About this year’s featured title
Sourdough explores the tension between technology and craft, and the universal passion for food. An exhausted coder for an ambitious software company is bequeathed a sourdough bread recipe from sibling bakers who are forced to close their shop. The gift leads to a new vocation, a legal dispute, and a venture into a secret market that fuses food with technology.

For book discussions and other programs related to Sourdough, see your library’s listings inside and visit the All Henrico Reads page online starting in January.
