Refunds

What to Expect for Refunds in 2017

In general, IRS issues most refunds in less than 21 days, although some require additional time. Taxpayers who claim the Earned Income Tax Credit (EITC) or the Additional Child Tax Credit (ACTC) may experience a refund hold this year. In accordance with the Protecting Americans from Tax Hikes (PATH) Act, the IRS cannot issue these refunds before mid-February. The IRS expects the earliest EITC/ACTC related refunds to be available in taxpayer bank accounts or debit cards **starting Feb. 27, 2018**, if they chose direct deposit and there are no other issues with the tax return.

Affordable Care ACT (ACA)

<https://www.irs.gov/ACA>

The Affordable Care Act contains comprehensive health insurance reforms and includes tax provisions that affect individuals, families, businesses, insurers, tax-exempt organizations and government entities. These tax provisions contain important changes, including how individuals and families file their taxes. The law also contains benefits and responsibilities for other organizations and employers.

Disaster Assistance and Emergency Relief

Special tax law provisions may help taxpayers and businesses recover financially from the impact of a disaster when the federal government declares their location to be a major disaster area. Depending on the circumstances, the IRS may grant additional time to file returns and pay taxes. Both individuals and businesses in a federally declared disaster area can get a faster refund by claiming losses related to the disaster on the tax return for the previous year, usually by filing an amended return.
