16/2019	Engineer	Satisfactory
8/28/2018	Engineer	Satisfactory
4/11/2016	Owner	Satisfactory

EAP Quick Reference

Approval Date: 04/08/2019
Expiration Date: 04/08/2025

Dam Location

Dam Address:
6610 Public Safety Way
Chesterfield VA, 23832

E911 Direction to Dam:
24 Hour Dispatch Center, Chesterfield County Emergency Communications Center

Table F-4. History of Hurricane Events and Damages, 1827–2010

Date	Damages
August 24, 1827	The hurricane occurring on this date was severe on the coast and inland to the mountains and caused damage from Charleston to Baltimore.
October 22, 1878	The hurricane's eye made landfall at Cape Fear, moved north across Richmond and Washington, D.C. and seemed to lose little strength. The storm was thought to resemble that of Hurricane Hazel in 1954. Winds downed trees and fences and unroofed homes.
September 29, 1896	A hurricane killed 16 people and did almost $4 million in damages up the Eastern Seaboard. On June 14, 1951 after a tornado had struck the city, the Richmond News Leader wrote, "Tornado recalls windstorm of 1896 to older residents..." Speaking of September 29, "torrential rain and very high wind for several hours in the evening. Wind estimated at 80 mph caused a steeple to fall." Damage in Richmond was estimated at approximately $4 million.
August 23, 1933	On the evening of August 22, 1933, a tropical storm entered Virginia producing strong winds with gusts up to 80 mph and rain that continued into August 23. This storm event caused no injuries but significant damage due to high winds and heavy rain. Telephone and electric service were disrupted throughout all areas. Damage was mostly to trees, roofs, and awnings. Falling debris was a major concern. Many trees were uprooted causing damage to residences, blocking roads, and knocking down fences and utility lines. Trees also downed high-tension electric lines in the City of Petersburg causing manufacturing plants to be idle. Many houses suffered flood damage. Crops (e.g., corn, tobacco) and fruit trees were destroyed due to the high winds and rain. Other areas in the Tidewater region had significantly more damage. Storm surge in the bay and tidal estuaries was the highest of record and coincided with astronomical high tide. The water level reached a maximum of 8 feet in Hampton Roads. City of Hopewell: The Richmond Petersburg Highway was covered with several feet of water and several boats were washed away or severely damaged. Surry County: Heavy damage to towns and beaches along the James River were reported. The pier at Jamestown Surry Ferry was severely damaged. Almost all of the cottages and stores at Burwell's Bay were completely destroyed. The Claremont Ferry dock was swept away. The Crouch's Creek bridge was destroyed. Many houses had flood damage and several boats were damaged or washed up on land. Sussex County: High winds blew off several roofs. One-fourth of the trees were uprooted in Stony Creek. (Sources: The Progress-Index and the Sussex-Surry Dispatch)
September 5, 1935	"The Great Labor Day Hurricane." Heavy rains fell over central Virginia from the storm and a major flood resulted on the James River in Richmond. Richmond: Water level at the Richmond locks reached 23.7 feet, which is more than 15 feet above flood stage.

Table F-4. History of Hurricane Events and Damages, 1827–2010

Date	Damages
August 15, 1940	Several days of rainfall produced record rising waters in the James, Appomattox, and Nottaway Rivers. The James River crested at 25 feet and the Appomattox River rose to 19.6 feet above typical levels, higher than the Johnstown Flood of 1889. This flood blocked main highways in all directions of Petersburg. Many arterials and secondary roads were closed. Highway closures included Routes 1, 15, 26, 31, 32, 35, 39, 40, 42, 45, 49, 56, 58, 117, 158, 195, 196, 301, 304, 312, 460, 501, and Campbell's Bridge. The bridge over Stony Creek was washed out. Riverfront properties were flooded. Union Station was flooded and several platforms washed out. About 4,000 feet of railroad track was under water. Crops were severely damaged. Tobacco and peanut crops suffered most in Southside counties with greatest losses for Dinwiddie, Surry, Sussex, and Greensville Counties. The Appomattox and Buffalo Rivers isolated Farmville. Sewer lines along South Street broke leaving large craters. The canal under Fleet Street overflowed flooding Fleet Street and neighboring homes. Damages were estimated at $100,000. City of Emporia: Meherrin River rose causing flooding on Main Street. The town exhausted its drinking supply. City of Hopewell: The city had 10.05 inches of rain. City of Petersburg: River Street was flooded from a 30-foot gap in the Appomattox River's south bank. Electric service was disrupted, many buildings flooded, and docks were covered with water. Surry County: This flood event caused the largest damage to crops. Sussex County: This flood event caused the largest damage to crops (2,000 acres destroyed), flooding fields and destroying several mills. (Sources: The Progress-Index and the Sussex-Surry Dispatch)
October 15, 1954	Hurricane Hazel produced record wind gusts over the eastern portion of Virginia and Maryland. Gusts to around 100 mph were common east of Richmond and Fairfax. In Virginia, 13 people died and statewide damage was conservatively estimated at $15 million. Peanut crops and farm buildings throughout the region were damaged. Thousands were without phone service during this event. Livestock were destroyed. City of Colonial Heights: Damages were similar to the City of Petersburg. City of Emporia: One person died and another was injured. Trees knocked out electric and telephone service for 48 hours. Greensville County: The Greenville County Courthouse was badly damaged. City of Hopewell: Damages were similar to the City of Petersburg with boats swamped. Damages were estimated at $18,000. City of Petersburg: There were no deaths but several injuries due to this event. Damages included torn-off roofs, smashed windows, wrecked signs, twisted antennas, uprooted trees, broken limbs, and damaged utility lines and autos hit by falling trees and limbs. Trees falling on high-tension electric lines disrupted power service. Telephone service was disrupted. Schools and businesses closed. There was considerable damage to parks and Blandford Cemetery in Petersburg. City of Richmond: The city experienced 68 mph winds with a maximum gust to 79 mph. Four people died when a tug capsized on the James River about 25 miles from Richmond. Surry County: Wharves at Claremont were almost completely demolished. (Sources: The Progress-Index and the Sussex-Surry Dispatch)
August 20, 1969	The remnants of Hurricane Camille caused major flooding as a bulge of water moved down the James River into Richmond. Statewide damage was estimated at $113 million

Table F-4. History of Hurricane Events and Damages, 1827–2010

Date	Damages
	(1969 dollars).
June 23, 1972	On June 23, a severe storm system entered Virginia that was primarily a rainstorm with some locally strong winds. In Richmond, the James River crested at 36 feet above flood stage while the Appomattox River crested at 16 feet. The Crater PDC area received little rain and wind but experienced river flooding from upstream rains. Farmville was severely flooded with its highest flooding on record at 30 feet. Chesterfield County: The area had nominal damage except for flooded homes along Falling Creek and the Matoaca Bridge, disruption, and backup of sewage in the Matoaca Bridge area and the shutdown of a local power station from flooding. Skinquarter Road and River Road were closed. U.S. Route 360 had one lane open. City of Hopewell: The Appomattox River flowed over docks and was 150 feet inland. City of Petersburg: The Richmond-Petersburg Turnpike and the Huguenot Bridge were closed due to flooding. The area had nominal damage (its divergent channel held), except for a few low-lying businesses being flooded. (Sources: The Progress-Index and The News-Journal)
October 10, 1972	Heavy rains on October 5 and 6, 1972, concentrating in the mountainous region of northwest Virginia and in the James and Appomattox River basins, swelled these and other rivers (notably the Nottoway and Meherrin Rivers) out of their banks. The Tri-Cities Area received from 4 to 6 inches of rain. The James River crested at 28 feet in Richmond and the Appomattox River crested at 18 feet in Petersburg. Homes in Matoaca along the Appomattox were flooded and evacuated. Area utility and public works companies were hard hit. A natural gas line along U.S. Highway 1 ruptured cutting off gas service; the Manoaca sewer station ceased operation. Power and telephone service was disrupted for the region. Damages were estimated to be greater than $1 million for the Tri-City Area. Chesterfield County: In Chesterfield County, County Campbell's Bridge, Route 36, U.S. Route 360, eight secondary roads and Archer Avenue in Colonial Heights were flooded. City of Colonial Heights: In Chesterfield County, County Campbell's Bridge, Route 36, U.S. Route 360, eight secondary roads and Archer Avenue in Colonial Heights were flooded. Dinwiddie County: In Dinwiddie County, Interstate 85, U.S. Highway 1, 24 secondary roads were flooded. Schools were closed. City of Emporia: The river swelled and rushed over a dam flooding the Emporia roads of U.S. Highway 301; Center, Cleveland, Monroe, High, and Shilo Streets; and ten secondary roads. Along the Meherrin River, homes were damaged. Sewage service was disrupted and discharged into the river. The mayor of Emporia died searching for children in the river. Greensville County: The Meherrin River crested at 30 feet above normal low water level. Damages were estimated at $250,000 for cropland in Greensville County. City of Hopewell: The city experienced nominal flooding. City of Petersburg: This event caused the worst flooding in 32 years. Petersburg and surrounding areas experienced flooding streets, businesses, and homes in low-lying areas of the city. In Petersburg, Highway 36, River Street, Old Street, East Bank Street, Bollingbrook, Grove Avenue, Plum Street, Fleet Street, and River Street were flooded. Schools were closed. The Petersburg electric substation was deactivated. Sussex County: In Sussex County, 14 roads were closed. U.S. Highway 301, Routes 40, 46, 58, and 630 were flooded. Schools were flooded and closed. Ten families in Sussex County were evacuated. Stony Creek was hardest hit with about 6,000 acres flooded. Cropland was flooded and some water damage occurred especially in the Claremont area,

Table F-4. History of Hurricane Events and Damages, 1827–2010

Date	Damages
	flooding cottages. Damages were estimated at $2 million for cropland, houses, and business areas. (Sources: The Progress-Index and The News-Journal)
September 6, 1996	On September 6, a severe storm system entered Virginia from North Carolina producing heavy winds gusting between 40 and 50 mph with moderate rainfall. The Meherrin River crested at 24.3 feet, 11 feet above flood stage. City of Emporia: Emporia experienced flooding of Center Street by the Meherrin River. Roofs were peeled up and awnings ripped off. Schools were closed. Greensville County: Damages were not as large as expected and were caused mostly from high winds; county damage was limited to broken tree limbs. Surry and Sussex Counties: Damages were not as large as expected and were caused mostly from high winds, uprooting trees that fell onto homes, trailers, and roads. Power and telephone service was disrupted. Three hundred acres of crops were damaged from flooded fields. (Sources: The Sussex-Surry Dispatch and The Independent Messenger)
September 15, 1999	On the afternoon of September 15, Hurricane Floyd entered Virginia producing high winds and rain. Throughout the region, trees and power lines were brought down, roads were blocked and washed out, and homes were damaged and flooded. The storm dumped more than 10 inches of rainfall over much of the area. Power was disrupted and water service was impaired. Chesterfield County: Several Ettrick and Matoaca homes were flooded and several roads were blocked. Crop damages were estimated at $50,000. City of Colonial Heights: Several apartment complexes were evacuated from flood conditions. Dinwiddie County: Ferndale Road, northbound I-85, Route 40, and U.S. Highway 58 were flooded. Seven state routes were closed for several weeks. Crop damages were estimated at $420,000 in Dinwiddie County. City of Emporia: The area was drenched with about 10 inches of rain. Damages were estimated at $60,000. Greensville County: The greatest amount of damage was to agriculture, with 1,500 acres underwater. The Meherrin River was 4 feet above flood stage. A graveyard flooded, causing caskets to float out of their vaults into surrounding streets. Schools and public buildings were closed. A section of Skippers was evacuated. Interstate 95; Routes 46, 58, and 301; Independence Church Road; Moores Ferry Road; Little Lowground Road; Brunswick Road; and the Hicksford Bridge were closed. Center Street, Halifax Street, Reese Street, Waterwheel Road, and Brink Road in Emporia were closed. Forty residents sought shelter. Crop damages were estimated at $800,000. City of Petersburg: Woodmere Lake overflowed, causing residents to evacuate from nearby apartment complexes. Low-lying sections were flooded. The sewer system overflowed in West Petersburg. Twenty-two residents sought shelter. Damages were estimated at $782,000. Prince George County: U.S. Route 301 and I-95 were closed. Three state routes were closed for several weeks. Walton Lake Road and the homes along it were flooded. Trees collapsed onto 15 homes. Fifty residents sought shelter. City of Richmond: Damage from the storm was estimated at nearly $1.5 million in Richmond and Hanover, Henrico, and New Kent Counties. Surry County: The area received 14 inches of rain with particular damage occurring in the Claremont District, Sunken Meadow Beach, and Claremont Beach. Poplar Lawn Road,

Table F-4. History of Hurricane Events and Damages, 1827–2010

Date	Damages
	Spring Grove Road, College Run, and New Design Road were completely washed out. Routes 460 and 10 were closed. Routes 646, 637, and 635 had massive sinkholes. Crop damages were estimated at $1.15 million. Sussex County: Wakefield received 12.73 inches of rain. This event caused the greatest flooding in 60 years. Two hundred people were evacuated from Stony Creek where homes and businesses were partially submerged by the rising Nottoway River. Portions of the Towns of Waverly and Wakefield were completely flooded. U.S. Route 460 had a massive sinkhole and other portions were flooded. Roads were washed out on Harrell's Mill Road and Brittle's Mill Road. Interstate 95 was closed. Crop damages were estimated at $1 million in Sussex County. (Sources: The Progress-Index, Sussex-Surry Dispatch, and The Independent Messenger)
September 18, 2003	Hurricane Isabel – Wind gusts of more than 74 mph were felt well inland with an unusually large windfield associated with the hurricane. The wind resulted in thousands of downed trees, damaged buildings, and snapped power and telephone poles. Millions of customers experienced power outages, making it one of the most extensive outages in Virginia; in many instances the outages lasted for several days. Richmond experienced storm surge of greater than 8 feet. See full description in Flood section.
August 30, 2004	Tropical Storm Gaston – See full description in Flood section.
September 1, 2006	Hurricane Ernesto made landfall as a strong tropical storm just west of Cape Fear, North Carolina. Torrential rainfall of greater than 5 inches was common across the region and resulted in the flooding of roadways. Wind gusts of more than 40 mph were observed. Power lines and trees were downed as a result.
September 6, 2008	Tropical Storm Hanna made landfall near the North Carolina–South Carolina border. The system tracked northeast and into southeastern Virginia spreading heavy rainfall and gusty winds across the region, before continuing on into the Northeast and New England. Rainfall of between 1 and 4 inches and wind gusts of 35 mph and in some cases higher were reported. Generally, only minor damage to trees was reported.

History of Tornado Events and Damages, 1790–2010

Table F-5. History of Tornado Events and Damages, 1790–2010

Date	Damages
April 6, 1790	On April 6, 1790, a tornado struck Charles City and Dinwiddie Counties, destroying four mills and blowing down four houses at the New Glass Manufactory.
July 27, 1816	**Henrico County:** A tornado touched down near Manchester, killing two people and injuring three more. It was on the ground for about 14 miles. (Source: Watson, Barbara McNaught. *Virginia Tornadoes*. Retrieved from http://www.vdem.state.va.us/library/vatorn/va-tors.htm)
June 4, 1817	A tornado touched down in Henrico County, moved east from the southern part of Chickahominy (about 15 miles north of downtown Richmond), and across Henrico County to the Pamunky River in King William County, causing widespread destruction. The tornado was about 200 to 300 yards wide. It swept over several plantations. One person was killed and four injured in Hanover County and another was killed in King William

Table F-5. History of Tornado Events and Damages, 1790–2010

Date	Damages
	County. (Source: *Virginia Tornadoes*)
September 12, 1878	A hurricane spawned tornadoes including one in Henrico County where one death and seven injuries occurred. A tornado hit Goochland County near Dover Mills and was on the ground for 28 miles.
March 28, 1932	**Goochland County:** At just past midnight, a home was destroyed by an F2 tornado near Centerville. Four people were critically injured.
June 1, 1951	**City of Richmond:** A severe tornado (F3) cut through the heart of Richmond (pop. 230,000). It left a 4-mile path of damage that sent a dozen people to the hospital, injured scores more, and left more than a hundred homeless. Thirty-five buildings were destroyed and 126 received major damage; 1,000 buildings in all were damaged. Damages were estimated at more than $1 million. The tornado was seen tossing a car 30 to 40 feet into the air. Eyewitness accounts were reported in the next day's Richmond Times-Dispatch (Vol. 101, No. 165): "It came on fast. It sounded to me like an earthquake. I saw rooftops flying through the air. Pieces of tin and trees were falling on South Granby Street. When it hit my house, the back of the house came down. All the houses along here got hit in the back, and they all were half ripped down." - Perl Price, 1835 Rosewood Avenue. "I had spotted the twister when I was near the Jefferson Hotel. It was a great swirling mass of wind, and I thought at first that there was a huge fire somewhere. There wasn't any cone or funnel, like you expect with a tornado. The wind seemed to swirl and swoop up everything from the edges, carrying leaves and debris in and up. The air seemed to be full of all kinds of objects." - Louis J. Patterson, Richmond Times-Dispatch photographer. And from the Richmond News Leader came this quote by John L. Walker: "Four different clouds – all funnel-shaped – were rushing toward the city. Each one had a tail like a kite. Then the four came together in the shape of a huge auger that picked up everything in front of it." This report suggests that it was a multi-vortex tornado with, at one point, four vortices visible. (Sources: NCDC; *Virginia Tornadoes*)
May 8, 1962	**Goochland County:** An F2 tornado touched down in the county killing one person and injuring two others.
March 24, 1969	**City of Richmond:** An F2 tornado injured one person and caused an estimated $250,000 in damage.
July 9, 1977	**Goochland County:** A tornado caused an estimated $250,000 in damage.
October 13, 1983	**Goochland County:** An F1 tornado occurred at 4 p.m. It tracked 25 miles into Louisa County. A few buildings and trees were destroyed or damaged. Damages were estimated at $25,000.
May 8, 1984	**City of Hopewell/Charles City County:** A severe storm system tracked across Virginia producing a tornado near Cavalier Square Shopping Center. It tracked through downtown Hopewell to Appomattox Manor in City Point. Damage was primarily to businesses rather than homes and was estimated at $1.36 million. The Seaboard Coast Line Railway Office was demolished. Fifteen people were injured in Hopewell. It crossed the James River into Charles City County adding another 15 miles to its path of destruction. Maximum strength was F2 and it was about 300 yards wide. (Sources: NCDC; *The Progress-Index*)
May 29, 1984	**Chesterfield County:** Although few details are available, an F2 tornado touched down in the county and caused approximately $2.5 million in damage.
April 2, 1990	**Chesterfield County:** A strong F2 tornado hit an auto dealership on U.S. Routes 1 and 301 causing extensive damage to the building and 25 cars. Total damages were estimated at

Table F-5. History of Tornado Events and Damages, 1790–2010

Date	Damages
	$2.5 million.
August 6, 1993	Tornadic thunderstorms tracked across southern Chesterfield County through the Tri-Cities and Prince George County and north into Charles City. The thunderstorms produced several tornadoes across the Tri-Cities Area: City of Colonial Heights (F2), City of Petersburg (F3), Dinwiddie County, Sussex County, and City of Hopewell (F1). On Pocahontas Island, a tornado damaged 58 residences. The island lost power and sewage treatment. An estimated 7.8 million gallons of sewage flowed into the Appomattox River. **Chesterfield County:** A tornado uprooted trees in Matoaca and overturned tractor trailers on the I-295 bridge connecting Henrico and Chesterfield Counties, causing hours of delays. Interstate 95 was shut down. **City of Colonial Heights:** A tornado destroyed the Wal-Mart, severely damaged other major retail stores in the area, and damaged 25 stores in the Southpark Mall area. Vehicles in the parking lot were piled on top of each other. Three deaths and 200 injuries were reported at Wal-Mart. Damages were estimated at above $11 million. **Dinwiddie County:** High windstorms and tornadoes generated damage in Church Road, Ford, and Old Pine. In Ford, a high wind storm knocked down trees, power lines, and debris, damaging cars and homes from Wells Road to Baltimore Road. The roof of a mobile home was removed. In Old Pine, a farmhouse imploded. In the county these events caused some injuries, destroyed three homes, and damaged eight others. Large sections of the county were without power. **Greensville County:** In Greensville County, high winds and torrential rains ripped through the Town of Jarratt. Damages included demolished trailers and power outages. **City of Hopewell:** An F1 tornado hit a 20-block area in the northwest corner of Hopewell causing damage to industrial buildings and causing heavy damage to Riverside Park Apartments. One hundred people were evacuated and 60 people were homeless. Damages were estimated at more than $1.2 million. **City of Petersburg:** A tornado generating winds over 206 mph produced massive damage to the Old Towne and surrounding areas. Gas, electric, telephone, and sewage service was disrupted. In Old Towne, the tornado leveled several buildings, blew out car windows, and tossed roofs and electrical lines. The South Side Station Flea Market and Mini-Mall, restaurants, and businesses were in ruins. Roofs were blown off of several businesses on the Old Towne fringe. Many people at a lumber yard were injured. Thirty-six buildings were severely damaged in Old Towne. In Petersburg, 120 businesses and 50 homes were damaged. One hundred forty people were evacuated from an apartment complex. Damages were estimated at greater than $11.1 million in Petersburg and $10 million in Old Towne. **Prince George County:** In Prince George County, a tornado caused the collapse of a concrete plant in Tarmac, severely injuring one person. **Sussex County:** In Sussex County, a tornado in Waverly snapped and uprooted trees, and damaged homes and buildings from one end of town to the other. A peanut warehouse on U.S. Route 460 was destroyed. Power was disrupted in Stony Creek and Waverly. (Sources: The Progress-Index, The Sussex-Surry Dispatch, and The Independent Messenger)
April 1, 1998	**Hanover County:** A tornado touched down near Coatesville and tracked to about 2 miles east/southeast of Noel. The twister was rated an F3 with winds of more than 139 mph and caused approximately $800,000 in damage.
June 15, 2001	**Henrico County:** A tornado damaged trees and a few buildings, including a Bank of America building. Total damages were estimated at $5,000.
April 28,	**Greensville County:** An F1 tornado destroyed three mobile homes, damaged 50 other

Table F-5. History of Tornado Events and Damages, 1790–2010

Date	Damages
2002	homes, one business, and an apartment complex. Total damages were estimated at $750,000.
May 5, 2002	On May 1, coupled with a thunderstorm, a tornado approached from Brunswick County and touched down in several places in Greensville County along U.S. Route 301 and in the City of Emporia. This thunderstorm continued to the Tri-Cities Area producing heavy rain and wind gusts of up to 80 mph. In the Tri-Cities Area trees and power lines were knocked down, and street lights were out. **City of Colonial Heights:** Pressure from the storm punched a hole in the side wall of a store. **City of Emporia:** The tornado touched down around the Dry Bread-Allentown Road area damaging two site-built houses and damaging 14 other homes. An industrial plant had its roof torn off and a garage door fell on a pickup truck. Fourteen apartments and more than 30 trees toppled at the Gardens of Emporia Cemetery. Forty tombstones were damaged. Two mobile homes in a trailer park were destroyed. Two other mobile homes received major damage and 18 others had minor damage. Three minor injuries were reported. Numerous trees and power lines fell. Interstate 95 was blocked from fallen trees. A transfer truck was overturned. Nineteen families were displaced and the Red Cross housed 46 people. Damages were estimated at approximately $700,000. **Greensville County:** Damages were estimated at less than $1 million. (Sources: The Progress-Index and The Independent Messenger)
April 28, 2008	**City of Colonial Heights:** An F1 tornado touched down in spots beginning near the end of the football field close to Colonial Heights Middle School. The tornado then continued across I-95 and into the Dimmock Square Shopping Center. The most significant damage occurred with the final touchdown in the Dimmock Square strip mall. A string of four stores, around 75–80 yards in width, had ceiling tiles blown out, roofs peeled off, and windows blown out. Several cars were damaged as some had windows shattered from flying debris. Other vehicles were flipped and tossed about in piles. Damage was estimated at $2 million. **Prince George County:** A tornado lifted and crossed Temple Avenue from Colonial Heights into Prince George County. The tornado touched down briefly near Flexon Drive, Fine Drive, and Puddleduck Drive. Several trees were uprooted, a few were snapped off, and several homes were damaged.
July 9, 2008 (See Figure 5-17)	**City of Petersburg:** A tornado briefly touched down at the intersection of Farmer Street and Fairgrounds Road in the west section of Petersburg. There was extensive damage to a warehouse, including the roof being blown off the building. Total damage was estimated at $500,000.
October 27, 2010	**City of Richmond:** One person was injured as an EF1 tornado downed trees and power lines, and produced siding and roof damage to homes. Many structures sustained damage from the tornado, with the most significant damage occurring as a result of trees and/or large branches falling on homes. Several homes were declared uninhabitable as a result. Most of the damage was EF0 in intensity, with a few areas in the western half of the tornado path reaching low-end EF1 intensity. Maximum wind speeds were estimated at approximately 90 mph. The tornado moved from the City of Richmond into Henrico County. **Henrico and Hanover Counties:** The tornado described above moved from the City of Richmond into Henrico County continuing its path of damage. The tornado moved into Hanover County from Henrico County just before lifting. The total path length of the tornado was approximately 11 miles. The total damage from the twister is estimated at approximately $1.5 million.

History of Winter Storm Events and Damages, 1940–2010

Table F-6. History of Winter Storm Events and Damages, 1940–2010

Date	Damages
January 23–24, 1940	A major winter storm dumped more than 2 feet of snow across parts of the region with drifts reaching more than 4 feet high in some areas. Businesses were closed for two days and some schools were closed for a week.
January 22, 1943	An ice storm impacted the region with a glaze of ice approximately 1 inch thick. Thousands of trees were damaged and power lines downed due to the weight of the ice, resulting in power and telephone outages.
March 7–8, 1962	A major Nor'easter that the U.S. Weather Bureau termed the "Great Atlantic Storm" (also referred to as the "Ash Wednesday" storm) impacted the region. The storm produced heavy rain closest to the coast and more than 2 feet of snow in some areas well inland. Gale- force winds and near-record tides sent rivers and the Atlantic Ocean surging over sea walls and beaches. This event flooded low-lying coastal areas and caused destruction inland along rivers and bays. Power was knocked out to thousands and total damages for six impacted states totaled hundreds of millions of dollars.

Table F-6. History of Winter Storm Events and Damages, 1940–2010

Date	Damages
	(Source: The Progress-Index)
January 26, 1977	Several weeks of ice, snow (11.1 inches), and record low temperatures produced one of the coldest winter seasons. The James River and Chesterfield County rivers were frozen. Residences and businesses experienced frozen and burst pipes. Ice and freezing temperatures caused nuclear plant shutdowns. Ice in the James River stopped ferry service. **Chesterfield County:** These conditions produced icy roads and sidewalks, and closed railroads and schools in the county. The event caused 75 accidents, several pedestrian injuries, and several drowning deaths. **City of Colonial Heights:** The event caused numerous accidents,. several pedestrian injuries, and several drowning deaths. **Dinwiddie County:** See overall event description. **City of Emporia:** Heating fuel supply and distribution was slowed, causing brownouts and major power outages. This reduced heating fuel supply, forced state-ordered bans of all non-essential natural gas use, curtailed business hours, and reduced business thermostats to 65 degrees. This ban generated numerous layoffs and unemployment claims. **Greensville County:** These conditions produced icy roads and sidewalks, closed railroads, and closed schools for four days. **City of Hopewell:** This event caused numerous accidents with several pedestrian injuries and several drowning deaths. **City of Petersburg:** These conditions produced icy roads and sidewalks, closed railroads, and closed schools. The event caused 21 accidents, s. several pedestrian injuries, and several drowning deaths. **Sussex County:** This event caused numerous accidents, with several pedestrian injuries and several drowning deaths. (Sources: The Progress-Index, The Independent-Messenger, and Sussex-Surry Dispatch)
February 18–19, 1979	On President's Day, heavy snowfall came down across the region at the rate of 1 to 3 inches per hour at times. Total snow accumulations ranged from 6 to as much as 20 inches.
February 10–11, 1983	The "Blizzard of '83" set snowfall records through much of central and southwestern Virginia. Over a foot of snow fell in many areas. The costs of clearing the snow from state roads were estimated at $9 million. **City of Richmond:** The city recorded 18 inches of snow.
December 23, 1993	On December 23 and 25, the Crater region received 14 inches of snow, with freezing rain on December 27. Primary and secondary roads were covered with snow, ice, and slush. Public transit was shut down and various businesses closed early. This event caused 232 traffic accidents in the Crater region. **Chesterfield County:** This event caused 109 traffic accidents in the county. **Dinwiddie County:** Governments closed early in Dinwiddie County. **City of Hopewell:** This event caused 232 accidents in the city. Interstate 295 near Hopewell had significant ice. **Prince George County:** This event caused 30 traffic accidents in the county. The county government closed early. (Source: The Progress-Index)
March 13–	Termed "The Storm of the Century," this system impacted nearly all of the East Coast from

Table F-6. History of Winter Storm Events and Damages, 1940–2010

Date	Damages
14,1993	Florida to New England. The storm brought strong winds and rain that changed to snow over the area. The heaviest accumulations were found over western portions of the region and into the Appalachians.
February 8 through February 12, 1994	A severe ice storm hit the Tri-Cities Area from February 8 through February 12 helping to produce the harshest winter in a decade. **Chesterfield County:** The roof of the county library and several school buildings were damaged, with estimates at $300,000. **Dinwiddie County:** More than 3,000 homes were without power. Damages were estimated at $10,000. **Surry County:** In Surry County this ice storm damaged a water tower for the school system, knocking out heating and cooling for 30 hours. Damages were estimated at $30,000. (Sources: The Sussex-Surry Dispatch and The Independent Messenger)
March 1 through March 5, 1994	A severe ice storm that hit the Tri-Cities Area from March 1 through March 5, contributed to the harshest winter in a decade. This ice storm had a separate disaster declaration from the February 1994 ice storm. This ice storm produced 50-knot winds and tides up to 3.5 feet above normal, suspending ferry service across the James River. There was a significant increase in the number of potholes later in the spring on state highways due to this event and the February events. **City of Emporia:** Emporia had $20,000 of damage to street and road surfaces. **Surry County:** Roads were flooded, trees were knocked down onto roads, and schools closed early. (Sources: The Sussex-Surry Dispatch and The Independent Messenger)
January 13, 1996	From January 6 through January 15, two snow storms, striking first from the south and then from the north, produced large and prolonged snowfall. Snow and rain froze on roads, producing hazardous conditions and numerous accidents. School systems throughout the region were closed for five days. Businesses were closed and 360 customers were without power in the Town of Stony Creek, City of Hopewell, and Disputanta. Numerous minor injuries were reported from car accidents and falls. Several residents were hospitalized for pneumonia. People sought shelter in hotels and local shelters (51 in Emporia). **Chesterfield County:** School systems were closed for five days. **City of Colonial Heights:** School systems were closed for five days. Roofs collapsed due to the weight of snow. **Dinwiddie County:** School systems were closed for five days. **Greensville County:** School systems were closed for five days. Snow removal costs were estimated at $32,000. **City of Hopewell:** School systems were closed for five days. Roofs collapsed due to the weight of snow. **City of Petersburg:** More than 2 feet of snow fell in the city. School systems were closed for five days. Roofs collapsed due to the weight of snow in the Cities of Colonial Heights and Hopewell. Snow removal was an issue in Petersburg, with removal costs estimated at $42,000. **Prince George County:** School systems were closed for five days. **Surry County:** More than 14 inches of snow fell in the county. **Sussex County:** More than 14 inches of snow fell in the county. (Sources: The Progress-Index, The Independent-Messenger, and Sussex-Surry Dispatch)

Table F-6. History of Winter Storm Events and Damages, 1940–2010

Date	Damages
December 23, 1998	A severe ice storm hit the Tri-Cities Area December 23 through December 27. Warm, moist air from the south mixed with icy cold air from the north and drenched the region with freezing rain. The precipitation covered roads, power lines, and trees with ice and caused numerous accidents, trees and power poles to topple, and power outages from utility lines crashing to the ground. It was the worst ice storm in five years and hit the Tri-Cities Area hard. This ice storm produced the worst power outages electric companies had seen. Power was out for several days. Sewage and water service was disrupted. Residents sought shelter in local motels instead of shelters. Telephone service was sporadic. Though numerous accidents occurred, especially along I-295, there were no serious injuries. Recovery was slowed due to workers off for the holiday and thawing trees knocking down previously repaired power lines. **City of Colonial Heights:** Eighty-five percent of residents were without power. **Dinwiddie County:** The county had no power and no water. **Greensville County:** Eighty-one percent of residents were without heat and power. **City of Hopewell:** Eighty percent of residents were without power. **City of Petersburg:** Customers without power totaled 60,200. (Sources: The Sussex-Surry Dispatch, The Tidewater News, and The Independent Messenger)
January 19–30, 2000	During a one-week period in January, two winter storms produced major snowfall (13 to 18 inches with 3.5-foot drifts), blizzard conditions, and damaging ice accumulations. Ice accumulations on January 30 topped one-half inch in spots. This event iced and uprooted trees, disrupted power, and closed schools for several days. Contractors were hired to service several communities. A tractor-trailer overturned on I-95. **Chesterfield County:** Cold temperatures froze pipes, causing them to burst throughout the county. Snow removal costs were estimated at more than $115,000. **City of Colonial Heights:** This event iced and uprooted trees, disrupted power, and closed schools for six days. Cold temperatures froze pipes and caused them to burst. Snow removal costs were estimated at more than $32,000. **Dinwiddie County:** This event iced and uprooted trees, disrupted power, and closed schools for eight days. **City of Emporia:** Snow machinery breakdowns and low temperatures hindering salt effectiveness hampered removal. Snow removal costs were estimated at more than $50,000. **Goochland County**: The county recorded 9.5 inches of snow. **Greensville County:** This event iced and uprooted trees, disrupted power, and closed schools for eight days. **City of Petersburg:** Cold temperatures froze pipes, causing them to burst. Snow removal costs were estimated at more than $380,000. **Prince George County:** This event iced and uprooted trees, disrupted power, and closed schools for seven days. Cold temperatures froze pipes, causing them to burst. **City of Richmond:** Richmond International Airport closed during the snow event when 10 to 13 inches of snow fell. During the January 30 ice event, more than 300,000 residents in and around the city were without power. Two people were injured. **New Kent County**: The county recorded 16 inches of snow. . (Sources: The Progress-Index, Sussex-Surry Dispatch, and The Independent Messenger)
January 22, 2005	Freezing rain accumulated to between 0.25 and 0.75 inches across the region. In addition to causing numerous accidents on slippery roadways, the ice brought down power lines

Table F-6. History of Winter Storm Events and Damages, 1940–2010

Date	Damages
	and tree branches resulting in power outages throughout the region.
December 18–19, 2009	The first of a series of winter storms to impact the region during the 2009–2010 winter season dumped heavy snow through portions of the area. The heaviest snow fell over the northern and western sections of the region where 12 to 16 inches blanketed Hanover, Goochland, and Powhatan Counties. Amounts were in the 2- to 4-inch range south over Greensville County and the City of Emporia and generally less than 2 inches over Surry and Sussex Counties.
January 30, 2010	A major winter storm impacted the area bringing significant snowfall and gusty winds. Low pressure tracked from the Southeastern U.S. off the Carolina coast, developing into a powerful coastal storm. Snow totals ranged from 7 to 14 inches through most of the area with a few spots reporting higher amounts.

History of Hail/Lightning Events and Damages, 1993–2010

Table F-7. History of Hail/Lightning Events and Damages, 1993–2010

Date	Damages
August 3, 1993	**Chesterfield County:** a man was struck and killed by lightning while mowing grass in his backyard.
May 25, 1994	**Henrico County:** a 26-year–old person was struck and killed by lightning while standing under a tree at Glenwood Golf Course. Storms also produced golf ball-sized hail and caused approximately $5,000 in damage.
July 27, 1995	**Henrico County:** lightning sparked two separate house fires that caused approximately $135,000 in damage.
June 24, 1996	**Chesterfield County:** Lightning sparked fires that damaged four homes and a large shed. Damage was estimated at $77,000.
May 8, 1998	**City of Hopewell:** A 12-year-old boy was injured when he was struck by lightning at Carter G. Woodson school.
August 18, 2001	**Prince George County:** Hail, up to the size of baseballs, was reported near Disputanta. An estimate of damage was not available.
May 9, 2003	**Sussex County:** Hail, larger than softballs (approximately 4.25 inches in diameter), caused an estimated $15,000 in damage near the Town of Jarratt. **Dinwiddie County:** Hail, up to 2.75 inches in diameter (baseball-sized), was reported near the intersection of U.S. Route 1 and Route 650. The hail caused approximately $5,000 in damage.
April 20, 2009	**City of Emporia:** Ping pong ball-sized hail damaged 164 cars and trucks at a General Motors dealership.
August 12, 2010	**Hanover County:** Hail, two inches in diameter, damaged vehicles in the county east of Old Cold Harbor.

APPENDIX G – MITIGATION ACTIONS

This section of the Plan includes each of the mitigation actions for the region and each community in spreadsheet format, as well as information on previous actions which were removed from the plan during this 2022 update.

#	Regional Strategy	Lead Agency	Priority	Timeframe	2022 Status	Comments
~~1~~	~~Leverage regional partnerships to better use their data to inform mitigation planning and project development.~~	~~PDC, State and Local staff~~	~~High~~	~~Ongoing~~	This action was incorporated in the 2022 plan as an objective, not an action.	
1	Strengthen regional strategy for incoming evacuees, to include plan development, traffic management, sheltering, and information sharing.	PDC S with local EMs	Moderate	Ongoing	Retained with minor modifications.	Incoming evacuees from other regions continue to concern regional planners.
2	Continue to improve the quality, detail and availability of data used to prepare effective hazard assessments and vulnerability analyses. Data may include, but are not limited to, gauging systems, inundation mapping using existing gauges, GIS data, flood insurance coverage and loss data, assessor data and other structure-specific information, landslide- and radon-related geological data, and pandemic-related economic impact data. Local reports that are fed into NCEI are also important for calculating event frequency and total losses. Hazard data are multi-purpose and may be used to support evacuation mapping and planning. The PDCs should consider serving as administrator(s) of a regional hazard data hub.	PDC, Local GIS Managers	Low	Ongoing	Retained with minor modifications.	

~~3~~	~~Support mitigation projects that will result in protection of public or private property from natural hazards. Eligible projects include but are not limited to: 1. acquisition of floodprone property 2. elevation of floodprone structures 3. minor structural flood control projects 4. relocation of structures from hazard prone areas 5. retrofitting of existing buildings, facilities and infrastructure 6. retrofitting of existing buildings and facilities for shelters 7. critical infrastructure protection measures 8. stormwater management improvements 9. advanced warning systems and hazard gauging systems (weather radios, reverse 911, stream gauges, I flows) 10. targeted hazard education 11. wastewater and water supply system hardening and mitigation.~~	~~PDC, State and Local staff~~	~~Low~~	~~Ongoing~~	Deleted. The PDCs do not anticipate pursuing these types of projects.	
3	Integrate mitigation goals and actions into other regional planning mechanisms, for example regional economic development, resiliency, transportation, parks and trail, and watershed plans.	PDC staff	High	Ongoing	Retained with minor modifications.	
~~4~~	~~Seek funding to support 2022 Richmond Regional - Crater PDC Hazard Mitigation Plan update and interim data upgrades and refinements~~	~~PDC staff~~	~~High~~	~~2020~~	Deleted. This is expected of the PDC and is in line with FEMA requirements. No mitigation action required.	
4	Work with state partners and neighboring localities to monitor and implement Next Generation 911 GIS data standards.	Local Emergency Managers	Low	Ongoing	Retained.	
5	Identify communities that need more current NFIP repetitive flood loss data for CRS and other planning purposes.	PDCs with VaDCR and VDEM	High	within 3 years of plan adoption	New	
	Request data from FEMA for all NFIP-participating communities on a regular basis, to include rep loss data and minus-rated policies					
	Update repetitive flood loss area polygons every 2 years					
	Rank repetitive flood loss areas by social vulnerability and provide areas and rankings to communities					

	ID areas subject to future flooding due to climate change and SLR					
6	Provide Community Rating System (CRS) support for interested communities, to include: application assistance, Plans for Public Information (PPI), Substantial Damage Management Plans, Repetitive Flood Loss Area Analyses (RLAAs), web site development, and library resources.	PDCs with VaDCR and Wetlands Watch	Moderate	within 2 years of plan adoption	New	
7	Address high and significant hazard dam safety in the region. Assist Virginia DCR with investigating significant hazard dams region-wide for possible reclassification as high hazard. Inspect high hazard potential dams for necessary retrofits/repairs. Implement retrofits in partnership with dam owners. This action includes outreach to: 1) private dam owners to either provide or offer to collect data, and to provide additional guidance and resources; and 2) the public to build awareness through signage installation and other media regarding low-head dams to build public awareness to swimmers and boaters of the affiliated hazards.	Virginia DCR, Crater P	High	Continuously over	New	
8	Use commercially available radon test kits to determine radon levels in structures. Evaluate radon data against known geological formations in the region to determine geographic variability in vulnerability. End product will be a refined map of radon zones.	PDCs, College of Willi	Moderate	Begin project within 2 years of plan adoption; project may extend beyond 2027 planning horizon	New	
9	Provide assistance to communities and citizens regarding Risk Rating 2.0, the NFIP's new flood insurance rating policy standards. This action includes assistance with:	PDCs	High	Within1 year of plan adoption	New	
	1) Evaluation of rating methodology and accuracy;					
	2) Messaging and outreach to homeowners and renters;					
	3) Elevation Certificate correction; and					

	4) Mitigation assistance for property protection, including retrofit guidance and physical alterations to structures or structure components.					
10	Work with private companies to advance continuity of operations, including but not limited to power, gas, and water service restoration. Mitigation actions may include implementation of system redundancies, mutual aid agreements or other partnerships to address critical capability gaps. Physical retrofits may increase resilience of critical infrastructure, such as burying power lines and provision of dependable backup power to water and wastewater treatment facilities.	Dominion, public and private utility providers, PDCs	Moderate	within 4 years of plan adoption	New	
11	Partner with VDOF on sharing Wildland Urban Interface data in support of efforts to develop local tools (ordinances, outreach templates, etc.) to determine impacts of fire and climate change as well as potential local projects. Partner with Virginia Wildlife Resources (VWR) regarding Wildlife Action Plan climate change assessment and development of Wildlife Climate Change Adaptation Committee.	PDCs, VDOF, VDWR	Moderate	ongoing	New	
12	Convene interested parties to discuss NFIP status of the Town of Waverly, and encourage participation. Notify FEMA that town boundaries are incorrect on the FIRM.	Plan RVA, VDCR, Sussex County, Waverly	High	Immediately	New	
13	Strengthen community resilience planning and project implementation through:	PlanRVA & Crater PDC, DCR, UVA, W&M, ODU, Chambers of Commerce, Economic Development departments	Moderate	Ongoing	New	

	1) Public Education/Awareness – Create resilience dashboard to share information and data with the general public about resilience issues, including flood risk. Enhance other outreach efforts to educate the public about hazard risk and regional resilience.					
	2) Engage communities in Resilience Adaptation Feasibility Tool (RAFT) process and support training and implementation.					
	3) Combine elements of regional resilience efforts into regional plan to satisfy DCR and CFPF requirements.					
	4) Resilience Program and Project Cobenefit Connector - expand current PDC staff capacity, web presence and guidance documents to better understand and educate localities on fully harnessing existing and future grant programs given the cobenefits of resilience-related projects.					
	Business resiliency training.					

#	Surry Strategy	Lead Agency	Priority	Timeframe	2022 Status	Comments
1	Support mitigation projects that will result in protection of public or private property from natural hazards. Eligible projects include but are not limited to: 1. acquisition of floodprone property 2. Elevation of floodprone structures 3. minor structural flood control projects 4. relocation of structures from hazard prone areas 5. retrofitting of existing buildings, facilities and		Communit y did not respond to status update request.	Communi ty did not respond to status update request.	1, 2, 4, 5, 7	Community did not respond to status update request.
2	Integrate mitigation plan requirements and actions into other appropriate planning mechanisms such as comprehensive plans and capital improvement plans.		Communit y did not respond to status update request.	Communi ty did not respond to status update request.	1, 2	Community did not respond to status update request.

#	Sussex County Strategy	Lead Agency	Priority	Timeframe	2022 Status	Comments
1	Add trained staff to Emergency Management , Building Inspections, and Planning and Zoning, to include a Certified Floodplain Manager in Planning & Zoning.	County Administration	Moderate	Ongoing	Retained with minor modifications	While some staff changes have occurred, additional personnel are still required.
2	Continue participating in the National Flood Insurance Program through: 1) enforce of zoning and building codes; 2) pursue memorandum of agreement between towns and the county to provide flood ordinance administration, as necessary; and, 3) review and update 2009 flood ordinance.	Building Inspections/ Department of Planning and Zoning	High	Ongoing	Retained with minor modifications	This action is also a comprehensive plan recommended action.
~~3~~	~~Continue to evaluate the floodplain manager's roles and responsibilities in each local jurisdiction.~~	~~Department of Planning and Zoning~~	~~High~~	~~Ongoing~~	Deleted; concept of agreements with local towns is included in new action #2	
3	Develop stormwater master plan to study capacity of existing culverts and other structures to determine if sizing is sufficient for future conditions. Identify and replace vulnerable or undersized culvert stream crossings with bridges or larger culverts to reduce flood hazards, where feasible. Implement program for regular inspections and maintenance of roadside ditches and stream channels.	Public Safety, VDOT	Moderate	Ongoing	Retained with minor modifications	Wakefield and Stoney Creek floodplains are particularly problematic and flooding may be alleviated with appropriately sized culverts. Also a comprehensive plan recommended action.
4	Advocate for a Federal/state project to elevate I-95 bridge and widen channel at Stony Creek.	Public Safety, VDOT	Moderate	Ongoing	Retained with minor modifications	status of this project is uncertain
5	Expand GIS capabilities. Acquisition of detailed floodplain BFEs and roadway crossing elevations are particular areas of interest for evacuation and emergency access planning.	Public Safety, USACE	Moderate	Ongoing	Retained with minor modifications	GIS capabilities have expanded, but still room for additional improvements.

6	Increase capacity of stormwater system in conjunction with towns of Wakefield and Waverly.	Public Safety, VDOT	Moderate	Ongoing	Retained	
~~7~~	~~Target FEMA's RL properties for specialized outreach and mitigation activities.~~	~~Public Safety~~	~~Low~~	~~Ongoing~~	Deleted; repetitive loss properties included in new action #10	
7	Increase outreach to citizens regarding preparation and response to hazard events, to include: promote the "Turn Around, Don't Drown" public education campaign; install high water marks at key crossings; social media information ahead of rain/wind/winter storms; temporary digital signage on critical roadways; and other permanent signage to warn of known driving hazards.	Emergency Management, NWS	Moderate	Ongoing	Retained; combined with old action #15	
~~8~~	~~Work with VDOT to address at-risk roads as funding is available.~~	~~Public Safety~~	~~Medium~~	~~Ongoing~~	Deleted; combined with new action #3	
8	Protect public and private structures from natural hazard damage, including acquiring, relocating, retrofitting or elevating floodprone property. This action may include minor structural flood control projects, retrofits to address critical infrastructure and facilities, mapping to determine detailed flood hazards, and stormwater management system improvements. Target repetitive flood loss area identified in Section 5, which has high risk and social vulnerability.	Public Safety	High	Ongoing	Retained with modifications	
~~9~~	~~Review locality's compliance with the NFIP with an annual review of the floodplain ordinances and any newly permitted activities in the 100-year floodplain.~~	~~Department of Planning and Zoning~~	~~Medium~~	~~Annually~~	Deleted; concept included in new mitigation action #2	

9	Distribute brochures and use other means to educate the public regarding preparedness and mitigation. Conduct annual preparedness days for hazards to include floods, wind, tornado, and earthquakes.	Public Safety	Moderate	Ongoing	Retained with modifications	
10	Conduct regular review of repetitive loss and severe repetitive flood loss properties from FEMA. Review will include verification of the geographic location of each property and determination if mitigated and by what means. Corrections can be made to FEMA by filing form FEMA AW-501.	Department of Planning and Zoning	Low	Ongoing	Retained with modifications	
~~11~~	~~Improve flood warning signage~~	~~Emergency Manager/VD OT~~	~~High~~	~~Ongoing~~	Deleted; concept included in new mitigation action #7	
11	Develop and implement detailed tornado response and recovery strategies, to include safe rooms for manufactured home parks, and post-event housing considerations for impacted residents (with HUD).	Emergency Management, Town Administrations, HUD	High	Ongoing	Partially complete; retained action in hopes of further developing the plan	
12	Develop/update county capital improvements plan to include timelines and appropriations for projects identified under this hazard mitigation planning effort.	County Administration	High	Ongoing	Retained with modifications	This action is also a comprehensive plan recommended action.
13	Reduce physical vulnerability of County staff with offices currently in temporary modular units from wind, snow and rain. Provide freestanding building with structural protections that meet or exceed current building code standards.	County Administration	High	Within 2 years of plan adoption	New	

14	Establish development criteria and requirements to include density and intensity criteria, cluster subdivision design, stream buffers, impervious surface limits and innovative stormwater management alternatives.	Planning and Zoning	Moderate	Ongoing	New	This action is also a comprehensive plan recommended action.
15	Provide improved healthcare facilities for county residents, to include services before during and after all types of hazard events, to ensure continuity of operations. Options may include coordination and consolidation of existing health facilities.	Health Department, Public Safety	Moderate	Within 2 years of plan adoption	New	This action is also a comprehensive plan recommended action.

#	Stony Creek Strategy	Lead Agency	Priority	Timeline	2022 Status	Comments
1	Protect public and private structures from natural hazard damage, including acquiring, relocating, retrofitting or elevating floodprone property. This action may include minor structural flood control projects, retrofits to address critical infrastructure and facilities, mapping to determine detailed flood hazards, and stormwater management system improvements.	Mayor & Town Clerk	High	Ongoing	Retained, but split into 2 actions	
~~2~~	~~Integrate mitigation plan requirements and actions into other appropriate planning mechanisms such as comprehensive plans and capital improvement plans.~~			~~Ongoing~~	Deleted; this is accomplished through implementation of the planning process	
2	Use available statewide, regional, or county advanced warning systems, weather gauging systems, evacuation planning tools, and public information resources to prepare community officials and residents in the event of a hazard event. Acquire additional resources to supplement these systems, as required.	Mayor & Town Clerk	High	Ongoing	New	
3	Advocate for a Federal/state project to elevate I-95 bridge and widen channel at Stony Creek.	Mayor	Moderate	Ongoing	New	
4	Install high water signage to warn drivers and pedestrians of dangerous crossing during flooding. Use Turn Around, Don't Drown campaign materials to further warn drivers of hazards.	Mayor	High	within 2 years of plan adoption	New	

#	Wakefield Strategy	Lead Agency	Priority	Timeframe	2022 Status	Comments
1	Protect public and private structures from natural hazard damage, including acquiring, relocating, retrofitting or elevating floodprone property. This action may include minor structural flood control projects, retrofits to address critical infrastructure and facilities, mapping to determine detailed flood hazards, and stormwater management system improvements.	Emergency Services/Safety, Utilities	High	Ongoing	Retained, but broken into 3 separate mitigation actions	
~~2~~	~~Integrate mitigation plan requirements and actions into other appropriate planning mechanisms such as comprehensive plans and capital improvement plans.~~			~~Ongoing~~	Deleted; this is accomplished through implementation of the planning process	
2	Use available statewide, regional, or county advanced warning systems, weather gauging systems, evacuation planning tools, and public information resources to prepare community officials and residents in the event of a hazard event.	Emergency Services/Safety, Utilities	High	Ongoing	Originally, this action was part of Action #1.	Examples include the *Virginia Hurricane Evacuation Guide* and VDEM's Crisis Track.

#	Waverly Strategy	Lead Agency	Priority	Timeline	2022 Status	Comments
1	Protect public and private structures from natural hazard damage, including acquiring, relocating, retrofitting or elevating floodprone property. This action may include minor structural flood control projects, retrofits to address critical infrastructure and facilities, mapping to determine detailed flood hazards, and stormwater management system improvements.	Mayor & Town Administration	High	Ongoing	Retained, but split into 2 actions	
~~2~~	~~Integrate mitigation plan requirements and actions into other appropriate planning mechanisms such as comprehensive plans and capital improvement plans.~~			~~Ongoing~~	Deleted; this is accomplished through implementation of the planning process	
2	Use available statewide, regional, or county advanced warning systems, weather gauging systems, evacuation planning tools, and public information resources to prepare community officials and residents in the event of a hazard event. Acquire additional resources to supplement these systems, as required.	Mayor & Town Administration	High	Ongoing	New	

#	Powhatan County Strategy	Lead Agency	Priority	Timeframe	2022 Status	Comments
1	Protect public and private structures from natural hazard damage, including acquiring, relocating, retrofitting or elevating floodprone property. This action may include minor structural flood control projects, retrofits to address critical infrastructure and facilities, mapping to determine detailed flood hazards, and stormwater management system improvements.	Emergency Management	High	Ongoing	Retained but split into 2 actions	Quick connects for all permanently-installed generators on critical facilities are needed.
~~2~~	~~Continue to incorporate mitigation principles into local comprehensive, emergency management, and recovery plans.~~	~~Planning and Community Development~~	~~High~~	~~Ongoing~~	Deleted	
2	Continue participating in the National Flood Insurance Program, including enforcement of zoning and building codes. Continue to require minimum non-disturbance buffers from the edge of all wetlands and streams.	Planning and Community Development	Medium	Ongoing	Retained with minor modifications	
~~3~~	~~Continue implementation of community emergency response and other public outreach programs.~~	~~Emergency Management~~	~~Medium~~	~~Long-Term~~	Retained, but combined with old action #6 regarding outreach	
3	Maximize use of VDEM's Crisis Track system to collect and transmit damage assessment information post-disaster.	Emergency Management	Medium	Ongoing	Retained with minor modifications to reflect increased state capabilities in this regard	
4	Distribute brochures and use other means to educate the public regarding preparedness and mitigation. Increase situational awareness on behalf of citizens and maximize use of social media, Yammer, county employees, CodeRed/R911 to communicate important hazard-related messages.	Emergency Management	Medium	Ongoing	Retained with minor modifications	

5	Conduct regular review of repetitive loss and severe repetitive flood loss properties from FEMA, if any arise. Review will include verification of the geographic location of each property and determination if mitigated and by what means. Corrections can be made to FEMA by filing form FEMA AW-501.	Planning and Community Development	Low	Ongoing	Retained with minor modifications	There are currently no properties on the list from Powhatan County.
~~6~~	~~Integrate mitigation plan requirements and actions into other appropriate planning mechanisms such as comprehensive plans and capital improvement plans.~~	~~Planning and Community Development~~	~~Medium~~	~~Ongoing~~	Deleted	
~~7~~	~~Make application and participate in the Community Rating System.~~	~~Emergency Management~~	~~Medium~~	~~Ongoing~~	Deleted; FEMA "What If" analysis indicated savings are negligible	
6	Use available statewide, regional, or county advanced warning systems, weather gauging systems, evacuation planning tools, and public information resources to prepare community officials and residents in the event of a hazard event. Acquire additional resources to supplement these systems, as required.	Emergency Management	Moderate	Ongoing	New	
7	Implement measures to reduce wildfire damages, including: 1) mandate Fire Department review for defensible space and wildfire interface in development review process; 2) provide wildfire mitigation training to landowners and other county staff.	Planning and Community Development, VDOF	Moderate	within 3 years of plan adoption	New	
8	Finalize Post-Disaster Redevelopment plan that documents plans and procedures for recovery, including development/designation of a Recovery Operations Center.	Emergency Management	High	within 1 year of plan adoption	New	

#	Prince George County Strategy	Lead Agency	Priority	Timeframe	2022 Status	Comments
1	Continue participating in the National Flood Insurance Program, including enforcement of zoning and building codes.	Building Department	High	Ongoing	Retained with minor modifications	
2	Include an assessment and associated mapping of the municipality's vulnerability to location-specific hazards and make appropriate recommendations for the use of these hazard areas in a future comprehensive plan.	Planning Department	Moderate	within 1 year of plan adoption	Retained with minor modifications	
3	Protect public and private structures from natural hazard damage, including acquiring, relocating, retrofitting or elevating floodprone property. This action may include minor structural flood control projects, retrofits to address critical infrastructure and facilities and stormwater management system improvements.	Planning and Emergency Management	Moderate	Ongoing	Retained but split into 2 actions	
4	Develop stormwater master plan to study capacity of existing culverts and other structures to determine if sizing is sufficient for existing and future conditions. Identify and replace vulnerable or undersized culvert stream crossings with bridges or larger culverts to reduce flood hazards, where feasible. Implement program for regular inspections and maintenance of roadside ditches and stream channels.	Public Works	Moderate	Within 4 years of plan adoption	Retained with minor modifications	
~~5~~	~~Target FEMA's RL properties for specialized outreach and mitigation activities.~~	~~Emergency Management~~	~~Moderate~~	~~Ongoing~~	Deleted; rep loss outreach added to general outreach action below	
5	Maximize use of VDEM's Crisis Track system to collect and transmit damage assessment information post-disaster.	Emergency Management	Low	within 3 years of plan adoption	Retained with minor modifications	
6	Coordinate drought contingency plans with County Extension Office.	Emergency Management	Low	Ongoing	Retained	

7	Distribute brochures and use other means to educate the public regarding preparedness and mitigation. Target FEMA's repetitive flood loss properties for specialized outreach and mitigation activities to encourage purchase of flood insurance and flood preparedness measures.	Emergency Management	Moderate	Ongoing	Retained with minor modifications; includes old action #5 regarding repetitive loss	
8	Staff Emergency Management Office, Building Inspections Office, and/or Zoning Office at adequate levels.	County Administrator / agency heads	Low	Within 4 years of plan adoption	Retained	
9	Conduct regular review of repetitive loss and severe repetitive flood loss properties from FEMA. Review will include verification of the geographic location of each property and determination if mitigated and by what means. Corrections can be made to FEMA by filing form FEMA AW-501.	Emergency Management	Low	Ongoing	Retained with minor modifications	
~~10~~	~~Review locality's compliance with the NFIP with an annual review of the floodplain ordinances and any newly permitted activities in the 100-year floodplain.~~	~~Emergency Management~~	~~Medium~~	~~Ongoing~~	Deleted; this is addressed in action #1	
10	Build new Fire Department burn building.	Emergency Management	High	Ongoing	Design is complete. Retained with modifications to focus on construction.	
~~11~~	~~Pursue construction of new fire station at Route 10 and Moody Road~~	~~Emergency Management~~	~~High~~	~~Ongoing~~	Complete; action deleted.	
11	Continue implementation of automatic aid agreement with Hopewell	Emergency Management	High	Ongoing	Retained	
~~12~~	~~Integrate mitigation plan requirements and actions into other appropriate planning mechanisms such as comprehensive plans and capital improvement plans.~~	~~Planning Department; Emergency Management~~	~~Medium~~	~~Ongoing~~	Deleted	
12	Use available statewide, regional, or county advanced warning systems, weather gauging systems, evacuation planning tools, and public information resources to prepare community officials and residents in case of a hazard event. Acquire additional resources to supplement these systems, as required.	Emergency Management	Moderate	Ongoing	New	

#	Richmond Strategy	Lead Agency	Priority	Timeframe	2022 Status	Comments
1	Re-establish independent Office of Emergency Management.	Emergency Management	High	within 2 years of plan adoption	Retained with modifications.	
2	Establish a dedicated, independent EOC to fully support response and recovery efforts, and new technology for Emergency Management.	City Administration	High	within 4 years of plan adoption	New	
3	Continue to update emergency response plan and educate the public on hazard resiliency and emergency preparedness. Conduct emergency planning, climate, and resiliency engagement and outreach, particularly in communities with high vulnerability to hazards that have been traditionally underrepresented in city planning processes: Black and African American, Hispanic and Latino, lower-income, and those with limited English proficiency.	Office of Sustainability, Emergency Management	High	Ongoing	Retained, but combined with old action 7 to refocus efforts toward underrepresented populations.	Includes conducting annual preparedness days for hazards to include floods, wind, and earthquakes.
4	Conduct regular review of repetitive loss and severe repetitive flood loss properties from FEMA. Review will include verification of the geographic location of each property and determination if mitigated and by what means. Corrections can be made to FEMA by filing form FEMA AW-501.	Department of Public Utilities	Low	Ongoing	Retained with modifications.	
5	Continue participating in the NFIP and identify additional Community Rating System activities to reduce flood risk.	Department of Public Utilities	Moderate	Long-term	Retained with modifications.	
~~6~~	~~Continue to enforce zoning and building codes, with emphasis on floodplain management.~~	~~Planning and Development Review & Department of Public Utilities~~	~~High~~	~~Ongoing~~	Deleted; concept incorporated into another action	

6	Improve existing flood warning system to increase the ability to forecast flood events and flood depths. Acquire additional resources to build components of a local evacuation plan, including: improved IFLOWS gauges, high hazard water crossing elevations for city and state-owned roads, and a flood alert system (using GIS and the City's public warning system).	DPW, DPU, DEC, Emergency Management	High	Long-term	Retained with modifications.	Partner with other organizations including the NWS, USGS, local watershed organizations and the Flood Wall Manager.
~~7~~	~~Distribute brochures and use other means to educate the public regarding preparedness and mitigation.~~	~~Emergency Management~~	~~Moderate~~	~~Long term~~	Deleted; concept incorporated into another action regarding targeted messaging.	
7	Distribute NOAA weather radios to residents.	Emergency Management	Moderate	Ongoing	Partially complete. Retained with modifications.	
8	Enhance use of GIS for urgent emergency needs.	Emergency Management, DPW, DIT	High	Ongoing	Substantially complete; action retained with modifications.	
9	Expand facility assessment inventory of all City-owned facilities, including primary and secondary schools, to evaluate their resistance to all natural hazards. Identify and implement necessary retrofits or relocations to increase facility hardening, including addressing backup power needs through generators or micro-grids. Invest in data management system to allow local GIS/CAD storage archive of building plans for first responders and emergency planners.	DPR, Citywide	Moderate	Long-term	Retained with modifications.	City has conducted wind study on many City-owned facilities. An assessment inventory of City-owned facilities is identified in Richmond 300. This HMA would include collection of structural and elevation data, as well.
10	Perform hazard prevention activities to increase the protection of public and private structures from natural hazard damage, such as maintenance of floodwall, acquiring, relocating, retrofitting or elevating flood prone property, upgrading public infrastructure near hazard prone areas or other flood control projects.	DPU	High	Ongoing	Retained with modifications.	
11	Provide targeted outreach to business owners (particularly those with hazardous materials stored on site) to discuss hazards and mitigation alternatives.	Richmond Fire and Emergency Services Economics Portfolio	Moderate	Ongoing	Retained with modifications.	

12	Continue to maintain existing Continuity of Operations Plans with emphasis on redundant power needs for specific critical facilities, and mitigation actions to address the water supply system.	Emergency Management, Citywide	Moderate	within 3 years of plan adoption		
13	Develop plan for community resilience hubs to serve as "one stop shops" for information on hazard and climate resilience and services before, during, and after hazard-related events. Services provided after hazard-related events may include device charging, shower and clothes washing facilities, and cooling/heating refuge.	Emergency Management; Office of Sustainability	Moderate	within 3 years of plan adoption	Retained with modifications.	Also an action identified in Richmond 300
14	Integrate equity-centered hazard and climate change planning into all city plans, to include special event planning, operational exercises, and disaster management planning.	Citywide	Moderate	Ongoing	Retained with modifications.	
15	Conduct detailed climate change vulnerability and risk assessments for Richmond's population, natural resources, built assets, and municipal facilities and operations.	Office of Sustainability	Moderate	within 4 years of plan adoption	New	
16	Increase staffing levels for hazard mitigation planning and implementation in Emergency Management, Public Utilities, Office of Sustainability, and/or other relevant departments. Establish as part of this a cross-departmental team for coordinating citywide hazard and resilience planning and service delivery.	Multiple departments	High	within 3 years of plan adoption	New	
17	Adopt and implement the RVAgreen 2050 equitable climate action and resilience plan. Implement strategies to reduce vulnerability and increase resilience to the impacts of climate change (extreme heat, extreme precipitation, and flooding).	Office of Sustainability	Moderate	Ongoing	New	
18	Continue to implement the RVAH2O Green Infrastructure Master Plan to expand green infrastructure on public lands and rights-of-way to improve stormwater quality and reduce runoff through City projects and community partnerships, including public engagement and education programs.	Public Utilities	Moderate	Ongoing	New	

19	Develop, fund, and implement an urban heat island reduction plan and program with a focus on vulnerable populations and ecosystems as part of implementation of the RVAgreen 2050 equity-centered climate action and resilience plan. Include depaving initiatives and other actions to reduce impervious surface.	Office of Sustainability	Moderate	Ongoing	New	
20	Expand the Community Emergency Response Team (CERT). Hire a full-time coordinator for the CERT program.	Emergency Management	Low	within 4 years of plan adoption	New	
21	Increase the proportion of Richmonders within a 10-minute walk of a public green space with amenities such as shade structures and tree canopy, public water fountains, and community garden space.	Parks, Recreation, and Community Facilities	Moderate	Ongoing	New	
22	Increase and enhance the resilience and health of Richmond's urban forest. Increase tree canopy to achieve co-benefits of improved stormwater management, improved air quality, and reduced urban heat island impacts.	Public Works	Moderate	Long-term	New	
23	Adopt an ordinance to require the city to use the Institute for Sustainable Infrastructure Envision framework to assess sustainability, resiliency, and equity in all new infrastructure projects.	Office of Sustainability; Public Works	High	within 2 years of plan adoption	New	
24	Develop Resilient Design Guidelines and require builders to incorporate design measures to reflect a changing climate, increased precipitation and flooding in concert with a public education campaign to convey the benefits of adaptive and resilient buildings.	Office of Sustainability; Planning and Development Review	Low	within 4 years of plan adoption	New	
25	Increase resilience of transit systems as part of implementation of the RVAgreen 2050 equity-centered climate action and resilience plan. Integrate and connect street trees with public transit and biking infrastructure.	Public Works, Office of Sustainability, GRTC, Office of Equitable Transit and Mobility	Moderate	Ongoing	New	

26	Continue to manage industrial processes and waste streams to protect the community and natural resources from hazardous and other materials.	DPW, DPU, Fire and Emergency Services	High	Ongoing	New	
27	Establish a community response fund for direct and immediate assistance to community organizations that provide services to residents to enhance resilience to climate change hazards as part of implementation of the RVAgreen 2050 equity-centered climate action and resilience plan.	Office of Sustainability	High	within 2 years of plan adoption	New	

#	Hopewell Strategy	Lead Agency	Priority	Timeline	2022 Status	Comments
1	Integrate mitigation goals into future capital improvement plans to ensure that new city facilities are located out of identified hazard areas.	Emergency Management	High	Ongoing	Retained with minor modifications	
2	Continue participating in the National Flood Insurance Program, including enforcement of zoning and building ordinances. Update Article XV, Floodplain District, ordinance. Research joining the NFIP Community Rating System.	Development	High	Ongoing	Retained with minor modifications	
3	Target FEMA's repetitive loss property, and those in the surrounding repetitive loss area, for specialized outreach and mitigation activities.	Emergency Management	Moderate	Ongoing	Retained with minor modifications	
4	Inspect and clear debris from stormwater drainage system. Increase capacity of Cabin Creek drainage system, including: 1) debris clearing and revetment, and 2) if necessary, re-alignment of channel. Increase capacity of Cattail Creek channel and culverts crossing CSX & Norfolk Southern Railroad to address repeated flooding and damage to infrastructure.	Public Works	Moderate	Ongoing	Retained with minor modifications	
~~5~~	~~Review locality's compliance with the NFIP with an annual review of the floodplain ordinances and any newly permitted activities in the 100-year floodplain.~~	~~Development~~	~~Moderate~~	~~Ongoing~~	Deleted; incorporated into new action #2	
5	Protect public and private structures from natural hazard damage, including acquiring, relocating, retrofitting or elevating floodprone property. This action may include minor structural flood control projects, and an engineering study to identify retrofits to address critical infrastructure vulnerabilities such as the need for generators.	Emergency Management, Public Works	Moderate	Ongoing	Retained but split into 2 actions	
~~6~~	~~Consider participating in FEMA's CRS.~~	~~Development~~	~~Medium~~	~~Ongoing~~	Deleted; incorporated into new action #2	

~~7~~	~~Relocate public safety facility outside of 0.5 mile evacuation zone for industrial plants and as far as possible from train yards/tracks.~~	~~Emergency Management~~	~~High~~	~~Short Term~~	Deleted; incorporated into new action #1	
6	Engage owners of the city's industrial businesses to discuss opportunities for retrofitting/hardening their facilities, and developing business resilience plans.	Emergency Management	Moderate	Ongoing	Retained	
~~7~~	~~Increase capacity of Cabin Creek drainage system including 1) debris clearing and revetment, and 2) if necessary, re-alignment of channel.~~	~~Public Works~~	~~High~~	~~Short Term~~	deleted; concept included in SWM action	
7	Develop a debris removal plan.	Public Works, Emergency Management	Moderate	Within 2 years of plan adoption	Retained	
~~8~~	~~Review and revise, if needed, local floodplain ordinances.~~	~~Development~~	~~Medium~~	~~Ongoing~~	Deleted; incorporated into new action #2	
~~8~~	~~Request list from VDEM or VA DCR and conduct annual review of RL and SRL property list to ensure accuracy. Review will include verification of the geographic location of each RL property and determination if mitigated and by what means. Provide corrections if needed by filing form FEMA AW-501.~~	~~Emergency Management~~	~~Low~~	~~ongoing~~	Deleted; only 1 property on list. Updating every 5 years is sufficient	
8	Distribute brochures and use other means to educate the public regarding preparedness and mitigation.	Emergency Management	Moderate	ongoing	Retained	
9	Install NWS-grade tide gauge at confluence of James and Appomattox Rivers. Include acoustic water-level sensor, protective well components, data collection platform, GOES satellite telemetry, enclosure, stand, batteries, antenna, and solar panels.	Emergency Management	Low	Within 4 years of plan adoption	Retained with minor modifications	
10	Complete continuity of operations plan.	Emergency Management	Low	Within 1 year of plan adoption	Retained with minor modifications	
11	Integrate VDEM Crisis Track software (for post-disaster damage assessment) into local GIS platforms for data collection, storage and sharing.	Development	Low	Within 1 year of plan adoption	Retained with minor modifications	
~~12~~	~~Identify training opportunities for staff to enhance ability to use GIS for emergency management needs.~~	~~Emergency Management~~	~~Low~~	~~Ongoing~~	Deleted; training is included in prior action	

~~13~~	~~Increase flow capacity of Cattail Creek channel and culverts crossing CSX & Norfolk Southern RR to address repeated flooding and damage to infrastructure.~~	~~Public Works~~	~~High~~	~~Short Term~~	deleted; concept included in SWM action	
~~14~~	~~Stabilize stream channel and road embankment of City's primary emergency route: Winston Churchill Dr, between High Ave & Arlington Rd. and protect adjacent residences.~~	~~Public Works~~	~~High~~	~~Short Term~~	Deleted; substantially complete	
~~15~~	~~Conduct engineering study and upgrade generator at Hopwell critical facilities.~~	~~Public Works~~	~~High~~	~~Short Term~~	deleted and incorporated into another action	
~~16~~	~~Install audible outside warning system.~~	~~Emergency Management~~	~~High~~	~~Short Term~~	Deleted; action not feasible.	
~~17~~	~~Integrate mitigation plan requirements and actions into other appropriate planning mechanisms such as comprehensive plans and capital improvement plans.~~	~~Development~~	~~Low~~	~~Ongoing~~	Deleted	
13	Formalize process for tax sale properties, with special focus on those in hazardous locations (SFHA, 500-year floodplain, hazardous materials, etc.).	Commissioner of Revenue, Emergency Management, Risk Management	Moderate	Within 2 years of plan adoption	New	
14	Develop local stormwater management resilience plan and incorporate identified upgrades into the State's Coastal Resilience Plan.	Public Works	High	Within 1 year of plan adoption	New	
15	Implement State Code requirement to adopt Capital Improvement Budget. As outlined in the comprehensive plan, a CIP would identify and prioritize projects for environmental protection, including funding for: critical RPA maintenance, mitigation and remediation; stormwater retrofits on City-owned properties; development of Small Area Plans in key areas of environmental vulnerability, and grant and investment support for high priority pollutant reduction projects.	City Manager, Finance, Public Works	High	Within 2 years of plan adoption	New	

16	Enact additional regulations to govern shoreline development, to include: require vegetation as an alternative to manmade structures; require all new shoreline development applications are accompanied by a Shoreline Protective Plan, in accordance with the Prince George County Shoreline Management Plan; ensure all newly delineated wetlands (resulting from review of development proposals) are added the city's wetland resource inventory.	Development	Moderate	Within 5 years of plan adoption	New	

#	New Kent County Strategy	Lead Agency	Priority	Timeline	2022 Status	Comments
~~1~~	~~Complete initial application for Storm Ready program.~~	~~Emergency Management~~	~~Medium~~	~~2018~~	Completed; action deleted	renewed in 2020; will retain
1	Conduct regular review of repetitive loss and severe repetitive flood loss properties from FEMA. Review will include verification of the geographic location of each property and determination if mitigated and by what means. Corrections can be made to FEMA by filing form FEMA AW-501.	Emergency Management	Low	Annually	Retained with modifications	
2	Maintain floodplain protection ordinances and policies that allow the county to fully participate in the National Flood Insurance Program.	Inspections	High	Ongoing	Retained with modifications	This action is also expressed in the county's comprehensive plan.
~~3~~	~~Continue to incorporate hazard mitigation construction and landscaping techniques into new community facilities to reduce risk of building fires and wildfire susceptibility.~~	~~Building Development Office~~	~~Medium~~	~~Ongoing~~	Deleted	No support for modifying existing standards
~~3~~	~~Consider participating in FEMA's CRS and achieve as high a rating as possible.~~	~~Emergency Management~~	~~Medium~~	~~Ongoing~~	Deleted	
~~4~~	~~Continue to work with the NWS to promote the "Turn Around, Don't Drown" public education campaign.~~	~~Emergency Management~~	~~Medium~~	~~Ongoing~~	Deleted; concept included in outreach action	
~~5~~	~~Continue to work with VDOF to implement the FIREWISE program in New Kent County.~~	~~Emergency Management~~	~~Medium~~	~~Ongoing~~	Deleted; concept included in single fire mitigation messaging action	
3	Distribute brochures and other literature to educate the public regarding preparedness and mitigation. Use a variety of means to disseminate hazard-related information, including social media and workshops. Prepare transferable lesson plans for delivery in schools and summer camps (Storm Camp). Incorporate the NWS "Turn Around, Don't Drown" campaign.	Emergency Management	Moderate	Ongoing	Retained with modifications	
4	Encourage new facilities such as banks, gas stations, and pharmacies to have back-up generators as they are developed.	Emergency Management	Moderate	Ongoing	Retained with modifications	

5	Identify and replace vulnerable or undersized structures with bridges, larger culverts or other measures to reduce flood hazards.	Planning, Environmental, General Services	Moderate	Ongoing	Retained with modifications	
6	Pursue opportunities and funding to harden local utilities and infrastructure to improve recovery time, including fulfilling any equipment and heavy machinery needs to accomplish this, and retrofitting critical facilities and systems.	Public Utilities, Emergency Management	Moderate	Ongoing	Retained with modifications	
7	Protect public and private structures from natural hazard damage, including acquiring, relocating, retrofitting or elevating floodprone property. This action may include minor structural flood control projects.	Emergency Management	Low	Ongoing	Retained with modifications	
~~8~~	~~Increase staff resources for emergency management and floodplain management.~~	~~Emergency Management~~	~~High~~	~~Ongoing~~	Deleted; action complete	
~~9~~	~~Increase woodland community and wildfire planning county wide.~~	~~Planning~~	~~Medium~~	~~Ongoing~~	Deleted; action is too vague	
~~10~~	~~Investigate manufactured homes and trailers to evaluate their resistance to wind and flood hazards.~~	~~Building Development Office~~	~~Low~~	~~Ongoing~~	Deleted	
~~11~~	~~Mitigate road construction in Fannies Creek area.~~	~~Emergency Management~~	~~Medium~~	~~Ongoing~~	Deleted; action complete	
~~12~~	~~Review locality's compliance with the NFIP with an annual review of the floodplain ordinances and any newly permitted activities in the 100-year floodplain.~~	~~Emergency Management~~	~~Moderate~~	~~Annually~~	Deleted; included with new action #2	

~~13~~	~~Support mitigation projects that will result in protection of public or private property from natural hazards. Eligible projects include but are not limited to: 1. acquisition of floodprone property 2. elevation of floodprone structures 3. minor structural flood control projects 4. relocation of structures from hazard prone areas 5. retrofitting of existing buildings, facilities and infrastructure 6. retrofitting of existing buildings and facilities for shelters 7. critical infrastructure protection measures 8. stormwater management improvements 9. advanced warning systems and hazard gauging systems (weather radios, reverse 911, stream gauges, I flows) 10. targeted hazard education 11. wastewater and water supply system hardening and mitigation.~~	~~Emergency Management~~	~~Low~~	~~Ongoing~~	Deleted; this catalog of alternatives is included in several other actions	
~~14~~	~~Use fee simple and/or permanent easement to prevent development in the highest priority undeveloped floodplain (and/or wetlands) areas. Use these areas as public open space for passive recreational uses or utility easements.~~	~~Community Development~~	~~Moderate~~	~~Ongoing~~	Deleted; concept adequately captured in new action #2	
~~15~~	~~Work with state to improve traffic management issues/concerns from Hampton Roads evacuation.~~	~~Planning~~	~~High~~	~~Ongoing~~	Deleted; action complete	
~~16~~	~~Monitor and asses earthquake vulnerability and potential impacts to vulnerable properties.~~	~~Delete~~	~~Low~~	~~Ongoing~~	Deleted; action complete	
8	Identify additional shelter mass care locations.	Emergency Management	Moderate	Ongoing	Retained with modifications	
9	Use available statewide, regional, or county advanced warning systems, weather gauging systems, evacuation planning tools, and public information resources to prepare community officials and residents in case of a hazard event. Acquire additional resources to supplement these systems, as required. Consider countywide flood warning system and evacuation plan	Emergency Management	Low	Ongoing	Retained with modifications	

~~10~~	~~Investigate new campaign for community alert system~~	~~Emergency Management~~	~~High~~	~~Ongoing~~	Deleted; concept captured in flood warning action	
~~11~~	~~Investigate siren/early warning devices in high population areas~~	~~Emergency Management~~	~~Low~~	~~Ongoing~~	Deleted; concept captured in flood warning action	
10	Create a culture within New Kent County government focused on hazard mitigation objectives: 1) integrate mitigation plan requirements and actions into other appropriate planning mechanisms, such as the comprehensive plan and capital improvement plan; 2) review processes and procedures across all functions to ensure objectives are met (Development Review Committee hazard reviews, for example); and 3) regularly brief elected officials on mitigation plan status and priorities. Within Emergency Management, conduct and receive training to stay current on grant opportunities and identify new opportunities for data sharing within the county, region and state. Work to focus mitigation actions on specific structures, neighborhoods and problem areas. Incorporate mitigation objectives into recovery planning and regular exercises.	Emergency Management	High	Ongoing	Retained with modifications	
11	Periodically inventory existing dams in the county, assess their hazard potential, and seek funding for preparation of dam inundation zone maps. Ensure Emergency Action Plans (EAPs) are up to date, identify necessary maintenance or retrofits, and conduct exercises to reinforce EAP procedures.	Environmental; Emergency Management	Moderate	Ongoing	New	This action is also expressed in the county's comprehensive plan.
12	Promote native and drought-tolerant grass species and landscaping as an alternative to traditional fescue-based lawns.	Emergency Management and County Extension Services	Low	Within 4 years of plan adoption	New	This action is also expressed in the county's comprehensive plan.

#	Petersburg Strategy	Lead Agency	Priority	Timeframe	2022 Status	Comments
1	Continue participating in the National Flood Insurance Program, including enforcement of zoning and building codes.	Building Department	High	Ongoing	Retained with minor modifications	
2	Partner with parent-teacher associations and local schools to implement existing curriculum related to natural hazards (e.g., Masters of Disaster, Risk Watch).	Emergency Management	Low	Ongoing	Retained	
3	Complete application for StormReady Program.	Emergency Management	Low	within 2 years of plan adoption	Retained	City is not certified StormReady as of January 2022.
4	Consider participating in FEMA's CRS.	Public Works	Medium	Ongoing	Retained	
5	Inspect and clear debris from stormwater drainage system. Partner with VDOT to ensure non-City ROWs are also clear.	Public Works	High	Ongoing	Retained with minor modifications	
6	Finish implementation of Reverse 911 system.	Emergency Management	Medium	Ongoing	Retained	
7	Install high water mark signage along bridges and other structures to indicate dangerous water levels along creeks and rivers in flood-prone areas.	Public Works	Medium	Ongoing	Retained with minor modifications	
8	Investigate all public utility lines to evaluate their resistance to flood, wind, and winter storm hazards.	Public Works	Medium	Ongoing	Retained	
9	Work with VDOT, private utilities, and/or private homeowners to trim or remove trees that could down power lines.	Public Works	Low	Ongoing	Retained	
10	Distribute brochures and use other means to educate the public regarding preparedness and mitigation.	Emergency Management	Medium	Ongoing	Retained	
11	Conduct regular review of repetitive loss and severe repetitive flood loss properties from FEMA. Review will include verification of the geographic location of each property and determination if mitigated and by what means. Corrections can be made to FEMA by filing form FEMA AW-501.	Planning/ Assessor	Low	Annually	Retained with minor modifications	
~~12~~	~~Review locality's compliance with the NFIP with an annual review of the floodplain ordinances and any newly permitted activities in the 100-year floodplain.~~	~~Emergency Management~~	~~Medium~~	~~Annually~~	Deleted	Modifications to action 1 captured this action.

12	Install quick connects for generators at critical facilities. Ensure existing generators are working at all times with regular maintenance and inspections. Replace generators, as necessary.	Emergency Management	Medium	Ongoing	Retained with minor modifications	
13	Work with state partners and neighboring localities to monitor and implement Next Generation 911 GIS data standards.	GIS Manager, PDC	High	Ongoing	Retained	
14	Protect public and private structures from natural hazard damage, including acquiring, relocating, retrofitting or elevating floodprone property. This action may include minor structural flood control projects, retrofits to address critical infrastructure and facilities and stormwater management system improvements.	Fire-Rescue	Moderate	Ongoing	Retained with minor modifications; split into 2 actions. See new action 15.	
~~15~~	~~Integrate mitigation plan requirements and actions into other appropriate planning mechanisms such as comprehensive plans and capital improvement plans.~~	~~Community did not respond to status update request.~~	~~Community did not respond to status update request.~~	~~Ongoing~~	Deleted; this is accomplished through implementation of the planning process	
15	Use available statewide, regional, or county advanced warning systems, weather gauging systems, evacuation planning tools, and public information resources to prepare community officials and residents in the event of a hazard event. Acquire additional resources to supplement these systems, as required.	Fire-Rescue	Moderate	Ongoing	New	

#	Hanover Strategy	Lead Agency	Priority	Timeframe	2022 Status	Comments
~~1~~	~~Complete installation of necessary electrical hook- up, wiring, and switches to allow readily accessible connections to emergency generators at key critical facilities.~~	~~Emergency Management~~	~~Medium~~	~~Ongoing~~	Deleted; substantially complete. Included future critical infrastructure needs in separate action	
1	Use available statewide, regional, or county advanced warning systems, weather gauging systems, evacuation planning tools, and public information resources to prepare community officials and residents in the event of a hazard event: Develop a more advanced flood warning system to increase the ability to locally and specifically forecast flood events and flood depths. Partner with other organizations including the NWS, U.S. Geological Survey (USGS), and local watershed organizations; acquire additional resources to build components of a local evacuation plan, including: new IFLOWS gauges, high hazard water crossing elevations for county and state-owned roads, and a flood alert system (using GIS, CodeRed and reverse 911); and create more targeted flood messages and planning that can be conveyed to citizens. Include dam owners and downstream property owners.	Emergency Management	High	Within 2 years of plan adoption	Retained with minor modifications	
2	Promote the “Turn Around, Don’t Drown” public education campaign.	Public Safety	High	Ongoing and frequently	Retained with minor modifications	
3	Continue participating in the National Flood Insurance Program, including enforcement of zoning and building codes. Develop plan to improve flood insurance coverage in the county, similar to the CRS Plan for Public Involvement. Consider updating flood ordinance from 2008.	Planning and Community Development	Moderate	within 4 years of plan adoption	Retained with minor modifications	
4	Distribute brochures and use other means to educate the public regarding preparedness and mitigation. Conduct annual preparedness days for hazards to include floods, wind, tornado and earthquakes.	Emergency Management	Moderate	Annually	Retained with minor modifications	

5	Conduct regular review of repetitive loss and severe repetitive flood loss properties from FEMA. Review will include verification of the geographic location of each property and determination if mitigated and by what means. Corrections can be made to FEMA by filing form FEMA AW-501.	Planning and Community Development	Low	Annually	Retained with minor modifications	
6	Protect public and private structures from natural hazard damage, including acquiring, relocating, retrofitting or elevating floodprone property. This action may include minor structural flood control projects, retrofits to address critical infrastructure and facilities and stormwater management system improvements.	Emergency Management, Public Works, Planning and Community Development	High	Retained but split. Critical infrastructure retrofits in old action #1 included	Retained with minor modifications	
~~7~~	~~Integrate mitigation plan requirements and actions into other appropriate planning mechanisms such as comprehensive plans and capital improvement plans.~~	~~Planning and Community Development~~	~~High~~		Deleted	
7	Improve community interoperability when cell services are interrupted. Work with cell service providers and electric utility to ensure power redundancies at cell towers.	Emergency Management	Moderate	within 3 years of plan adoption	New	
8	Assemble pre-approved messaging plans for various hazard events. Include focus audience, message, and plan for dissemination. Assemble resources required to execute plans for each hazard.	Emergency Management	Moderate	within 3 years of plan adoption	New	

#	Ashland Strategy	Lead Agency	Priority	Timeframe	2022 Status	Comments
1	Continue to identify areas of existing development where drainage is of significant concern, and implement a drainage improvement program, where feasible. Evaluate and make improvements, as needed, to stormwater system to ensure adequacy to handle major rain events.	Planning and Utilities	Moderate	Ongoing	Retained	
2	Continue NFIP Community Rating System activities to reduce flood risk. Consider development of a Plan for Public Involvement per CRS User's Manual that is coordinated with other community outreach programs.	Planning and Community Development	Moderate	Ongoing	Retained with minor modifications	
3	Finalize Continuity of Operations plan. New County/Town THIRA, COOP, EOP are being completed together. Each department will have their own operational plans.	Police	Low	Long-range	Substantially complete; however, COOP has not been finalized.	
4	Continue to enhance capabilities to use GIS for emergency management.	Planning and Community Development	Low	Ongoing	Retained	
5	Protect public and private structures from natural hazard damage, including acquiring, relocating, retrofitting or elevating floodprone property. This action may include minor structural flood control projects, retrofits to address critical infrastructure and facilities and stormwater management system improvements.	Planning and Community Development, DPW	Moderate	Ongoing	Retained but split into 2 actions	Potential projects include stream restorations, debris cleanup and the equipment necessary to assist, identification and removal of hazardous trees before wind and winter weather events.
6	Continue participating in the National Flood Insurance Program, including enforcement of zoning and building codes.	Planning and Community Development	Moderate	Ongoing	Retained with minor modifications	
7	Distribute brochures and use other means (e.g., local media) to educate the public regarding preparedness and mitigation. Conduct annual preparedness days for hazards to include floods, tornados, wind, and earthquakes.	Police	Moderate	Ongoing	Retained with minor modifications	Activities focus on flooding, stormwater management, hurricanes, winter weather and other “stay safe” messaging.

~~8~~	~~Request list from VDEM or VA Department of Conservation and Recreation (DCR) and conduct annual review of repetitive loss (RL) and severe repetitive loss (SRL) property list to ensure accuracy. Review will include verification of the geographic location of each RL property and determination if mitigated and by what means. Provide corrections if needed by filing form FEMA AW-501.~~	~~Planning and Community Development~~	~~Low~~	~~Annually~~	Deleted; community has no repetitive losses on current list	
9	Integrate mitigation plan requirements and actions into other appropriate planning mechanisms for the town and county, such as comprehensive plans and capital improvement plans. Add hazard mitigation discussion to the town's comprehensive plan, and include pertinent mitigation actions.	Planning and Community Development	High	Ongoing	Retained with minor modifications	
10	Use available statewide, regional, or county advanced warning systems, weather gauging systems, evacuation planning tools, and public information resources to prepare community officials and residents in the event of a hazard event. Acquire additional resources to supplement these systems, as required.	Police and Planning and Community Development	Low	Ongoing	New	
11	Continue coordination between Planning and Community Development and County Building Services to ensure no structures are constructed in the SFHA without proper permitting.	Planning and Community Development, Hanover County	High	Ongoing	New	

#	Henrico County Strategy	Lead Agency	Priority	Timeframe	2022 Status	Comments
1	Implement all-inclusive hazard mitigation planning for schools, to include: 1) continue annual site multi-hazard inspections of schools to identify areas for use as tornado safe rooms, assessment of structure vulnerability to earthquake and flood based on floor elevations; 2) prepare Emergency Action Plan for each school; 3) incorporate building plans into GIS to enable first responders entering the schools for any reason; and 4) ensure sheltering sites meet all national shelter standards, have generator power, and are protected from wind and flood. Fund and fulfill required retrofits upon identification.	Emergency Management & Henrico County Public Schools	Moderate	1, 7	Retained with modifications	within 4 years of plan adoption, with ongoing annual inspections
2	Continue to implement drainage and stream channel maintenance program.	Public Works	Low	1, 2, 7	Retained with modifications	Ongoing
3	Expand existing comprehensive Public Outreach program through coordination of several ongoing efforts related to hazards: 1) maximize Community Emergency Resource Team resources to enhance training availability to targeted populations; 2) continue participating in Great Shakeout (workplace safety drills) and other wide-scale disaster drills; 3) continue participation in the StormReady program; 4) continue outreach through brochure distribution and other means (e.g., utility bill messaging, local media, social media) to educate the public regarding preparedness and mitigation; 5) coordinate all messaging with CRS Plan for Public Information (PPI), which focuses on increasing flood insurance countywide; and 6) rebrand Dept. of Public Works outreach for flood and dam safety and tie into other EM initiatives.	Emergency Management, Finance, Public Works, Public Utilities, Public Relations	Moderate	1, 2, 4, 5, 7	Retained with minor modifications	Ongoing
~~4~~	~~Enhance water availability for wildfire fighting in eastern portion of the county.~~	~~Fire~~	~~Moderate~~	~~1,3~~	Complete; action deleted.	~~Ongoing~~

~~5~~	~~Ensure stormwater system remains adequate for flood hazards.~~	~~Public Utilities~~	~~Moderate~~	~~1, 3, 6, 7~~	Action deleted.	~~Ongoing~~
~~5~~	~~Identify and secure pre-event shelter sites (not flood-prone, not subject to wind damage) and ensure compliance with national shelter standards.~~	~~Emergency Management~~	~~Low~~	~~1, 4, 7~~	Action deleted; concept incorporated into new action #1 regarding schools	~~Ongoing~~
4	Upgrade/retrofit existing EOC and identify viable temporary EOCs that would suit the county's purposes. Expand options for public facilities that can receive generator backup and be used as temporary emergency shelters.	Emergency Management	High	1, 7	Retained with modifications	within 10 years of plan adoption
~~5~~	~~Incorporate mitigation into existing standing regional planning groups.~~	~~Emergency Management~~	~~Moderate~~	~~1, 2, 4, 6~~	Deleted	~~Ongoing~~
5	Install electrical hook-ups, wiring, and switches to allow quick connects at county-owned critical facilities, including for example, shelters and pump stations.	Emergency Management	High	1, 7	Retained with modifications	Ongoing
6	Provide continuous, ongoing training on hazard mitigation and the county's related initiatives to all county staff. Training will enhance ability to integrate mitigation objectives in all county programs.	Public Works, Emergency Management	Moderate	1, 2, 7	Retained with modifications	Ongoing
7	Expand existing local, regional, and county advanced warning systems, weather gauging systems, evacuation planning tools, and public information resources to prepare community officials and residents in case of a hazard event. Acquire additional resources to supplement these systems, including: 1) build a comprehensive stream gauge network that includes data on water elevation, water quality, precipitation measurement, and dam impoundment levels; 2) updated Emergency Action Plans based on rain gauge data; 3) warning system(s) that alert citizens; and 4) detailed evacuation planning tied to warning system and based on critical road elevations or other road obstructions.	Public Utilities, Public Works, and Emergency Management, USGS	Low	1, 2, 3, 6	Retained with modifications	Ongoing

8	Maintain relationships with Dominion Virginia Power, Comcast, Verizon (and other utility service providers), and VDOT to ensure swift removal of debris and continued maintenance of lines to minimize future debris.	Dominion, DPW, DPU, Fire and Police	Moderate	1, 3	Retained	Ongoing
~~9~~	~~Incorporate mitigation principles into local comprehensive, emergency management, and recovery plans.~~	~~Emergency Management~~	~~Low~~	~~1, 2, 3, 4, 5, 6, 7~~	Deleted	~~Ongoing~~
9	Conduct annual review of repetitive loss, severe repetitive loss and all NFIP claims and policy coverage data from FEMA. Review will include verification of the geographic location of each property and determination if mitigated and by what means. Data analysis will inform other community mitigation efforts.	Public Works, FEMA Region III	Low	1, 2	Retained	Annual, or as data are provided
~~10~~	~~Continue to enforce zoning and building codes, with emphasis on floodplain management.~~	~~Building Inspections~~	~~High~~	~~2~~	Deleted	~~Ongoing~~
10	Continue participating in the National Flood Insurance Program and Community Rating System, including enforcement of zoning and building codes.	Public Works	Moderate	2	Retained with modifications	Ongoing
11	Protect public and private structures from natural hazard damage, including acquiring, relocating, retrofitting or elevating floodprone property. This action may include minor structural flood control projects, retrofits to address critical infrastructure and facilities, and stormwater management system improvements.	Emergency Management, Public Utilities, Public Works, Planning, Permit Center, Building Inspections, Police, Schools, Rec & Parks	High	1, 2, 4, 5, 7	Retained with modifications	Ongoing
~~12~~	~~Integrate mitigation plan requirements and actions into other appropriate planning mechanisms such as comprehensive plans and capital improvement plans.~~	~~Planning and Emergency Management~~	~~High~~	~~1, 2~~	New	~~Ongoing~~

12	Prepare countywide hazard-related communications plan. Include general outreach regarding risk, county programs and dam safety. Provide information on regulations and permitting requirements. Tie messaging into the PPI focusing on flood insurance coverage. Prepare an annex to the Emergency Operations Plan that includes prescribed messages for pre- and post-disaster scenarios.	Emergency Management	Moderate		New	within 2 years of plan adoption
12	Prepare countywide hazard-related communications plan. Include general outreach regarding risk, county programs and dam safety. Provide information on regulations and permitting requirements. Tie messaging into the PPI focusing on flood insurance coverage. Prepare an annex to the Emergency Operations Plan that includes prescribed messages for pre- and post-disaster scenarios.	Emergency Management	Moderate		New	within 2 years of plan adoption
12	Prepare countywide hazard-related communications plan. Include general outreach regarding risk, county programs and dam safety. Provide information on regulations and permitting requirements. Tie messaging into the PPI focusing on flood insurance coverage. Prepare an annex to the Emergency Operations Plan that includes prescribed messages for pre- and post-disaster scenarios.	Emergency Management, Public Works, Public Relations	Moderate		New	within 2 years of plan adoption
14	Provide infrastructure upgrades (roads, water supply, sanitary sewer service) to improve emergency services response times in the county's east end. Ensure water supply is sufficient to meet fire fighting needs, and water quality remains safe for residents.	DPW	High		New	Ongoing

#	Goochland County Strategy	Lead Agency	Priority	Timeframe	2022 Status	Comments
1	Continue coordination with VDEM on incoming evacuee issues.	Emergency Management	Moderate	Ongoing	Retained	
2	Continue to coordinate with City of Richmond and Department of Corrections to address wastewater capacity issues.	Public Utilities	High	Ongoing	Retained with minor modifications	
3	Continue to provide training opportunities to county staff. Hazard-related topics may include: floodplain management training, conferences and certification through VaDCR and the Association of Floodplain Managers; conferences and training for emergency managers regarding wildfire mitigation and other hazards; conferences and training for county officials regarding mitigation grant availability and processes	Emergency Management & Community Development	Moderate	Ongoing	Retained with minor modifications	
4	Distribute brochures and use other means to educate the public regarding preparedness and mitigation. Customize approach to provide outreach to large group of citizens with regard to broad spectrum of hazards, including flood, radon and wildfire. Continue the floodplain map-related outreach to support county's new FEMA FIRMs.	Emergency Management	Moderate	Ongoing	Retained with minor modifications	
5	Strengthen system of coordinating, collecting, storing and transmitting damage assessment data for each natural hazard event which causes death, injury, and/or property damage.	Emergency Management/ IT	Moderate	Ongoing	Retained with minor modifications	
6	Continue participating in the National Flood Insurance Program, including enforcement of zoning and building codes.	Community Development	Moderate	Ongoing	Retained with minor modifications	

7	Protect public and private structures from natural hazard damage, including acquiring, relocating, retrofitting or elevating floodprone property. This action may include minor structural flood control projects, retrofits to address critical infrastructure and facilities, mapping to determine detailed flood hazards, and stormwater management system improvements.	Emergency Management, Community Development	High	Ongoing	Retained, but broken into 2 separate mitigation actions	
~~6~~	~~Integrate mitigation plan requirements and actions into other appropriate planning mechanisms such as comprehensive plans and capital improvement plans.~~	~~All county agencies~~	~~High~~	~~Ongoing~~	Deleted	
8	Use available statewide, regional, or county advanced warning systems, weather gauging systems, evacuation planning tools, and public information resources to prepare community officials and residents in the event of a hazard event. Acquire additional resources to build components of a flood warning system and local evacuation plan, including: new IFLOWS gauges, high hazard water crossing elevations for county and state-owned roads, and a flood alert system.	Emergency Management	High	within 2 years of plan adoption	New	
9	Hire full time Environmental Planner to support stormwater management, PlanRVA coordination, environmental planning, conservation easements, community outreach and awareness of various hazards. Add a second Environmental Inspector.	Environmental and Land Development	High	within 2 years of plan adoption	New	
10	Support Virginia DCR in its efforts to bring all regulated dams into compliance with the Dam Safety Regulations. Implement projects and assign responsibility to ensure maintenance/retrofit needs are addressed.	Community Development and Public Safety	Moderate	within 5 years of plan adoption	New	

#	Greensville County Strategy	Lead Agency	Priority	Timeframe	2022 Status	Comments
1	Complete development of Continuity of Operations plan.	Public Safety	Medium		Retain	
2	Complete implementation of citizen notification system.	Public Safety	Medium		Retain	
3	Consider participating in "Turn Around, Don't Drown" public education campaign.	Public Safety	Medium	Immediately upon plan adoption	Retain	
4	Improve GIS layers and track storm damages.	Public Safety	Medium	Ongoing	Retain

1	Protect public and private structures from natural hazard damage, including acquiring, relocating, retrofitting or elevating floodprone property. This action may include minor structural flood control projects, retrofits to address critical infrastructure and facilities, mapping to determine detailed flood hazards, and stormwater management system improvements.	Zoning and Planning; Fire Department	High	Ongoing	Retained, but broken into 2 separate mitigation actions	
~~2~~	~~Integrate mitigation plan requirements and actions into other appropriate planning mechanisms such as comprehensive plans and capital improvement plans.~~			~~Ongoing~~	Deleted; this is accomplished through implementation of the planning process	
2	Use available statewide, regional, or county advanced warning systems, weather gauging systems, evacuation planning tools, and public information resources to prepare community officials and residents in the event of a hazard event.	Zoning and Planning; Fire Department	High	Ongoing	Originally, this action was part of Action #1.	Examples include the *Virginia Hurricane Evacuation Guide* and VDEM's Crisis Track.

#	Charlest City Strategy	Lead Agency	Priority	Timeframe	2022 Status	Comments
1	Protect public and private structures from natural hazard damage, including acquiring, relocating, retrofitting or elevating floodprone property. This action may include minor structural flood control projects, retrofits to address critical infrastructure and facilities and stormwater management system improvements.	Planning and Emergency Management	High	Ongoing	Retained, but broken into 2 actions (see new action #5)	
~~2~~	~~Integrate mitigation plan requirements and actions into other appropriate planning mechanisms such as comprehensive plans and capital improvement plans.~~	~~Planning and Emergency Management~~	~~Medium~~	Ongoing	deleted; this is accomplished through the hazard mitigation planning process	
2	Distribute brochures and use other means to educate the public regarding preparedness and mitigation. Conduct annual preparedness days for hazards to include floods, wind, and earthquakes.	Emergency Management	Moderate	Ongoing	Retained	
3	Work with private utilities to keep right-of-way clear.	Public Works	Moderate	Ongoing	Retained	
4	Reduce rural wildfire risk by increasing resources used to fight these fires. Equipment needs may include, but are not limited to: dry hydrants, drafting equipment, personnel and tankers.	Administration	High	Ongoing	Retained with minor modifications.	
5	Use available statewide, regional, or county advanced warning systems, weather gauging systems, evacuation planning tools, and public information resources to prepare community officials and residents in the event of a hazard event. Acquire additional resources to supplement these systems, as required.	Emergency Management	High	Ongoing	New	Examples include the *Virginia Hurricane Evacuation Guide* and VDEM's Crisis Track.

#	Chesterfield County Strategy	Lead Agency	Priority	Timeframe	2022 Status	Comments
1	Conduct regular review of repetitive loss and severe repetitive loss NFIP data. Continue to work with VDEM and FEMA to mitigate repetitive and SRL properties as owners demonstrate interest in participation. Projects may include acquisition, relocation, elevation or retrofits.	Environmental Engineering - Floodplain Manager	Low	Ongoing	Retained with minor modifications	
2	Enhance and centralize use of GIS to gather damage assessment information by all county agencies including establishing naming conventions and data categories.	GIS, Risk Management, Building Inspections	Low	Ongoing	Substantial progress made, but retained to meet reach additional internal goals.	
~~3~~	~~Include hazard mitigation in the comprehensive plan update in 2017 by linking concepts in the planning process that would accomplish hazard mitigation.~~	~~Planning~~	~~High~~	~~2017 Comp Plan Update Process~~	Deleted; action complete.	
3	Protect critical facility infrastructure through quick connects for generator power, wind and snow retrofits, and other protective measures, which may include permanent generators, elevation, or relocation. This action may include minor flood control structures and stormwater system modifications.	Emergency Management	Moderate	Ongoing	Retained with minor modifications	The county's new COOP will aid in the proces of identifying needs.
4	Provide training opportunities to educate all county staff with a role in disaster recovery regarding mitigation principles and long term recovery best practices, particularly related to housing options.	Emergency Management	High	Annually/ Ongoing	Retained with minor modifications	Introduction to EM provided all interested county staff, annually. EM is revising recovery training and developing new best practices, restructuring the EOC and developing new training techniques/priorities.
5	Encourage whole community preparedness through education regarding hazards affecting the community and steps to reduce vulnerability.	Emergency Management	High	Annually/ Ongoing	Retained with minor modifications	County has expanded public outreach to focus on the whole community, including seniors, special needs, civic associations, and faith-based organizations.

6	Use abandoned mines mapping to guide zoning, development, and building inspection decisions. Work with Virginia Department of Energy to continue to refine the Locations of Abandoned Mines in the Greater Richmond Area maps.	Inspections; Environmental Engineering; Planning	Moderate	Ongoing	Retained with minor modifications	Mapping is part of development review process. Both the physical hazard and historical significance are considered.
7	Enhance processes and procedures in building permit application system within Enterprise Land Management System (ELM) to comprehensively capture damage assessment data.	GIS; Inspections	Moderate	Ongoing	Retained with minor modifications	
8	Continue participating in the National Flood Insurance Program, including enforcement of zoning and building codes. Consider development of a standalone floodplain ordinance.	Inspections; Planning; Environmental Engineering	High	Ongoing	Retained; combined with another action	
~~9~~	~~Review locality's compliance with the NFIP with an annual review of the floodplain ordinances and any newly permitted activities in the 100-year floodplain.~~	~~Emergency Management~~	~~Medium~~	~~Ongoing~~	Deleted; action combined with another	
9	Maintain Storm Ready certification (last certification 2020).	Emergency Management	Low	Ongoing	Retained with update	
10	Incorporate hazard mitigation potential in decision making for acquiring new park land and open space easements.	Parks and Rec	Low	Ongoing	Retained	
11	Protect public and private structures from natural hazard damage, including acquiring, relocating, retrofitting or elevating floodprone property. This action may include minor structural flood control projects, retrofits to address critical infrastructure and facilities and stormwater management system improvements.	Community Development; Planning; Environmental Engineering	High	Ongoing	Retained with minor modifications	
12	Apply hazard mitigation concepts across development project review, capital improvement planning and all other community planning efforts.	Community Development; Planning	Moderate	Ongoing	Retained with minor modifications	
13	Install new monitoring systems for county-owned dams.	Department of Utilities	High	within 2 years of plan adoption	New	

14	Use available statewide, regional, or county advanced warning systems, weather gauging systems, evacuation planning tools, and public information resources to prepare community officials and residents in the event of a hazard event. Acquire additional resources to build components of a flood warning system and local evacuation plan.	Emergency Management	Moderate	Ongoing	New	Incorporate any manufactured home park evacuation plans promulgated in response to the floodplain management ordinance at Sec. 19.1-503(10).
15	Improve stormwater management system to reduce flooding, particularly in neighborhoods. Projects may include raising roads and regrading to eliminate 100-year flood hazard, redesign and installation of infrastructure to more properly handle current and future flows.	Environmental Engineering	Moderate	Ongoing	New	Otterdale Road improvements at Otterdale Branch, Horsepen Creek and Blackman Creek.
16	Develop and expand use of mass notification tool. Final system should have four audiences for messaging: 1) residents; 2) employees; 3) IPAWS alll hazard notifications; and 4) a community engagement tool. Include notification system for dam inundation area dwellers, as identified on recorded plats.	Emergency Management	High	within 3 years of plan adoption	New	Investigate possibility of using NWS weather radio for non-weather related messaging, as well.
17	Finalize and implement county COOP. Coordinate implementation across all county departments.	Emergency Management	High	within 2 years of plan adoption	New	

#	Colonial Heights Strategy	Lead Agency	Priority	Timeframe	2022 Status	Comments
1	Continue participating in the National Flood Insurance Program, including enforcement of zoning and building codes.	Building Inspection Department	High	Ongoing	Retained, but combined with old action #2.	
~~2~~	~~Review of the floodplain ordinances and any newly permitted activities in the 100-year floodplain.~~	~~Planning Department~~	~~Medium~~	~~Ongoing~~	Combined into old action #1.	
2	Protect public and private structures from natural hazard damage, including acquiring, relocating, retrofitting or elevating floodprone property. This action may include minor structural flood control projects, retrofits to address critical infrastructure and facilities and stormwater management system improvements.	Emergency Management	Moderate	Ongoing	Retained, but split into 2 actions.	
3	Distribute brochures and use other means to educate the public regarding preparedness and mitigation. Conduct annual preparedness days for hazards to include floods, wind, earthquakes, and tornado. Customize messaging to address: repetitive flood loss areas, importance of flood insurance coverage, and the high vulnerability of certain populations.	Emergency Management	Moderate	Ongoing	Retained with modifications	
4	Conduct regular review of repetitive loss and severe repetitive flood loss properties from FEMA. Review will include verification of the geographic location of each property and determination if mitigated and by what means. Corrections can be made to FEMA by filing form FEMA AW-501.	Emergency Management	Low	Annually	Retained with modifications	
~~6~~	~~Complete purchase of NOAA weather radios for public facilities.~~	~~Emergency Management~~	~~Medium~~	~~Within 5 years~~	Completed; this action was deleted.	
~~7~~	~~Obtain building footprint data in cooperation with Crater PDC to enable flood hazard analysis using TEIF2.0 analysis method~~	~~GIS/CPDC~~	~~High~~	~~Within 3 years~~	Completed; this action was deleted.	
~~8~~	~~Integrate mitigation plan requirements and actions into other appropriate planning mechanisms such as comprehensive plans and capital improvement plans.~~	~~Emergency Management/ Planning~~	~~Medium~~	~~Ongoing~~	Deleted	

5	Use available statewide, regional, or county advanced warning systems, weather gauging systems, evacuation planning tools, and public information resources to prepare community officials and residents in the event of a hazard event. Acquire additional resources to build components of a flood warning system and local evacuation plan, including: new IFLOWS gauges (especially, Swift Creek, Swift Creek dam and Old Town Creek), road crossing elevations for county, city and state-owned roads, a flood alert system, and an additional tornado siren for the north end of the City near Tussing Elementary and Conjure's Neck.	Fire and EMS	Moderate	within 4 years of plan adoption	New	
6	Repair flood gates on Lakeview Dam, as identified in after action report from the last flood event that impacted the dam.	Emergency Management	High	Immediately; identify funding source within 1 year of	New	
7	Include additional reviewers on Design Review Committee for new development, specifically to review projects for hazard-related vulnerabilities. Include staff training for decision making tools, such as those developed by VIMS Center for Coastal Resources Management for shoreline development and the Certified Floodplain Manager program from the Association of State Floodplain Managers.	Planning and Community Development, Emergency Management	Moderate	within 2 years of plan adoption	New	

#	Dinwiddie County Strategy	Lead Agency	Priority	Timeframe	2022 Status	Comments
1	Conduct regular review of repetitive loss and severe repetitive flood loss properties from FEMA. Review will include verification of the geographic location of each property and determination if mitigated and by what means. Corrections can be made to FEMA by filing form FEMA AW-501.	Planning/Zoning	Low	Ongoing	Retained with minor modifications.	Dinwiddie has 1 RL area.
2	Address road flooding at key locations. Appropriate measures may include elevation of bridges, maintenance of roadside ditches, and improvements to BMPs.	Emergency Management, VDOT	Moderate	Ongoing	Retained with minor modifications.	
3	Distribute brochures and use other means to educate the public regarding preparedness and mitigation. Conduct annual preparedness days for hazards to include floods, wind, tornados and earthquakes.	Emergency Management	Moderate	Ongoing	Retained with minor modifications.	
4	Continue to refine and update Continuity of Operations Plan with lessons learned from COVID-19 pandemic.	Emergency Services	Moderate	Ongoing	Retained with minor modifications.	Plan is complete and was implemented in 2020/2021 for COVID.
5	~~Implement Debris Management Plan; consider County-specific on-call debris management contractors.~~	~~Emergency Management~~	~~Medium~~	~~Ongoing~~	Deleted; action is complete.	
~~6~~	~~Incorporate CVEMA data into County CAD system (road and RR crossings, etc.) for 911 dispatchers. Correlate crossing numbers to location.~~	~~Emergency Management~~	~~High~~	~~Ongoing~~	Deleted; action is complete.	
5	Continue participating in the National Flood Insurance Program, including enforcement of zoning and building codes. Ensure easy access to FEMA floodplain maps by citizens and property owners.	Emergency Management	Moderate	Ongoing	Retained with minor modifications.	

6	Protect public and private structures from natural hazard damage, including acquiring, relocating, retrofitting or elevating floodprone property. This action may include minor structural flood control projects, retrofits to address critical infrastructure and facilities, and stormwater management system improvements. Conduct countywide facilities assessment, including schools, to determine vulnerability to multiple hazards, continuous power availablility and utility redundancies.	Emergency Management	Moderate	Ongoing	Retained with minor modifications.	Critical facilities operated by the wastewater authority and the Dinwiddie County Water Authority are of particular concern.
9	Integrate Health Department and Emergency Management operations in the event of a health-related event, such as pandemic. Address Incident Command Services at both departments; coordinate with the PDC and other regional entitities, and prepare post-incident review of COVID response.	Emergency Management, Health Department, PDC	High	within 1 year of plan adoption	New	
10	Fill and train GIS/addressing staff and planner level position. Expand the Planning Department staff to more effectively and efficiently address short-term and long-term planning needs.	Emergency Management, Planning/Zoning	Moderate	within 2 years of plan adoption	New	Part of this action was included in the comprehensive plan.
11	Design any new county schools to current shelter standards.	Emergency Management, County Administration	Moderate	Long-term	New	
12	Develop methods for encouraging private property owners to properly maintain BMPs.	Environmental	Moderate	within 4 years of plan adoption	New	
13	Study capacity of existing stormwater system components, including culverts and other structures, to determine if sizing is sufficient for current and future flooding and precipitation conditions. Identify and replace vulnerable or undersized structures with bridges, larger culverts or other measures to reduce flood hazards. Implement program for regular inspections and maintenance of roadside ditches and stream channels.	Environmental, VDOT	High	within 1 year of plan adoption	New	Virginia CFPF funding - tie into Local Resilience Plan

McKenney Strategy	Lead Agency	Priority	Timeframe	2022 Status	Comments
Conduct regular review of repetitive loss and severe repetitive flood loss properties from FEMA, if any.	Mayor and Administration	Low	Ongoing	Retain with minor modifications	
Continue to work with VDOT to evaluate and mitigate at-risk roads.	Emergency Management	Moderate	Ongoing	Retain	
Distribute brochures and use other means to educate the public regarding preparedness and mitigation. Conduct annual preparedness days for hazards to include floods, wind, tornado, and earthquakes.	Emergency Management	Moderate	Ongoing	Retain with minor modifications	
Increase water/wastewater treatment systems resiliency with County, McKenney and two private water systems.	Town officials, Dinwiddie County Water Authority, private system owners	High	within 2 years of plan adoption	Retain	
Protect public and private structures from natural hazard damage, including acquiring, relocating, retrofitting or elevating floodprone property. This action may include minor structural flood control projects, retrofits to address critical infrastructure and facilities, mapping to determine detailed flood hazards, and stormwater management system improvements.	Town Administration	Moderate	Ongoing	Retained, but broken into 2 separate mitigation actions	
~~Integrate mitigation plan requirements and actions into other appropriate planning mechanisms such as comprehensive plans and capital improvement plans.~~			~~Ongoing~~	Deleted	
Use available statewide, regional, or county advanced warning systems, weather gauging systems, evacuation planning tools, and public information resources to prepare community officials and residents in the event of a hazard event.	Town Administration	Moderate	Ongoing	Originally, this action was part of Action #1.	Examples include the *Virginia Hurricane Evacuation Guide* and VDEM's Crisis Track.

#	Emporia Strategy	Lead Agency	Priority	Timeframe	2022 Status	Comments
1	Investigate all public utility lines to evaluate their resistance to flood, wind, and winter storm hazards.	Public Utilities	High	Ongoing	Retain	
2	Complete replacement of Halifax Street Bridge.	Public Works	Medium	Long-term	Retain	
3	Continue to review and make recommendations for improvements to the stormwater system.	Emergency Services	High	Ongoing	Retain	
4	Finalize Continuity of Operations Plan.	Administratio n	High	Ongoing	Retain	
~~5~~	~~Identify grant to support geo-coded damage assessment data collection.~~	~~Emergency Services~~	~~Medium~~	~~Ongoing~~	Deleted; state has Crisis Track for all communities	
5	Improve gauging and warning system. Install additional flood gauges on the Meherrin River. Integrate data from all new flood gauges into citizen notification system, including a siren system. Use gauging and warning system data and existing flood depth data to begin developing targeted evacuation plan for flood-prone areas.	Emergency Services	Medium	Ongoing	Retained; combined with old actions regarding integrating gauge data and installing warning siren system.	
~~6~~	~~Integrate data from new flood gauges into citizen notification system.~~	~~Emergency Services~~	~~Medium~~	~~Ongoing~~	Deleted; incorporated into new action #5.	
6	Protect public and private structures from natural hazard damage, including acquiring, relocating, retrofitting or elevating floodprone property. This action may include minor structural flood control projects, retrofits to address critical infrastructure and facilities and stormwater management system improvements.	Emergency Services	Medium	Ongoing	Retained with major modifications	
7	Continue participating in the National Flood Insurance Program, including enforcement of zoning and building codes.	Zoning Administrator	Medium	Annually	Retained with minor modifications	
8	Distribute brochures and use other means to educate the public regarding preparedness and mitigation. Conduct annual preparedness days for hazards to include floods, wind, and earthquakes.	Emergency Services	Low	Ongoing	Retain	

9	Request list from VDEM or VA DCR and conduct annual review of RL and SRL property list to ensure accuracy. Review will include verification of the geographic location of each RL property and determination if mitigated and by what means. Provide corrections if needed by filing form FEMA AW-501.	Zoning Administrator	Low	Annually	Retained with minor modifications	
~~10~~	~~Install warning sirens.~~	~~Emergency Services~~	~~Medium~~	~~Ongoing~~	Retained but combined into new action #5	
~~13~~	~~Integrate mitigation plan requirements and actions into other appropriate planning mechanisms such as comprehensive plans and capital improvement plans.~~	~~Planning~~	~~Medium~~	~~Ongoing~~	Deleted; this is accomplished through implementation of the planning process	

APPENDIX H - ACRONYMS

The following list of acronyms may help with interpretation of terms used in this document.

Acronym List

AAD – Average Annual Damages

ACS – American Community Survey

AIDR – Australian Institute for Disaster Resiliency

ARPA – American Rescue Plan Act

ATSDR – Agency for Toxic Substances and Diseases Registry

BFE – Base Flood Elevation

BMP – Best Management Practice

CBPA – Chesapeake Bay Preservation Act (or Area)

CDBG – Community Development Block Grant Program

CDC – Centers for Disease Control and Prevention

CEDS – Comprehensive Economic Development Strategies

CERT – Community Emergency Response Team

CFPF – Community Flood Preparedness Fund

CFR - Code of Federal Regulations

CIP – Capital Improvement Plan

COOP – Continuity of Operations Plan

CRS – Community Rating System

CWA – Clean Water Act Section 319 Grants

CZM – Virginia Coastal Zone Management Program

DEM – Digital Elevation Model

DCR – Virginia Department of Conservation and Recreation

DHS – U.S. Department of Homeland Security

DMA 2000 – Disaster Mitigation Act of 2000

DPW – Department of Public Works

EAS – Emergency Alert System

EF – Enhanced Fujita [scale]

EOC - Emergency Operations Center

EPA – U.S. Environmental Protection Agency

EWP – Emergency Watershed Protection

FEMA – Federal Emergency Management Agency

FFE – First Floor Elevation

FIRM – Flood Insurance Rate Map

FIS – Flood Insurance Study

FOLAR – Friends of the Lower Appomattox River

FPMS – Flood Plain Management Services Program

GIS – Geographical Information System

HAZMAT - Hazardous Material(s)

Hazus – Hazards U.S. Multi-Hazard

HHPD – High Hazard Potential Dam

HIRA – Hazard Identification Risk Assessment

HMA – Hazard Mitigation Assistance

HMGP – Hazard Mitigation Grant Program

HUD – U.S. Department of Housing and Urban Development

IEM – Iowa Environmental Mesonet

LEPC – Local Emergency Planning Committee

LiMWA – Limit of Moderate Wave Action

LWCF – Land and Water Conservation Fund Grants

MAP – Mitigation Action Plan

MLLW – Mean Lower Low Water

MMS – Moment Magnitude Scale

NCEI – National Centers for Environmental Information

NFIP – National Flood Insurance Program

NRI - National Risk Index

NOAA – National Oceanic Atmospheric Administration

NWS – National Weather Service

pCi/L – picocuries per liter

PDM – Pre-Disaster Mitigation Program

PDSI – Palmer Drought Severity Index

RFC – Repetitive Flood Claims Program

RGGI – Regional Greenhouse Gas Initiative

RL – Repetitive [flood] Loss

RMA – Resource Management Area

RMT – Richmond Marine Terminal

RPA – Resource Protection Area

RSI – Regional Snowfall Index

SARA - Superfund Amendments and Reauthorization Act

SFCP – Small Flood Control Projects

SFHA – Special Flood Hazard Area

SLOSH – Sea, Lake and Overland Surges from Hurricanes

SoVI – Social Vulnerability Index developed by University of South Carolina's Hazards and Vulnerability Research Institute

SRL – Severe Repetitive [flood] Loss

SSR – Shoreline Situation Report

STAPLE/E – Social, Technical, Administrative, Political, Legal, Economic and Environmental

UDF – User-Defined Facilities

USACE – U.S. Army Corps of Engineers

USBC - Virginia Uniform Statewide Building Code

USDA – United States Department of Agriculture

USGS – United States Geological Survey

VASEM – Virginia Academy of Science, Engineering, and Medicine

VDEM – Virginia Department of Emergency Management

VDEQ – Virginia Department of Environmental Quality

VDH – Virginia Department of Health

VDOF – Virginia Department of Forestry

VDOT – Virginia Department of Transportation

VIMS – Virginia Institute of Marine Science

VMRC – Virginia Marine Resources Commission

VUSBC – Virginia Uniform Statewide Building Code

WHO – World Health Organization

WNV – West Nile Virus

WPFP – Watershed Protection and Flood Prevention

WSP – Watershed Surveys and Planning

WUI – Wildland Urban Interface
